

# SEPARATE SYSTEM

Done by Raymond Chin,

I call this system is separate system because when a two EMA is separate to a points and the price will follow the trend until the support and resistance area!!

SETTING: EMA 10 AND EMA 26

TIMEFRAME: 5 MINUTES

TAKE PROFIT:20PIPS IN ASSIAN SESSION AND 30 PIPS IN EU TO US SESSION  
or the nearest support / resistance area.

STOPP LOSS:40 PIPS

BUY :

- 1.)When 10EMA crosses the 26EMA upwards and the EMA difference is 8 pips or greater.
- 2.)SEE the candle cross the 26EMA
  - i.)If it is a big candle shot down, WAIT the signal candle finished made up  
----- if the candle is a retrace candle(it means the price is retrace) >>>> ENTER AT THE OPENING PRICE OF COMFIRMATION CANDLE!!  
----- if the signal candle not a retrace candle , you can WAIT the comfirmation candle finished made up and make sure the price is retrace or if the price is retrace at least 5pips >>>>> ENTER AT THE OPENING PRICE AFTER THE CMFIRMATION CANDLE or STRAIGHT ENTER AT RETRACE PRICE!!
  - ii.)If it is a normal candle bar ,WAIT the signal candle finished made up  
-----Condition 1: you need to wait the comfirmation candle is finished made up and if the OPENING PRICE of the signal candle and OPENING PRICE of the comfirmation candle are less or same with 10 pips>>>>>STRAIGHT ENTER AT THE OPENING PRICE OF THE COMFIRMATION CANDLES!!!  
-----Condition 2: you need to wait the comfirmation candle is finished made up and if the OPENING PRICE of the signal candle and OPENING PRICE of the comfirmation candle are more than with 10 pips>>>>>WAIT comfirmation candles made up and it must a retrace candle (at least 5pips or more, retrace more is much better) >>>>>ENTER AT THE RETRACE PRICE  
**additional note:**If the comfirmation candle not retrace wait the candle after it and it must retrace before you can enter a trade!!!
  - iii.) If the signal candle is retrace candle >>>>> STRAIGHT ENTER AT THE OPENING PRICE AFTER IT!!!
  - iv.) If the signal candle is opening price is exactly at EMA 10 price you can enter straight !!!!
  - v.) Sometimes you can enter a trade just after the signal bar but measure the signal bar is small (normally not more than 20 pips) this happen when the trend is strong

**SELL:** When the 10EMA crosses the 26EMA downwards and the EMA difference is 8 pips or greater.

**IS OPPOSITE TO THE BUY TRADE**

**CLOSE EARLY:** when the 5 candles after you enter a trade is straight shooting to 26 EMA YOU CAN STOP AT 15 TO 20 PIPS. If within the 5 candles the price is already go up /down over the recent high just left it, **DON'T DO ANYTHING.**

**FALSE TRADE:**

- 1.)DON'T TRADE when the price is less than 28 pips to the weekly pivot .
- 2.)DON'T TRADE TWICE IN A ROW!!
- 3.)DON'T TRADE AFTER THE CROSS IS LESS THAN 2 HOURS!!
- 4.) Do not trade when the signal bar is come out was hammer or inverted hammer or SB AND CM is show harami pattern!!

Above graft show do not take a trade that less than 28 pips to the weekly pivot(gray area) AND it was a buy signal here!!

It was my most recent trade !!

