Bar EA v5.1

Key information EA

Tab 1

- Bar EA trading method is **very special**, do not use Indicator. Because, it late than current prices, not be exactly as we traded short.
- Bar EA can make a profit of **0% - 20% on the day** and also can lose 5% on the day. We can set the level of profits and risks based on trading volume.
- MT4 trading time: **22:00 – 5:00**. Close all order before 7:00 MT4 hour. MT4 time zone GMT+2, time zone for me GMT+7 (It uses the MT4 hours).
- The pair traded: **only EUR/CHF**. Because the fluctuation range of the small pair in a day, we are short trade (scalping) of day trading and and make money in the sideways market very easy.
- EA Bar v4 has **two modes** to customize volume, 1 - fix lot, 2 - increased or decreased depending on the volatility of the current market.
- Stop Loss and Take Profit are **all hidden**, to avoid impact from Brokers. Reduce risks when market volatility is too strong.
- Parameters have **been optimized**, you do not need to adjust. But you can change if you like trading with other modes, it is really easy.
- Minimum deposit to secure for EA: **all is good**.
