

Triple Trend System

...a pre-Freedom-Formula Production

RISK DISCLOSURE STATEMENT.

Trading any financial market involves risk. This e-book, software, and the website and its contents are neither a solicitation nor an offer to Buy/Sell any financial market. The contents of this e-book and software are for general informational purposes only (contents also mean the website and any email correspondence or newsletters related to the website).

Although every attempt has been made to assure accuracy, we do not give any expressed or implied warranty as to its accuracy. We do not accept any liability for error or omission. Examples are provided for illustrative purposes only and should not be construed as investment advice or strategy.

No representation is being made that any account or trader will or is likely to achieve profits or loses similar to those discussed in this e-book and software. Past performance is not indicative of future results.

By downloading the e-book, and software, subscribing to our mailing list or using the website you will be deemed to have accepted these terms in full. The author, the website, the e-book, the software and its representatives do not and cannot give investment advice or invite customers to engage in investments through this e-book, software. We do our best to insure that the website is available 24 hours per day but we cannot be held liable if for any reason the site is not available.

The information provided on this ebook, software is not intended for distribution to, or use by any person or entity in any jurisdiction or country where such distribution or use would be contrary to law or regulation or which would subject us to any registration requirement within such jurisdiction or country.

Hypothetical performance results have many inherent limitations, some of which are mentioned below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and actual results subsequently achieved by any particular trading program.

One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk and no hypothetical trading record can completely account for the impact of

financial risk in actual trading. For example the ability to withstand losses or to adhere to a particular trading program in spite of the trading loss is material points, which can also adversely affect trading results. There are numerous other factors related to the market in general or to the implementation of any specific trading program, which cannot be fully accounted for in the preparation of hypothetical performance results. All of which can adversely affect actual trading results.

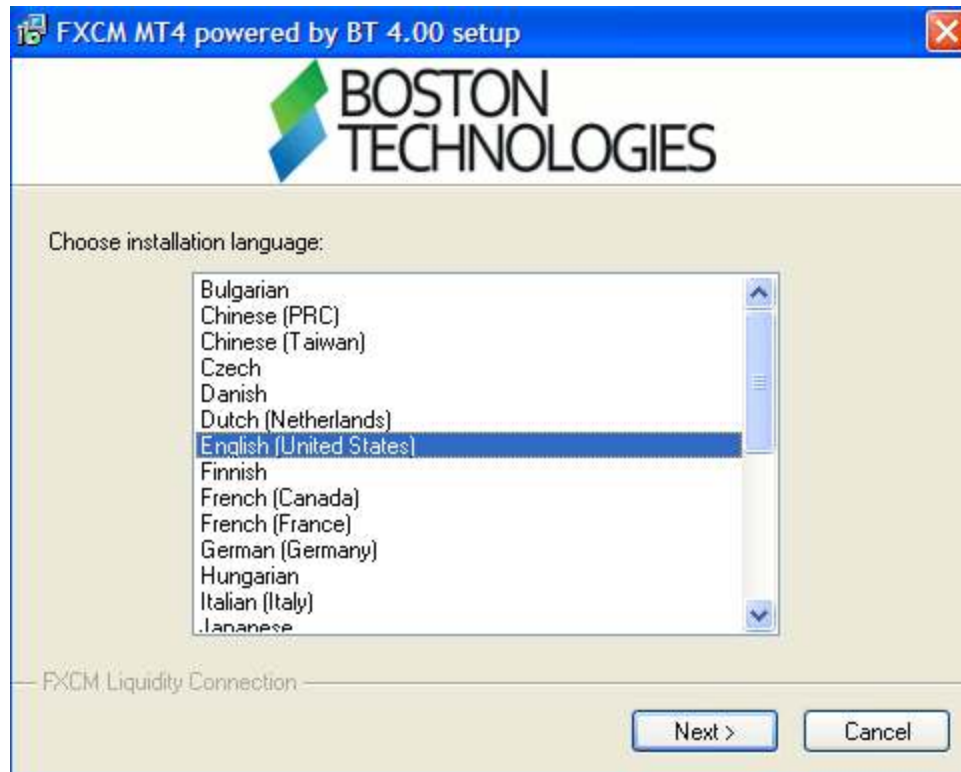

We reserve the right to change these terms and conditions without notice. You can check for updates to this disclaimer at any time without notification. The content of this website and this ebook and software are copyrighted and may not be copied or reproduced.

