

# Trade Manager for Daily Trading levels (Setting up TradeMan\_HappyMe EA) V1.4

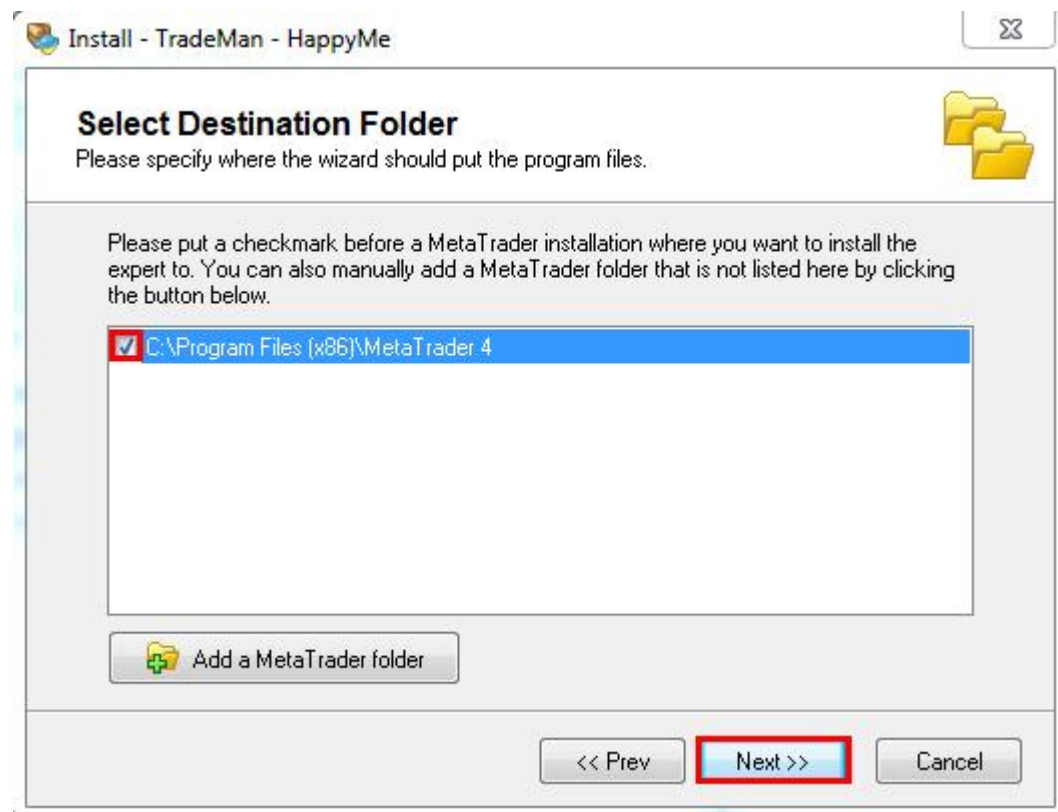

---

## Installing TradeMan\_HappyMe EA

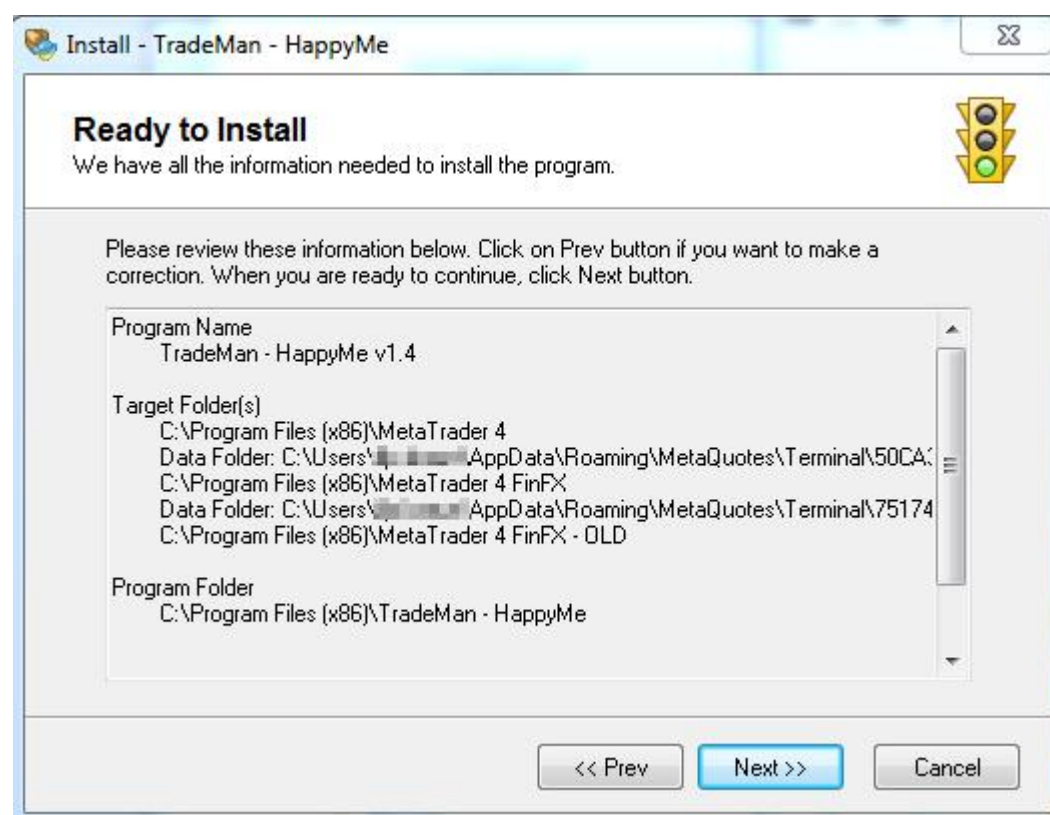

- Download on <https://www.forexfactory.com/showthread.php?p=10113316> the latest version of the TradeMan\_HappyMe EA
- Double click the executable "TradeMan\_HappyMe Installer.exe"

