Summary:

Trades: 2
Break Even: 0
Win: 1
Loss: 1
Net Gain: 0%

Discussion:

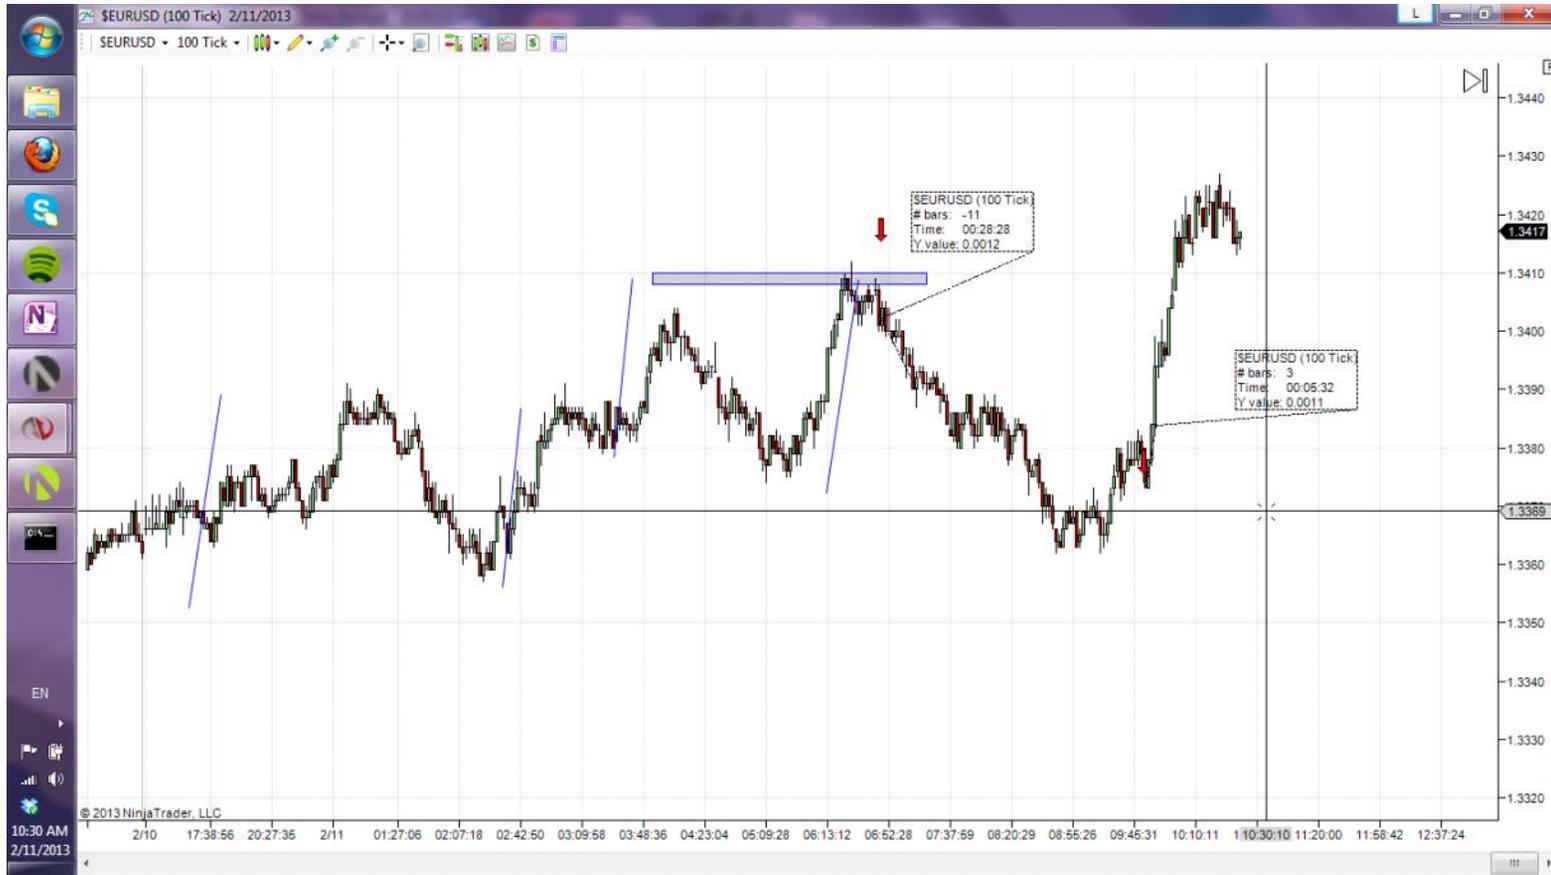

I didn't do well today because I was trying to use the ideal of 'break and retest' to get in on good trades. Arg! Also I missed some facts and przs. Anyways..... I improve in leaps and bounds! Currently in a flat phase!

Also I didn't let trades run properly, because I was always guessing there would be another prz coming up and it would go back up!

The lost trade was where I was trying to trade a break of resistance and retest of the bat pattern (which I didn't show, im lazy) .
