Quoting snloba

Hi, From my experiences, 123 price pattern and divergence are the reversal patterns for most 90% of the time. Let look the charts attached. H4 is still down. But H1 starts to move upward by creating 123 pattern reversal at the vertical line. Because, on H1, price failed to breach the point 1 then price rose. But if there are big NEWS release and supported the current trend then the trend keeps moving downward. Sai Ram (image)

Thanks for clearing, Snloba! In other words, the released news reverse the expected direction of the price according the technical analyzes and that's why there isn't 100% winning. I understand it so.
I wish you nice weekend!!!
