** Past performance posted by Signal and Systems Providers ("Providers"), is not necessarily indicative of future results. No representation is made that any account is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. There are numerous other factors related to markets in general or to the implementation of any specific trading program that cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual trading results. There is no guarantee that one applying these methodologies would have the same results as the hypothetically posted. Since trading successfully depends on many elements including but not limited to a trading methodology and a trader's own psychology, the web site does not make any representation whatsoever that the above mentioned trading systems might be or are suitable or that they would be profitable for you. Please realize the risk with any investment and consult investment professionals before proceeding. The trading systems herein described have been developed for sophisticated traders who fully understand the nature and the scope of the risks that are associated with trading. Should you decide to trade any or all of these systems' signals, it is your decision.

One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk. Variables such as the ability to adhere to a particular trading program in spite of trading losses as well as maintaining adequate liquidity are material points which can adversely affect actual real trading results.