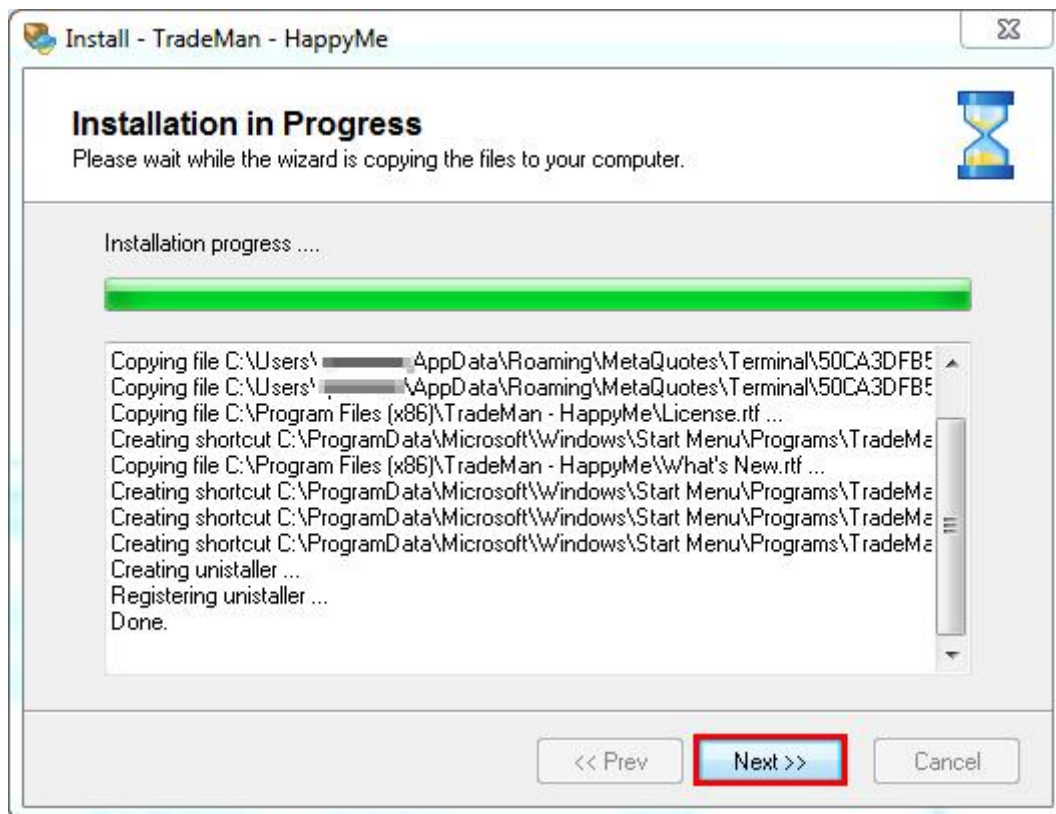

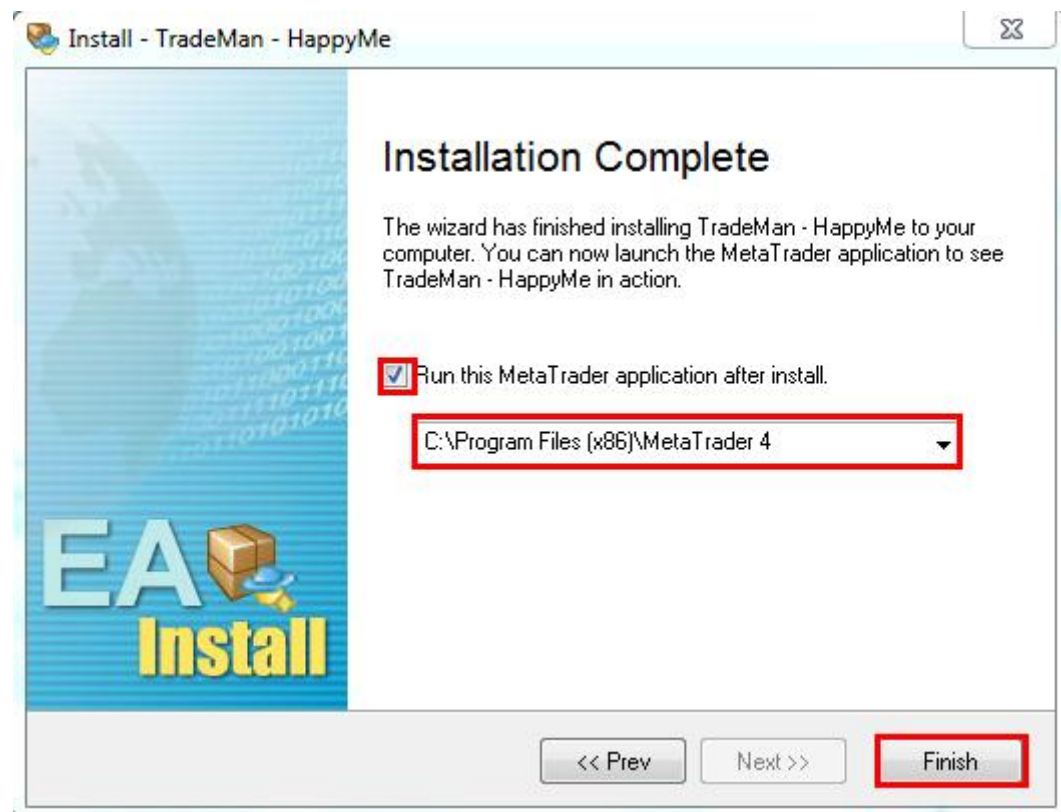

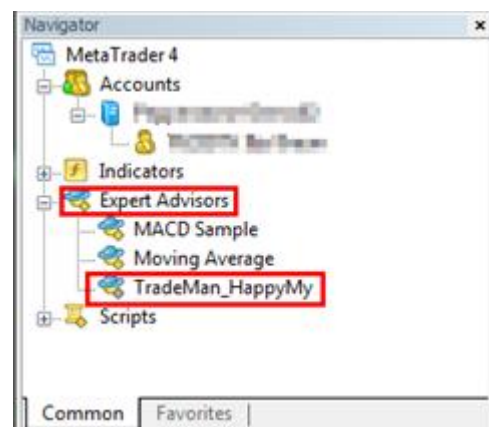

Select All the MetaTrader location in where you want to install this EA

- Installation is finished now and the Metatrader Console is opened. You can now see the EA is installed

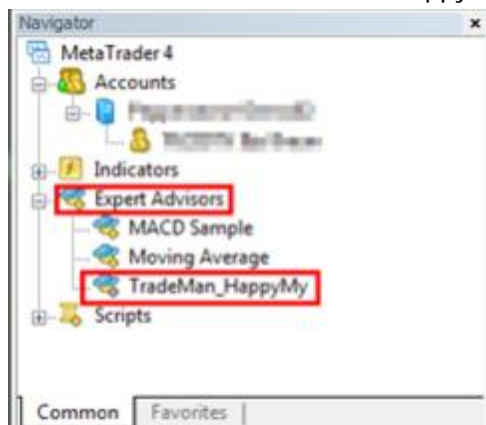