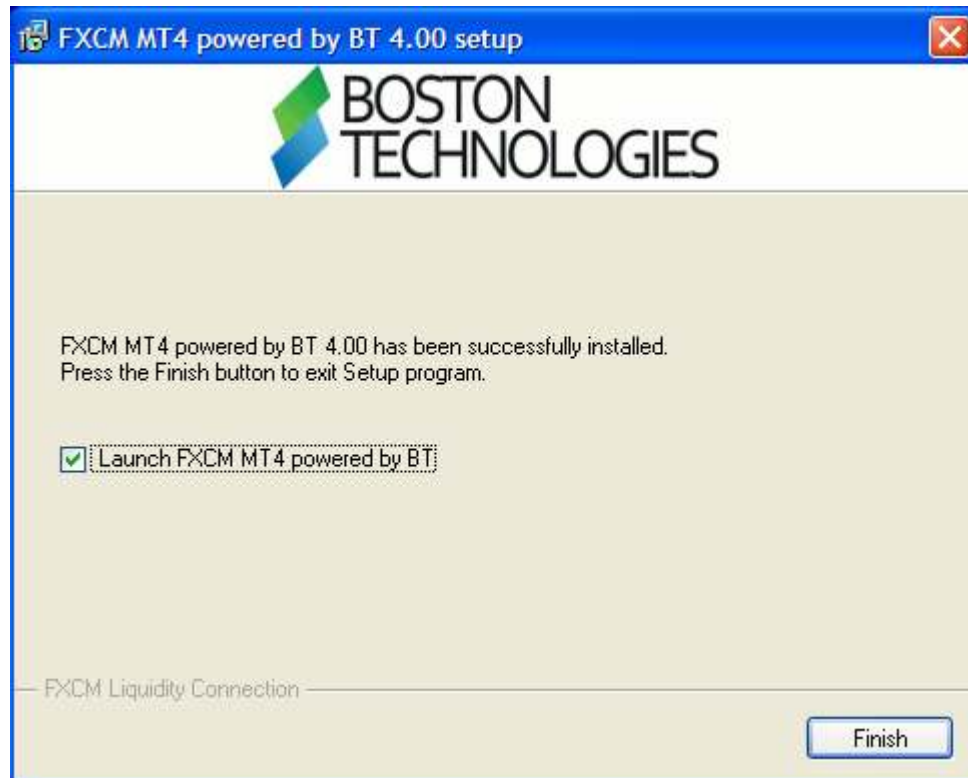

INSTALL META TRADER 4 PLATFORM

1. Download Metatader 4.

<http://www.fxcm.com>

Follow the instruction on the screen to complete the set up

Once you are done, click on the check box to launch Meta Trader 4.

