

# ClearFXSignals indicator for MT4

## Parameter explanation

### MALength

This is the number of bars in the MA calculation, used as a trend filter for trades

### Separation

This helps set the visual vertical distance between a chart marker and the price bars  
Increasing this setting will put more distance between the chart marker and the bar

### BuyArrowCharacter / SellArrowCharacter

The integer number of the chart marker symbol for buy and sell signals.

MT4 lets you select which WingDing character you want to use as your chart marker.

Below is a table that shows you the possible selections

32		33		34		35		36		37		38		39		40		41		42		43		44		45		46		47	
48		49		50		51		52		53		54		55		56		57		58		59		60		61		62		63	
64		65		66		67		68		69		70		71		72		73		74		75		76		77		78		79	
80		81		82		83		84		85		86		87		88		89		90		91		92		93		94		95	
96		97		98		99		100		101		102		103		104		105		106		107		108		109		110		111	
112		113		114		115		116		117		118		119		120		121		122		123		124		125		126		127	
128		129		130		131		132		133		134		135		136		137		138		139		140		141		142		143	
144		145		146		147		148		149		150		151		152		153		154		155		156		157		158		159	
160		161		162		163		164		165		166		167		168		169		170		171		172		173		174		175	
176		177		178		179		180		181		182		183		184		185		186		187		188		189		190		191	
192		193		194		195		196		197		198		199		200		201		202		203		204		205		206		207	
208		209		210		211		212		213		214		215		216		217		218		219		220		221		222		223	
224		225		226		227		228		229		230		231		232		233		234		235		236		237		238		239	
240		241		242		243		244		245		246		247		248		249		250		251		252		253		254		255	

### EnableBuyAlertSound / EnableSellAlertSound

These true/false parameters let you turn on/off the playing of the buy or sell alert WAV files  
"True" means the playing is enabled, "False" means the playing is disabled

### BuyWAV / SellWAV

The WAV file name of the audible alert.

NOTE: Your WAV file must exist in the "Sounds" folder within your MT4 installation

Example for FXDD might be: *C:\Program Files (x86)\FXDD - MetaTrader\Sounds*

### EnableBuyAlertPopup / EnableSellAlertPopup

Determines if you want to launch a popup window alert then a buy or sell signal occurs

### PlotOnOpenOfBar

This true/false setting lets you control which bar gets the buy/sell chart marker.

NOTE: This indicator bases its buy/sell signal calculations on the close of each bar.

If you want the chart marker to plot on the bar that closed (the bar that generated the signal, otherwise known as the "signal bar"), then set PlotOnOpenOfBar to "false".

If, however, you want the chart marker to plot on the bar that starts immediately after the "signal bar", then set this parameter to "true".