## How to activate the TradeMan\_HappyMe EA to a chart

Note: Which Instrument and TimeFrame to use is programmed into the EA so actually it doesn't matter which:

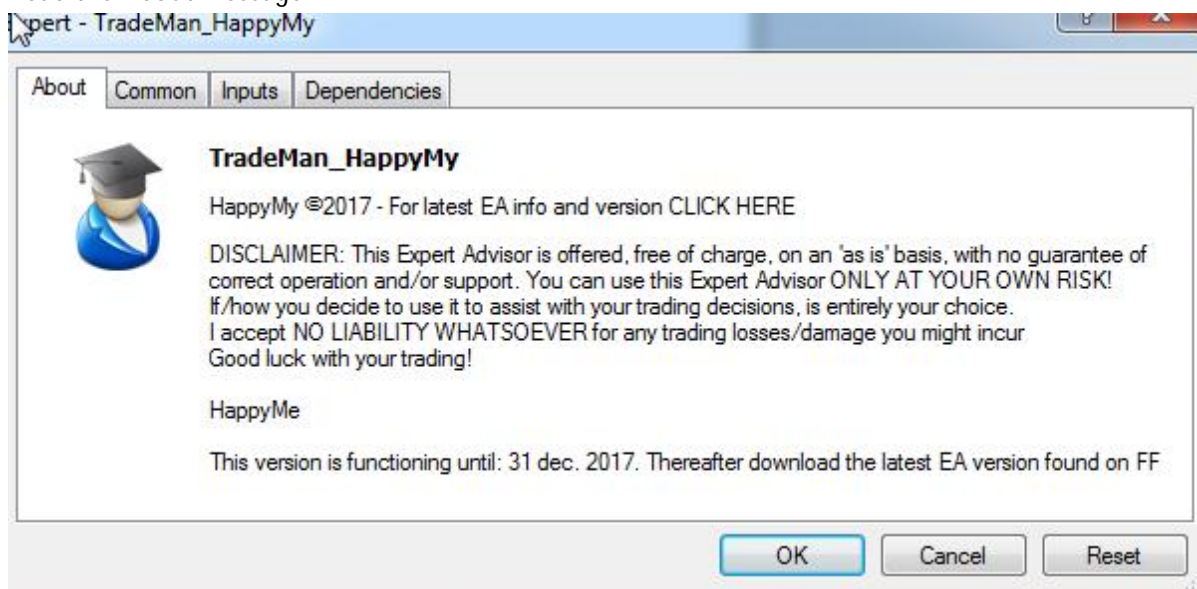

- TimeFrame you show the chart on
- Which instrument your viewing in the chart

- Open a new chart
- Double click the EA "TradeMan\_HappyMy"