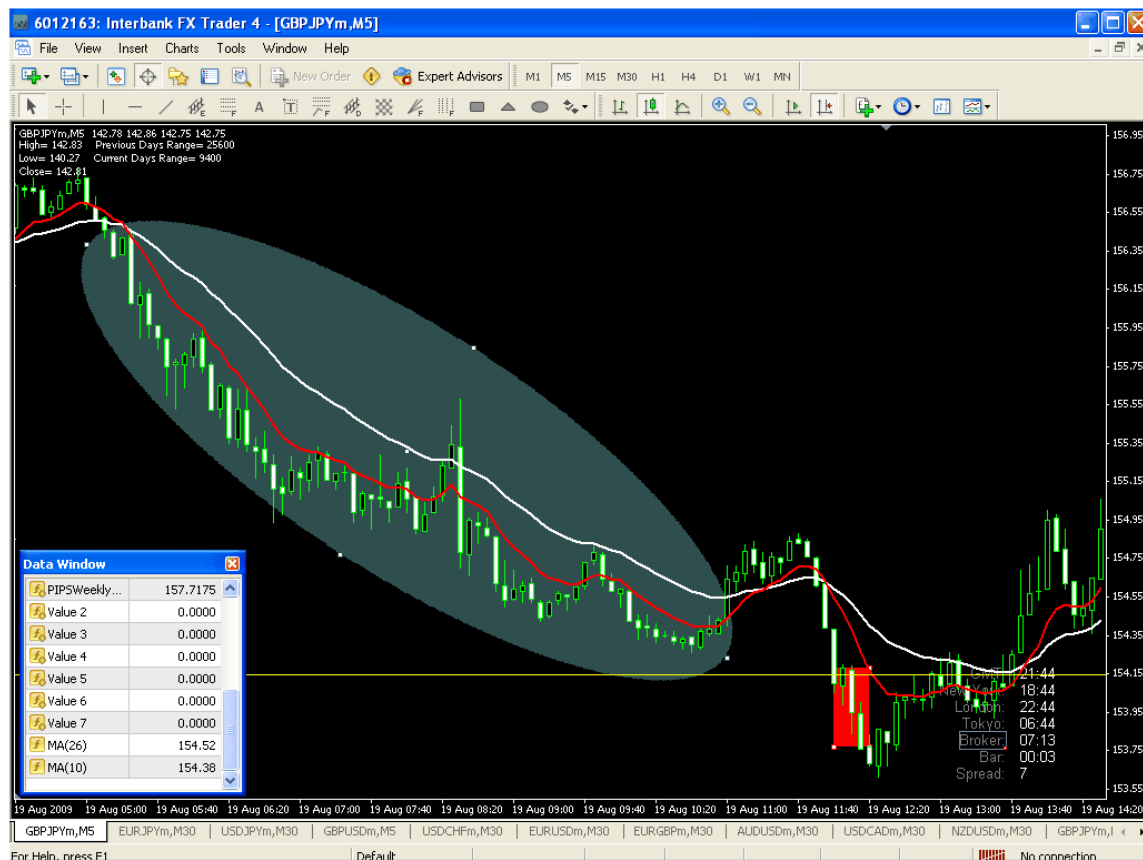

It was a hammer pattern so not valid sell signal it can come out before the signal bar or after signal bar!! More risk you can take the opposite signal that is a buy!!