2. Set up a demo account

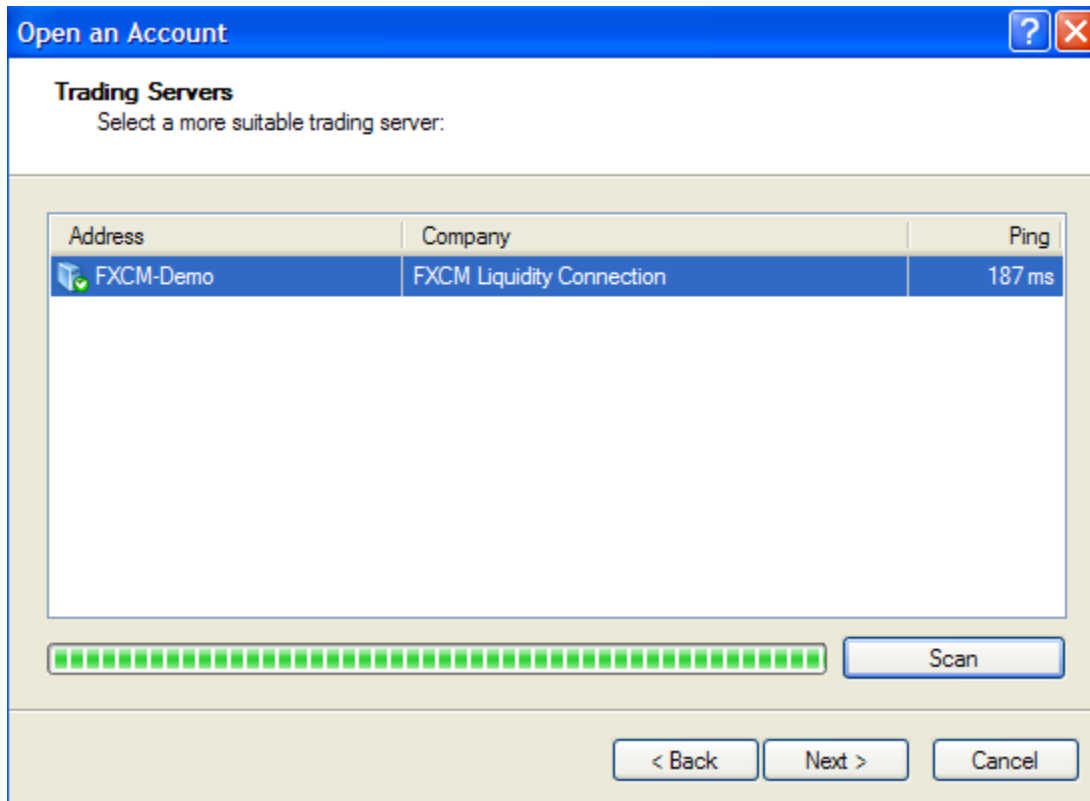

You will be asked for opening an account when running Meta Trader for the first time.

Open an Account ? X

Personal details
To open an account, please fill out all the following fields:

Name:	<input type="text" value="min 6 chars"/>		
Country:	<input type="text" value=""/>	State:	<input type="text" value="min 2 chars"/>
City:	<input type="text" value="min 2 chars"/>	Zip code:	<input type="text" value="min 3 chars"/>
Address:	<input type="text" value="min 6 chars"/>		
Phone:	<input type="text" value="min 6 chars"/>	Email:	<input type="text" value="name@company.com"/>
Account Type:	<input type="text" value="demo-USD"/>	Currency:	<input type="text" value="USD"/>
Leverage:	<input type="text" value="1:200"/>	Deposit:	<input type="text" value="100000"/>
<input type="checkbox"/> I agree to subscribe to your newsletters			

Fill up all the necessary information to open a new account and Click Next to continue

Choose your trading server and click next

Click finish button to complete your account registration process.

