## About the Reports.

Fundamental Analysis, though not the only direct determinant of Forex Spot Trading, is still significant and cannot be ignored undeniably. The author believes quantifying fundamentals strength of currency into 1 single index score helps in maintaining the overview of the currency, and therefore enhancing traders' overall trading system consisting of other tools, such as Technical Analysis, Price action or events driven risk movements...etc.

The reports are updated and published on a daily basis, on 8 currencies namely: AUD, NZD, CAD, CNY, EUR, GBP & USD. From which, each individual Quantified Currency Strengths are consolidated into the Summary Report. Further on the basis of pairing Strongest Fundamentals of Currency against Weakest Fundamentals of Currency, auto-suggested trades are then generated based on these allocated fundamental strengths of currency.