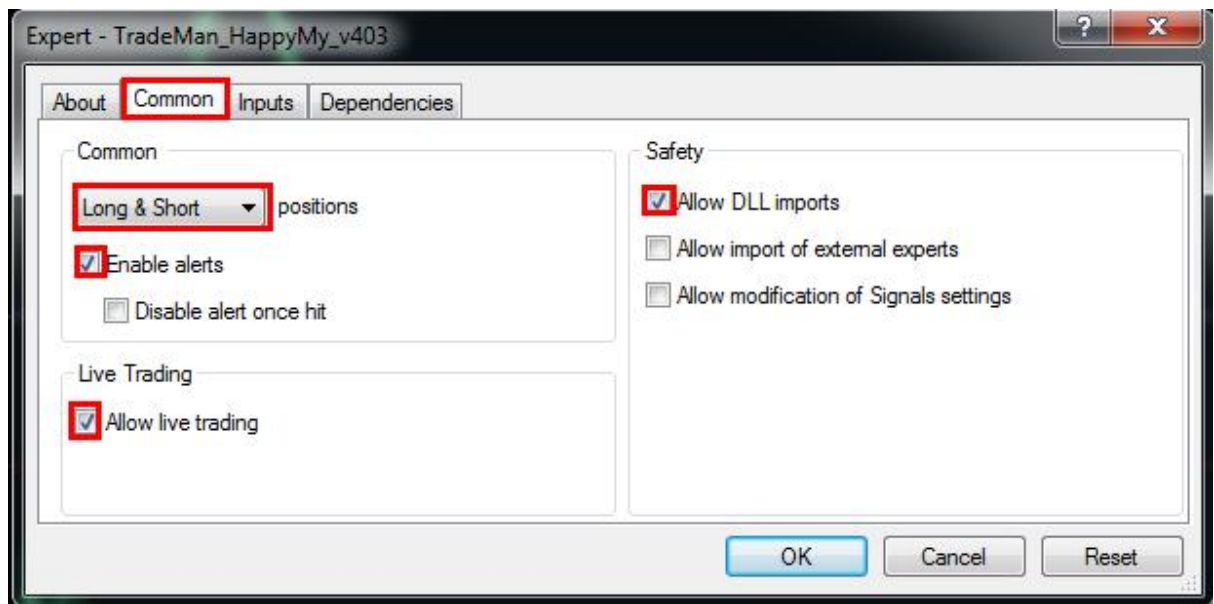

- Read the About message

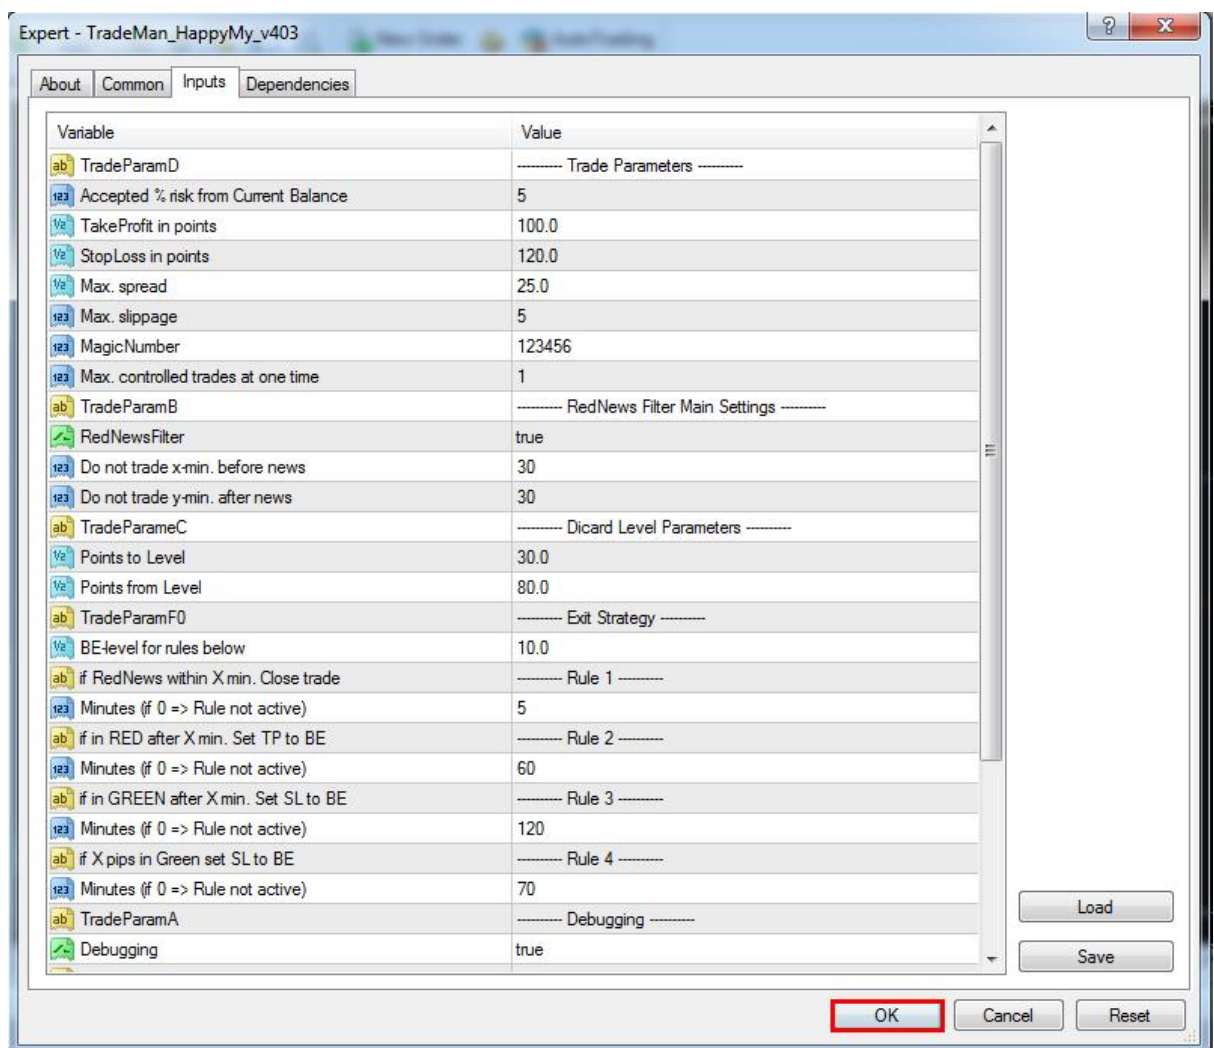

- Go to the tab "Common"

Make sure the following options are checked at least:

- ☐ Allow live trading
- ☐ Allow DLL imports

- Go to the tab "Inputs"
- Eventually change the Input-settings to your own wishes

- And click "OK"

- The EA is now loaded in your chart
- If you see a SAD-Smiley in the right Upper Corner. Please Activate the AutoTrading by clicking on

