

## **TRADERS GIFT STRATEGY OPTIMIZER QUICK START**

**To install** - unzip TradersGift Strategy Optimizer.zip and **run setup.exe**

You may need to install dotNetFx35setup which is enclosed in the zip file.

(If any error message appears about the Powerpack you can use the PowerPacksSetup file to install)

### **Download and unzip the 2015 data files from Post #1**

Run the program by locating Strategy Optimizer from your start menu - Programs  
Getting started -

Click on "Select Data" - Top Left hand corner and wait for one of the downloaded data files to be read

### **For a quick demo**

Click on "Start Optimization" Top Left hand corner, 2<sup>nd</sup> Icon

After the graphs have been displayed, click on any line in Optimizations to display that data

Click on "Show Hour of Day" button on the bottom right graph to display hourly figures.

Click on "Show Trades" to show the trades

Click on any trade line to display the trade chart

Click on "Hide Trades" to return to the optimizations

Click on "Show Inputs" to return to the input screen

RSI Strategy and the other checkboxes were for the quick demo. Select and deselect as needed for your own requirements.

Easy Mode option has now been added to simplify input. Strategies can be selected from a single TAB. All options within that strategy will be selected so be careful that you don't create too many options for optimization.

Smart file names are enabled when saving set files.

**At this stage only the first 16 tabs** (up to and including Pivots) in the Strategies and Filters are operational however any of those can be combined.

**Load and Save Setups are now enabled.** You can read and write MT4 set files.

Use Print Window for paper copies.

**REMEMBER THIS IS A BETA VERSION - ANY PROBLEMS** [Personal Message Me](#)

**ANY CONSTRUCTIVE COMMENTS** - [Post to the thread.](#)