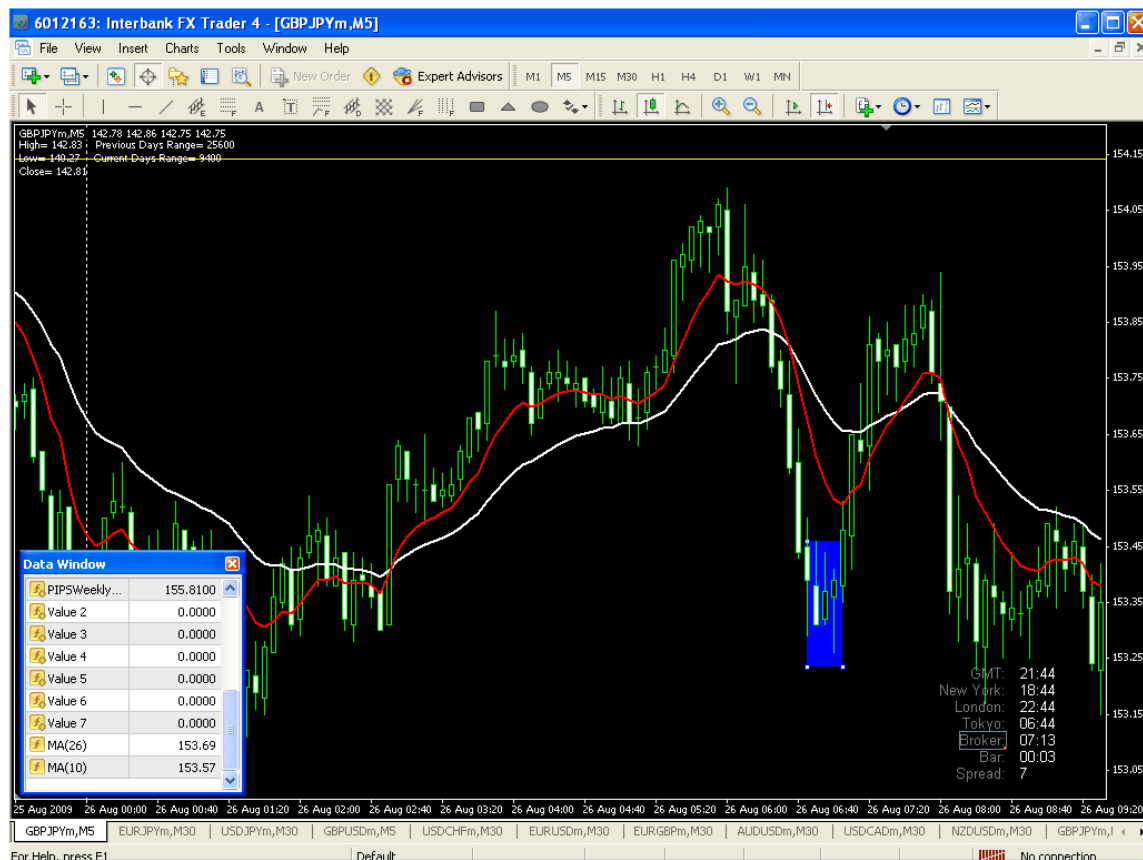

When the price is shooting up after you enter a sell trade you can close it early or just left it .Sometime it will hit the target BUT most of the time it won't hit the target!!

You saw this or not after you enter a trade ,within 5 bar the price show a strong down bar to EMA 10 .AS I say above you need to close it early in order to minimize the loss!!