- => The HAPPY-smiley is showing you that autotrading is active now!
- Your chart must now look like

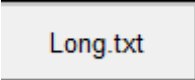

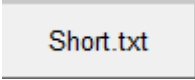

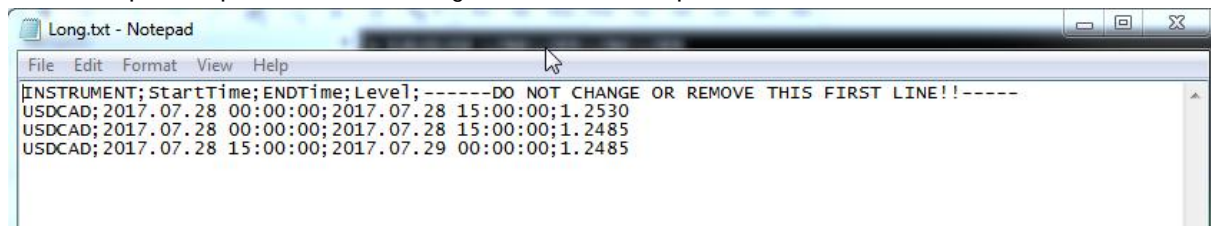

- The EA is now functional but we still have to set the levels and RedNews items (In the screenshot above this is already done...)

## How to set and activate Levels and RedNews-items

### Set Long/Short levels

- Click on the button:  or  for setting your levels
- Now Notepad is opened with the Long.txt or Short.txt input-file

NOTE: It is important NOT to remove the first line!!

The file must contain the following structure:

INSTRUMENT;StartTime;ENDTime;Level

USDCAD;2017.07.28 00:00:00;2017.07.28 15:00:00;1.2530

It is important that the above line is in this structure including the ";" "." And even spaces!

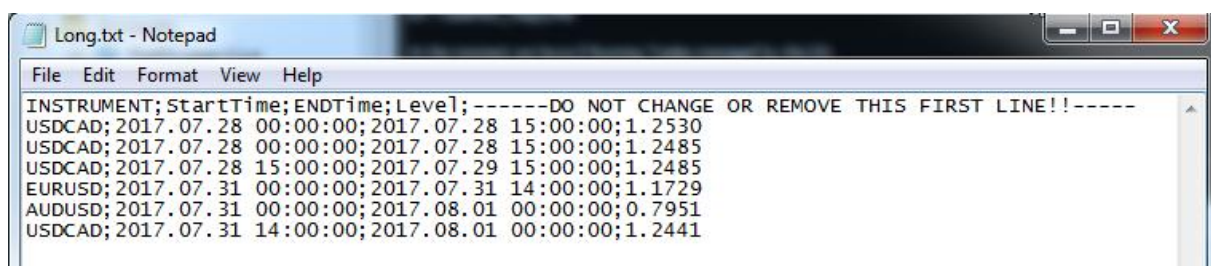

Also NO whitelines at the end of the file!

In This EA we can use 5 different Instruments:

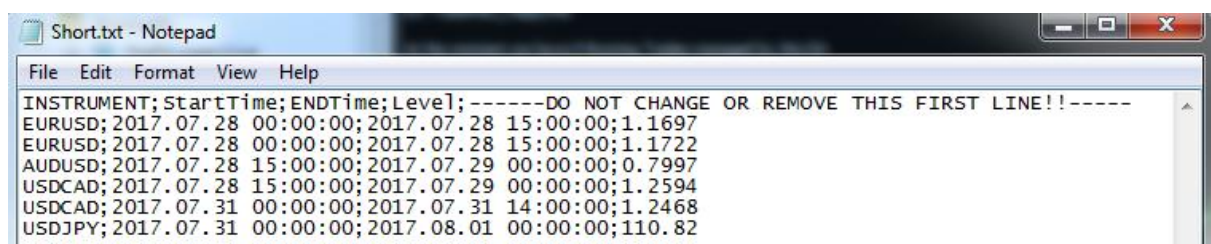

- ☐ EURUSD
- ☐ AUDUSD
- ☐ GBPUSD
- ☐ USDCAD
- ☐ USDJPY

Any other Instrument would give an error and the levels are not accepted by the EA!

As example see below. I added here in the Long.txt file the wanted levels for the date: Monday 2017.07.31

We also need to add the Short-levels (see for an example below)

A rectangular button with a black border and a light gray background, containing the text "INIT EA" in blue capital letters.

For activate the new levels click the button

OR

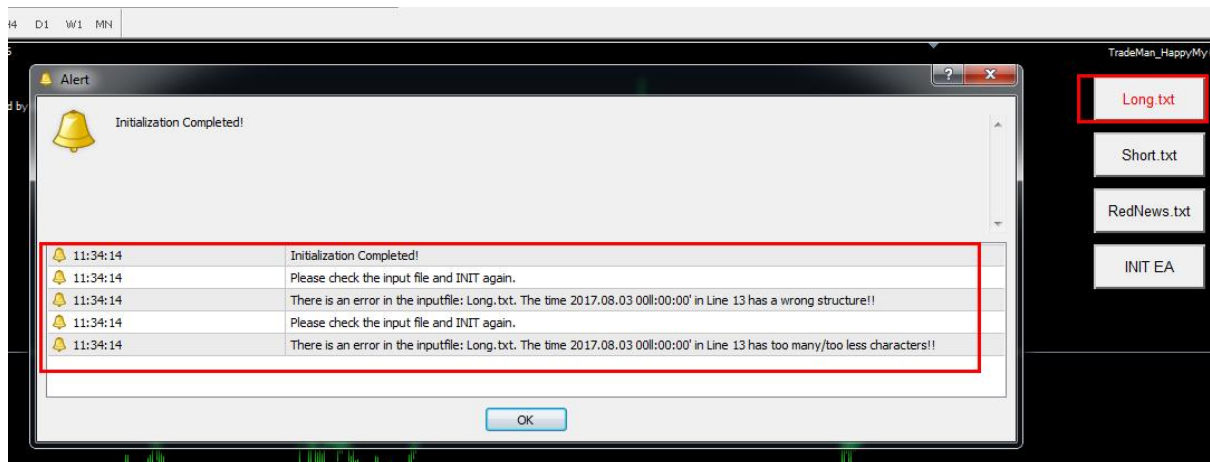

wait until a new hourly-bar is starting (the EA will read the long.txt and short.txt every hour ones!