Install Triple Trend System On Your Computer

To install it, just follow the following procedure

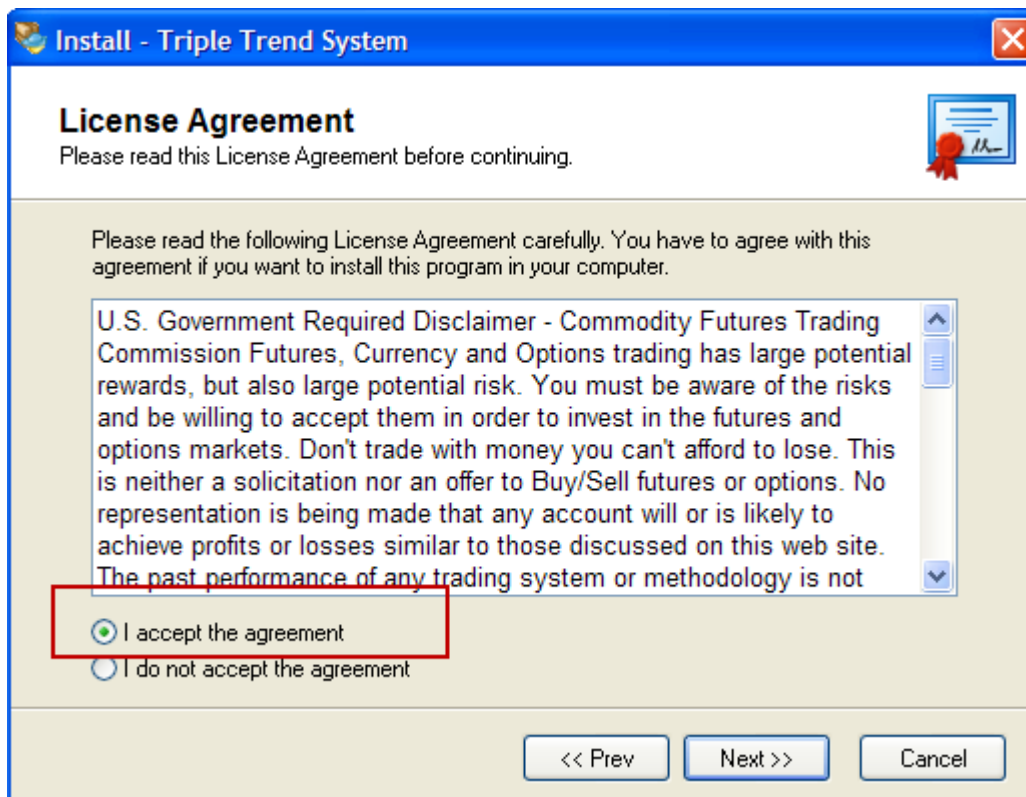

1. You need to close the Meta Trader if you are running it
2. Go to the place where you save the file **tripletrendsystem.exe**, double click on it to run the installer.
3. The installer wizard will start and you have to follow the screen instruction to complete the setup process. The setup process includes the following steps