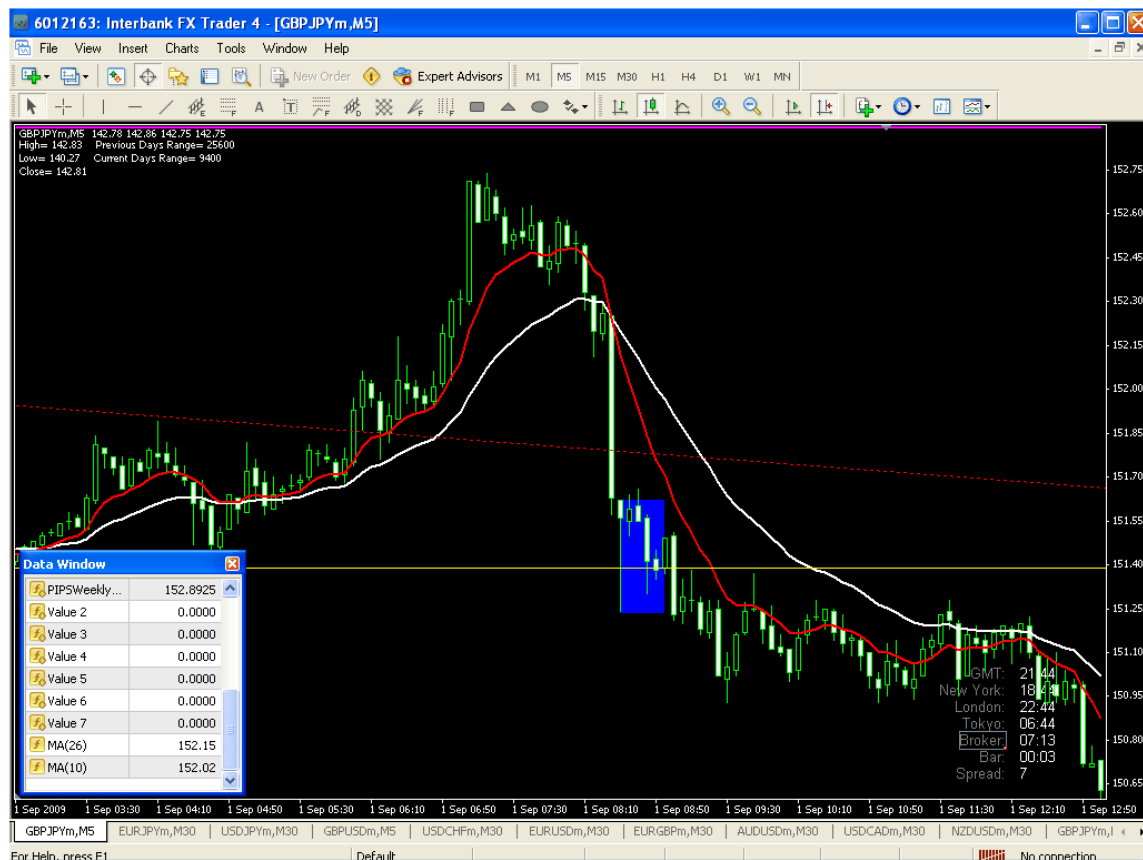

This show us do not trade in a row twice !!unless the price is stall for 1 to 2 hours!!  
The price just stall for few minutes do not trade!!

The signal bar is not a hammer but it come out after the signal NOT A VALID SIGNAL  
Also it look like harrami pattern !!

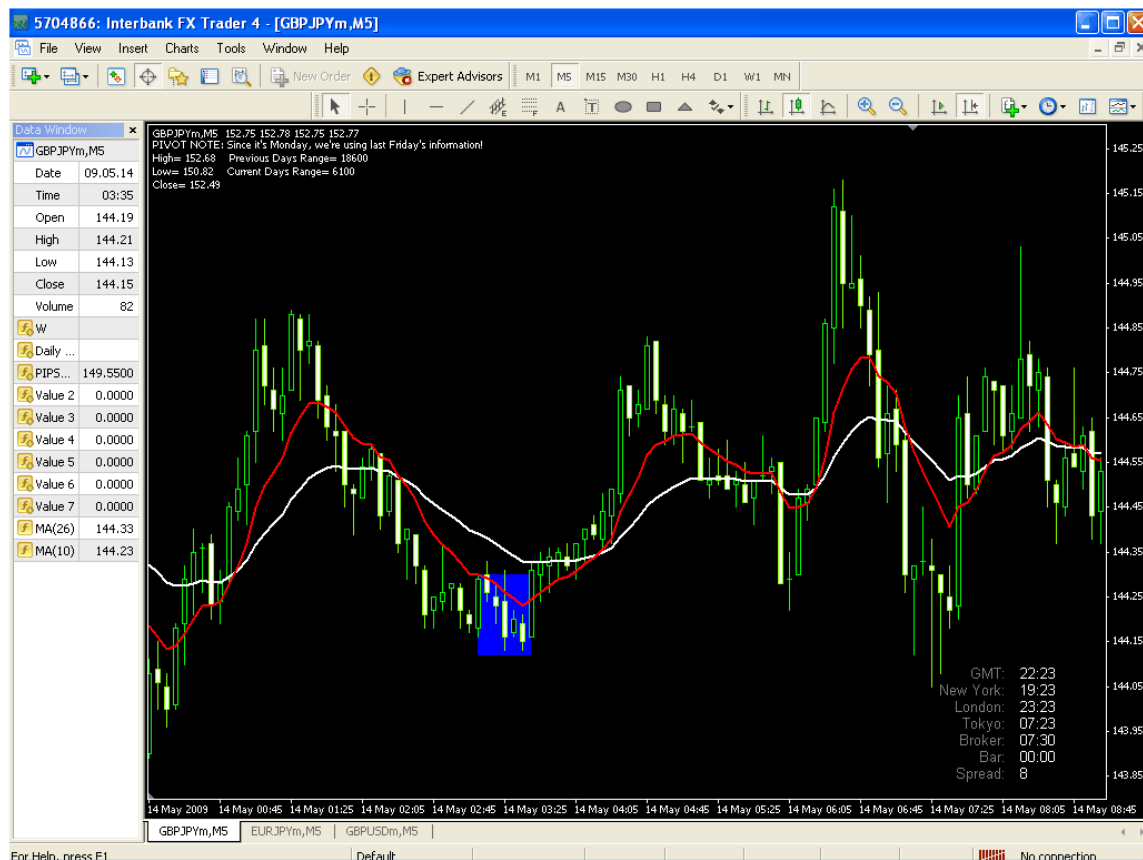

It show a big candle just cross over !!

Near weekly pivot not valid!!

Do not trade after just less than 2 hours cross!!not valid!!

Another good trade here is 60 pips !!

I can provide many graft to show you this system is at average 85% to 92% winning trade!!In may I got 42 out of 46 trade so 91% winning trade(only trade assian and EU session)
