

## NinjaTrader Setup

Download NT from <http://www.ninjatrader.com/>

Before install it, be sure have **NET.FRAMEWORK** installed on windows, or get it here <http://www.microsoft.com/net/Download.aspx>

Install NT, open it and setup your provided license.

If you don't have already an **account** go to <http://www.mirusfutures.com/> and register a demo account.

On NT click on **Tools – Account connection – Add – Next**.

On **Connection name** write Mirus or a name you like.

On **Provider** select Zen-Fire.

On **Backup datafeed** connection select <none>

**Historical Data:** Enabled

Click on **Next**, put username and password Mirus provided you and click on **Next**, then click on **Finish**. Yuor account is now ready.

After this you have to **import indicators**

Download and unzip the NT\_Vol\_Analysis folder with indicators, templates and workspaces, **don't unzip singol indicator** cause NT imports it in zip extension.

On NT

Click on **File – Utilities – Import Ninjascript – Yes** – then select file path and choose the indicator.

Repeat this step for every indicator u want to import.

Close NT.

Now on **Windows** go to **Document** folder, open **NinjaTrader 6.5** folder, open **templates**, then **Chart**, and copy here the templates find in **NT\_Vol\_Analysis/templates** folder.

Go back on **NinjaTrader 6.5** folder and open **workspaces** folder, import here the workspaces find in **NT\_Vol\_Analysis/workspaces**

Now u are ready to work.

Open NT

Click on **File – Connect – Mirus** (or the name u have chose)

Click on **File – Workspaces** – select **Vol\_Analysis** (if u don't see it, click on open workspaces and duble click it), and NT now open two charts, one with 6H(EUR/USD), one with (GBP/USD),

If u want to open anothre chart:

Click on **File – New- Chart** :

On **Instrument Type** select **Future**, then click the button with **3 dot**, and select the pairs u want, ie 6E for EUR/USD, 6B for GBP/USD.....

On **Interval Setting** select the interval u like, then select **chart template** and **Range Setting**, click on **OK**, you have done, now u can see the chart.

On chart

if u want to change somenthing, click right mice button and select what u want to change, ie click on indicators, u see on left 2 windows, the upper contains all the indicators, and the lower contains

the indicators u have on chart. To add a new one double click on indicators u want in the upper window, the on the left windows u can chose the indicator parameter, then click Apply, wait for chart upload and click close.

For every other setting refer to help file, or on support webpage

<http://www.ninjatrader.com/webnew/support.htm>

or on support forum <http://www.ninjatrader-support2.com/vb/index.php>.

Bye.

Lubo.

P.s. Sorry for my bad english.