Step 1

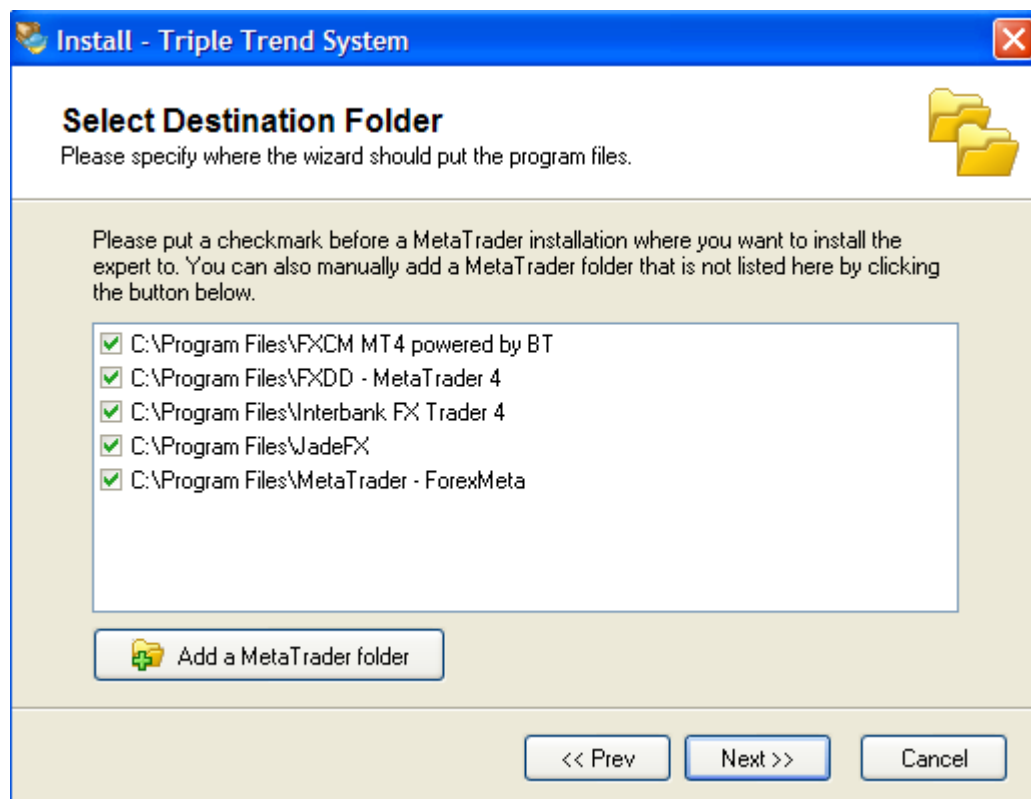

You just have to click Next to continue to next step

Step 2

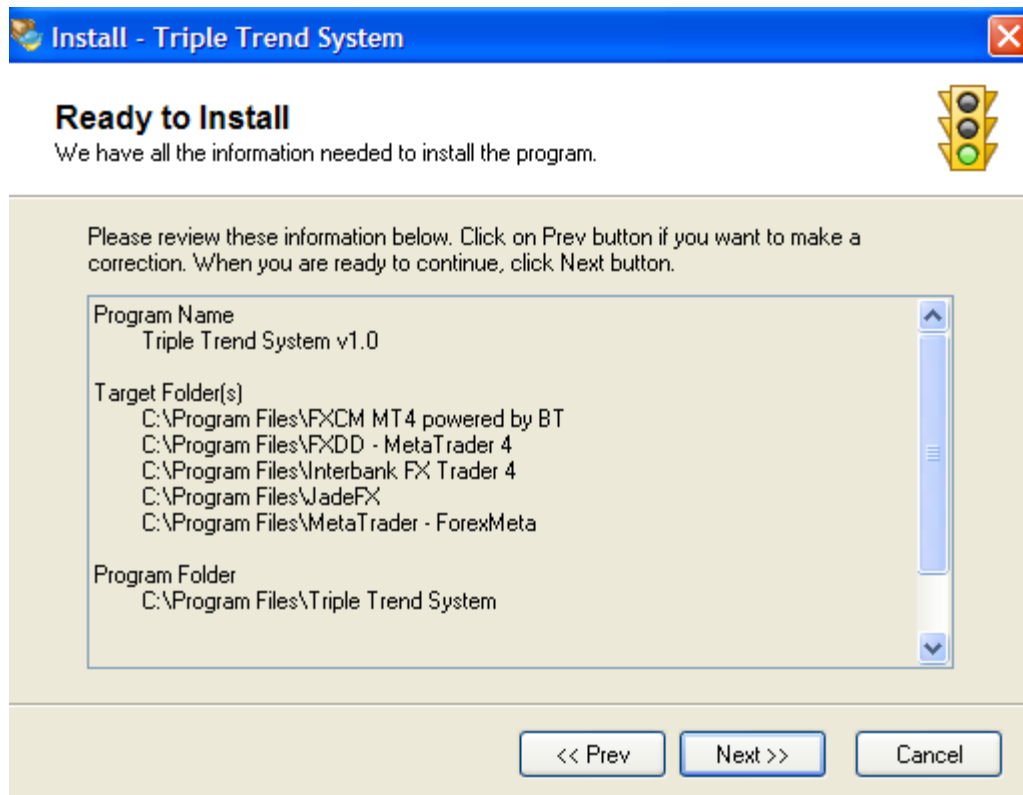

Choose "I accept...." and click Next to continue

Step 3