You now see the following on the chart. This is the current active result of the given Long and Short levels!

```
▼ EURUSD,M30 1.17849 1.17935 1.17843 1.17925
EA TradeMan_HappyMe
At the moment we have 0 Running Trades managed by this EA
RedNewsFilter: ON
Debugging : ON
Account Balance: EUR 772.31
Calculated Lots for EURUSD: 0.38
Calculated Lots for AUDUSD: 0.38
Calculated Lots for GBPUSD: 0.38
Calculated Lots for USDCAD: 0.47
Calculated Lots for USDJPY: 0.42
EURUSD trading: ON
AUDUSD trading: ON
GBPUSD trading: ON
USDCAD trading: ON
USDJPY trading: ON
Next RedNews Event EURUSD: NA
Next RedNews Event AUDUSD: NA

USDJPY
Shortlevel1= 110.82000 : MONITORING...
TimeCurrent (server): 2017.07.31 18:42
```

- The EA is now functional but we still have to set the levels and RedNews items (if the RedNews filter is set to ON!)

NOTE: We added some logic for checking the input files. If there we found some errors you get an Alert and the button text is turned red. Be aware that we did not check every possible error you can type!!

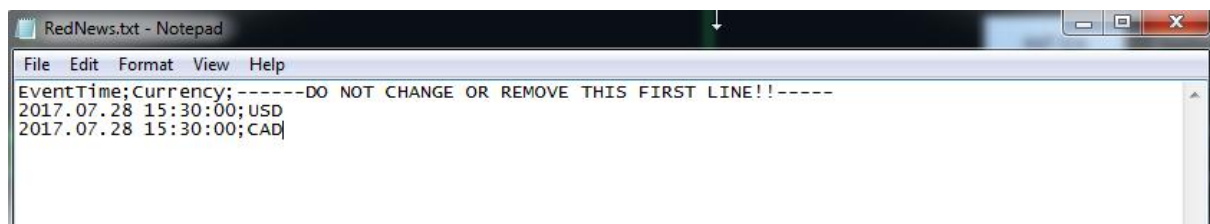

## Set RedNews filter

RedNews.txt

- Click on the button:  for setting the RedNews events

Now Notepad is opened with the RedNews.txt input-file

NOTE: It is important NOT to remove the first line!!

The file must contain the following structure:

EventTime;Currency

2017.08.01 10:55:00;EUR

It is important that the above line is in this structure including the ";", ".", and even spaces!

Also NO whitelines at the end of the file!

In This EA we can use 6 different Valuta:

