Steady or Danger Pairs

- NZDUSD only 89 Pips Uptrend and Downtrend
- USDJPY in historic minimum value
- GBPJPY fluctuating between WR1 – WR2 and Weekly Pivot
- CHFJPY low rate for breaking only 73 Pips over trends (up and down)
- NZDJPY Highly toxic – highly volatile
- USDCHF Trades upon one or two week(s) ahead
- GBPCHE running between WR2 resistance and Up trend line, be careful
- NZDCHF wait for market direction confirmation, address arguments over WR1 or strong up trend below Weekly Pivot line
- USDCAD only entrance signals over pivot and trend line wait almost one or two week(s)
- GBPCAD S-H-S beginning check M30, I do NOT recommend
- NZDCAD Overbuying pair waiting signals
- EURGBP Near to S-H-S but riding over up trend line

Steady or Danger Pairs

- GBPAUD nothing for buy or sell
- EURNZD nothing on the table