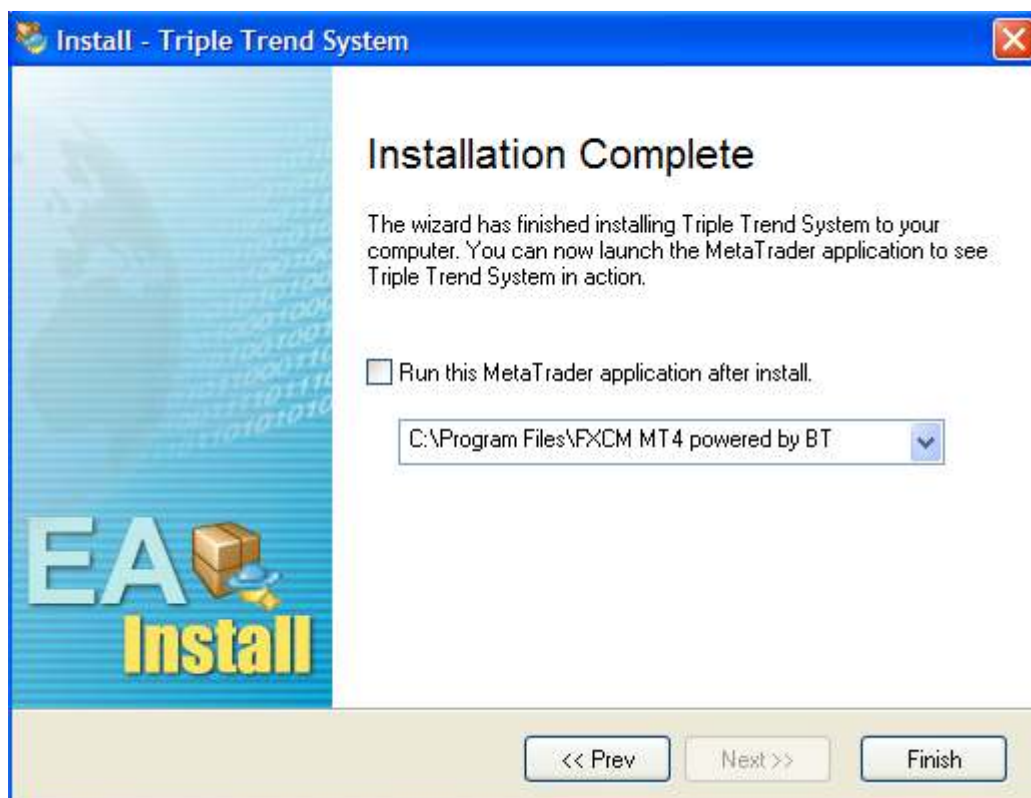

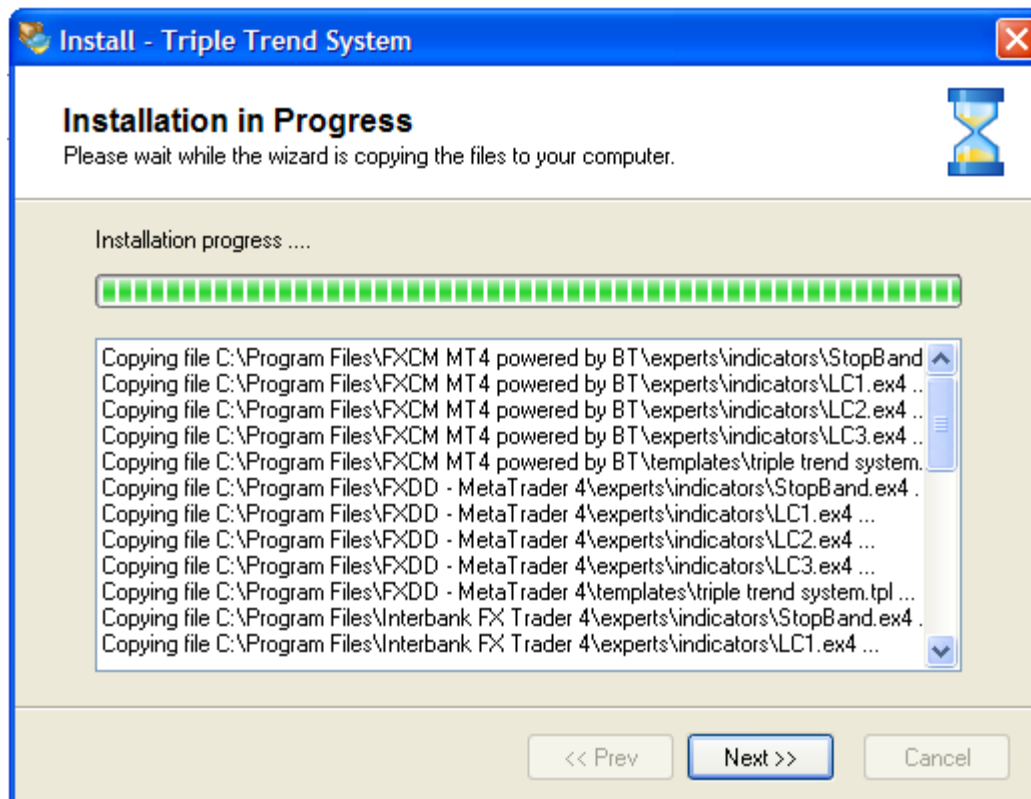

The Installer will try to find all the instances of Meta Trader 4 installed on your computer and it will install the system into these locations.