☐ EUR

☐ AUD

☐ GBP

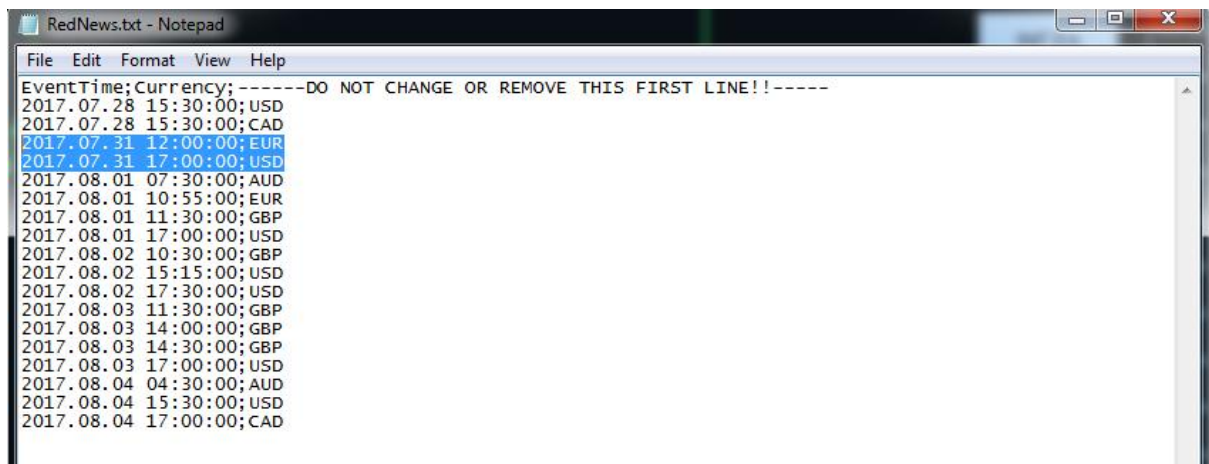

☐ CAD

☐ JPY

☐ USD

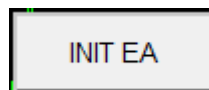

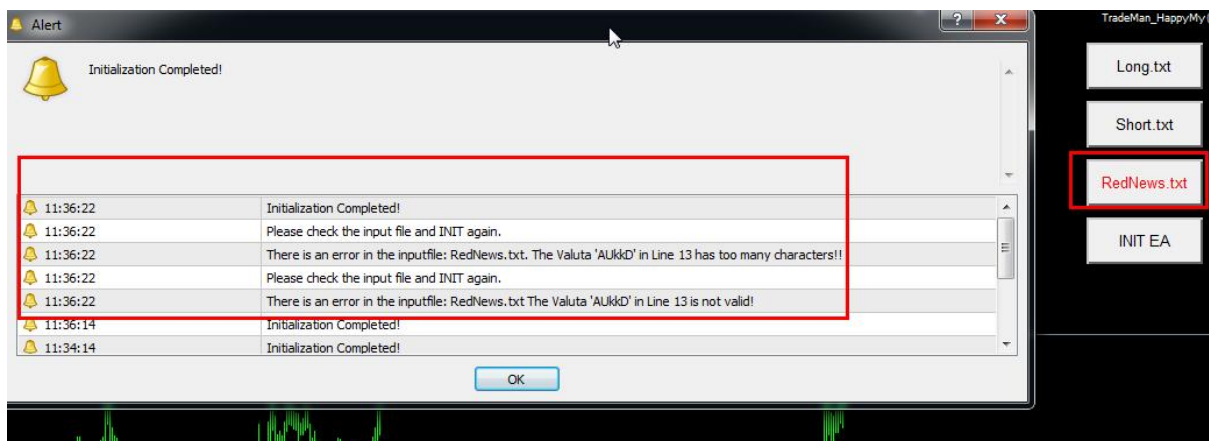

Any other Instrument would give an error and the RedNews Evenst are not accepted by the EA!

As example see below. I added here in the RedNews.txt file the wanted RedNews Events:

```
EventTime;Currency;-----DO NOT CHANGE OR REMOVE THIS FIRST LINE!!-----
2017.07.28 15:30:00;USD
2017.07.28 15:30:00;CAD
2017.07.31 12:00:00;EUR
2017.07.31 17:00:00;USD
2017.08.01 07:30:00;AUD
2017.08.01 10:55:00;EUR
2017.08.01 11:30:00;GBP
2017.08.01 17:00:00;USD
2017.08.02 10:30:00;GBP
2017.08.02 15:15:00;USD
2017.08.02 17:30:00;USD
2017.08.03 11:30:00;GBP
2017.08.03 14:00:00;GBP
2017.08.03 14:30:00;GBP
2017.08.03 17:00:00;USD
2017.08.04 04:30:00;AUD
2017.08.04 15:30:00;USD
2017.08.04 17:00:00;CAD
```

NOTE: We added some logic for checking the input files. If there we found some errors you get an Alert and the button text is turned red. Be aware that we did not check every possible error you can type!!

For activate the new levels click the button

OR

wait until a new day-bar is starting (the EA will automatically read the RedNews.txt every start of the day ones!

You now see the following on the chart. This is the current active result of the given Long and Short levels!

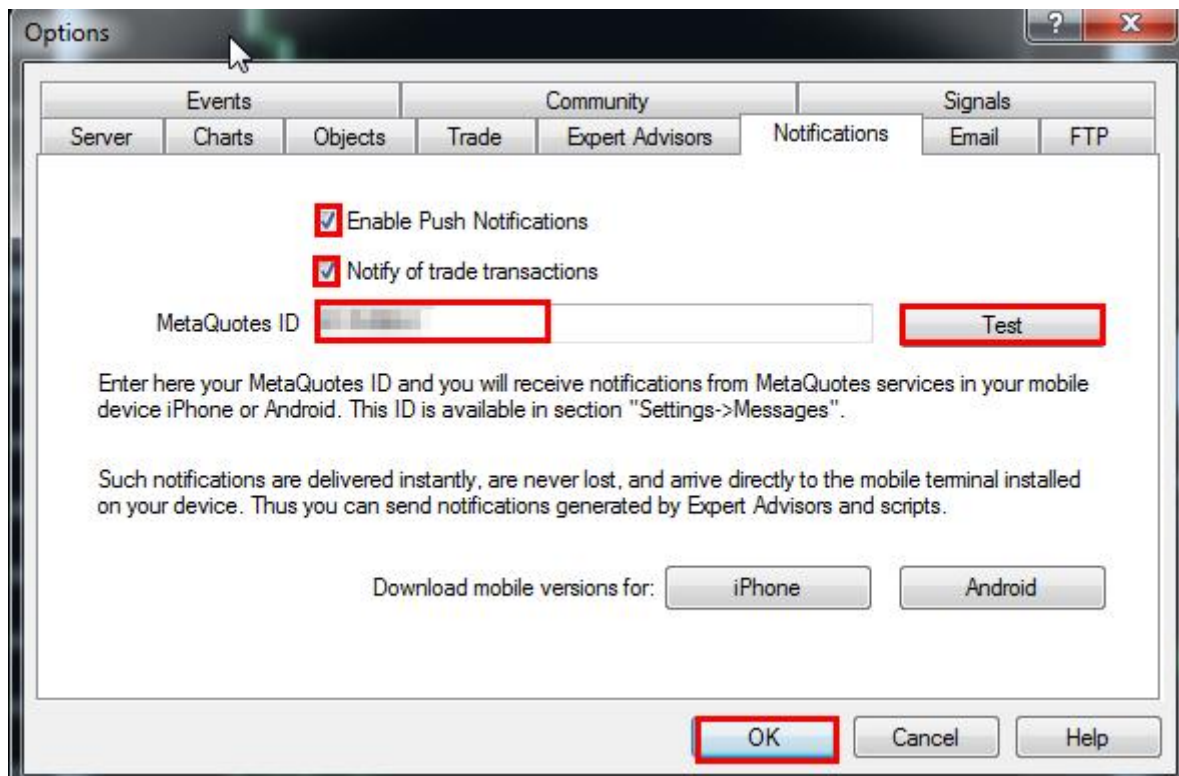

```
Next RedNews Event EURUSD: 2017.08.07 18:30
Next RedNews Event AUDUSD: 2017.08.07 18:30
Next RedNews Event GBPUSD: 2017.08.07 18:30
Next RedNews Event USDCAD: 2017.08.07 17:00
Next RedNews Event USDJPY: 2017.08.07 18:30
```

Now your EA is ready to trade!