Step 4

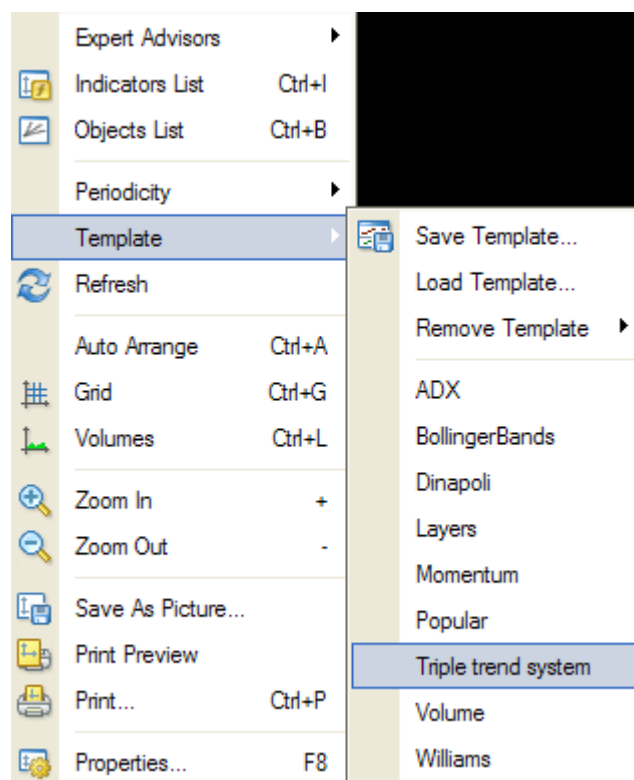

Step 5

Congratulations. You've completed

RUNNING TRIPLE TREND SYSTEM

To run Triple Trend System, just start your Meta Trader 4 and load the template

How The System Works

Triple Trend System uses 4 different proprietary indicators

1. Stopband Indicator
2. LC1 Trend Indicator
3. LC3 Trend indicator
4. LC3 Trend Indicator

ENTRY RULES

BUY RULES

Open a BUY trade when all three trend indicators show a bullish signal:

- LC1 Trend indicator is showing a bullish signal (Blue color)
- LC2 Trend indicator is showing a bullish signal (Blue color)
- LC3 Trend indicator is showing a bullish signal (Blue color)

SELL RULES

Open a SELL trade when all three trend indicators show a bearish signal:

- LC1 Trend indicator is showing a bearish signal (Red color)
- LC2 Trend indicator is showing a bearish signal (Red color)
- LC3 Trend indicator is showing a bearish signal (Red color)

Stop loss

The stoploss value will be derived from the StopBand indicator. As you can see on the screenshot, the Stopband indicator displays two different dots for each candle. The BLUE dot is the stoploss level for BUY entry and the RED dot is for SELL entry.

Exit

There are two ways to exit your trade

- Use take profit level. Take profit level = 2 x stop loss level
- Exit when there are at least two trend indicators showing a reversal signal

Use this system on Daily or 4-H timeframe. Do not use it to scalp because the signal will be as accurate as on long timeframe.

TRADE EXAMPLES

SELL EUR/USD on Daily Timeframe

As we can see from the screenshot above, all three Trend Indicator show a bearish signal and this was possibly a very good set up for SHORT entry. So, on the opening of the next candle, we opened a SHORT trade at 1.4359. The value of the stoploss level indicated by the Stopband Indicator is 1.4460 ~ 101 pips above the entry point.

We set the take profit level at $\text{stoploss} \times 2 = 202$ pips

The trade went down strongly in our favor direction and hit the profit target. So, the trade was closed with 202 pips profit

BUY EUR/USD on Daily Timeframe

As we can see from the screenshot above, all three Trend Indicator show a bullish signal and this was possibly a very good set up for LONG entry. So, on the opening of the next candle, we opened a LONG trade at 1.4377. The value of the stoploss level indicated by the Stopband Indicator is 1.4225 ~ 152 pips below the entry point.

The trade went up strongly in our favor direction and when two trend indicators showed a reversal signal we exited our trade. So, the trade was closed at 1.4710 with 333 pips in profit.