## How to configure Push Notification towards Mobile Phone

In Metatrader go to "Options" => Notifications

Select: "Enable Push Notifications" and "Notify of trade transactions"

Add your MetaQuotes ID from your Mobile MT4 install (under: Settings => Messages : Metaquotes ID)

You can Test you configuration (you get a test message on your Mobile Phone)

Click OK

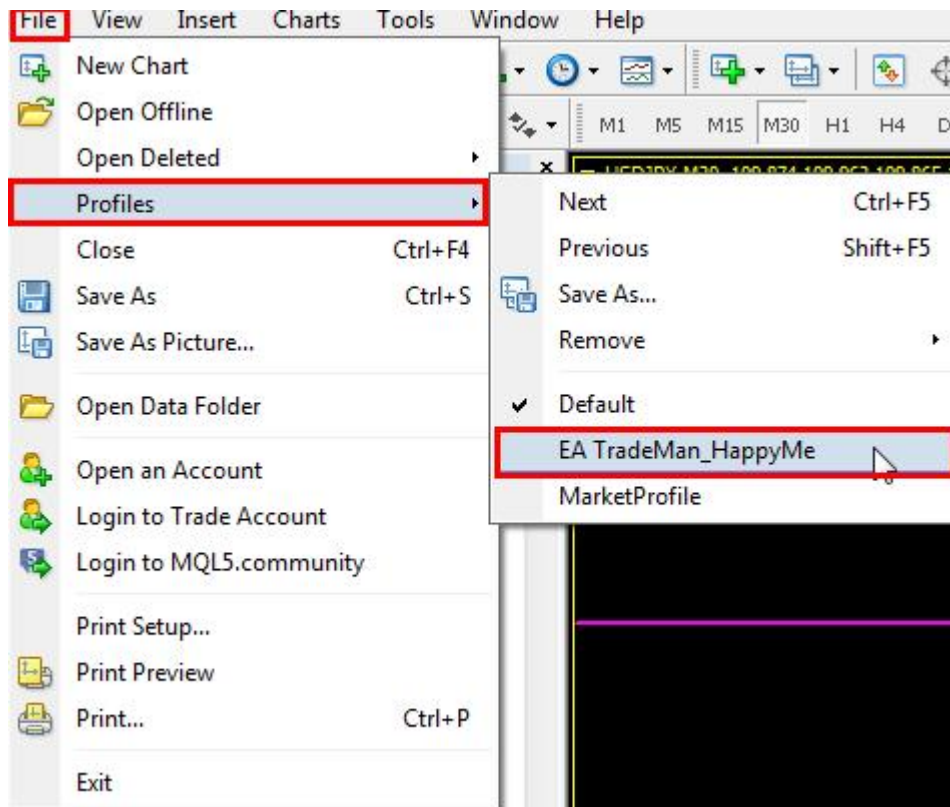

Note:

- Enable Push Notifications: Enable/disable the Push Notification
- Notify of trade transactions:
  - If not selected: you only get the messages from the EA (test level and tested level)
  - If selected: you get the messages from the EA (test level and tested level) and start trade, modify trade and close trade

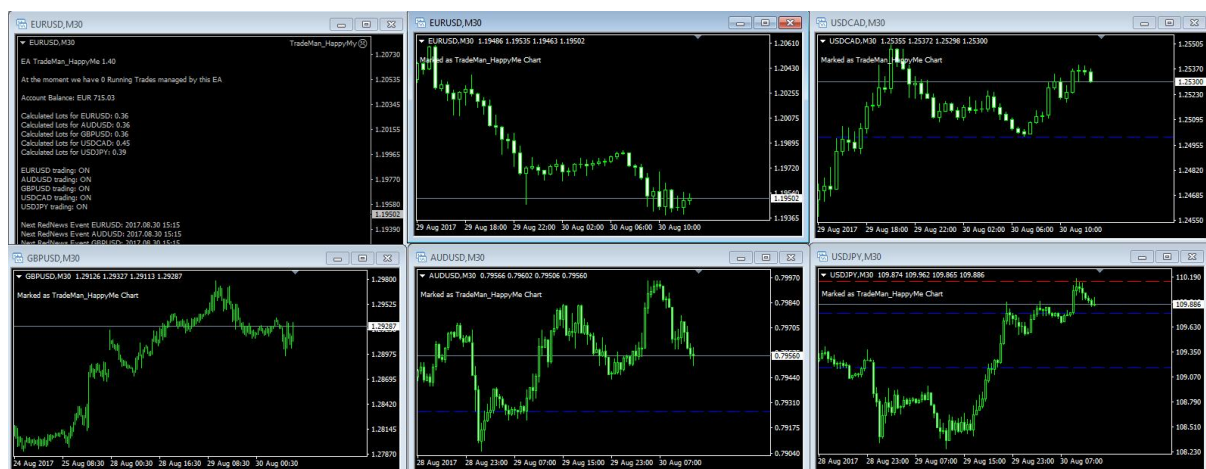

## How to selected the pre-defined profile

After the installation go to profiles and select the profile "EA TradeMan\_HappyMe"

After the selection the different charts with EA and indicator will open as shown below (without the levels and rednews moments)

The only thing you need to do is activate the Auto Trading Mode and you need to add the long and short levels eventually you also need to add the rednews moments.
