

[2010.10.27. 22:20:48] B -FX: Bobi/Lynn, so now that the close is situated above close_50% (light silver area) we're expecting move upwards

[2010.10.27. 22:23:55] Bobi Abonacci - FX: Badria: NO as far as up resistance and $(UP_50\% + UP_Resis)/2$ is not broken , it can be a bearish . But it is a sign that weakness is happening

[2010.10.27. 22:24:49] Lynnette Friar-FX: for scalping purposes then, if I put in the close of a swing low I should know that the trend will continue until close 100%? am I on the right track?

[2010.10.27. 22:25:21] Bobi Abonacci - FX: Lynn:yea

[2010.10.27. 22:26:37] Bobi Abonacci - FX: Lynn: a better way is to enter down_50% into the close the you will get

[2010.10.27. 22:26:56] Bobi Abonacci - FX: but you should care about other parts of the system too

[2010.10.27. 22:27:08] Bobi Abonacci - FX: for daily position taking

[2010.10.28. 9:42:03] Lynnette Friar-FX: badrias right though kdx bobi said with the last calculator that if the breakouts were not in normal order then it was a sign it was going that way

[2010.10.28. 10:16:10] Lynnette Friar-FX: for the swinging breakouts that is, if you're going to use the recalc for the other figures then you put in high and low of the day so far and the close of the candle you want to know about

[2010.10.28. 10:50:35] Bobi Abonacci - FX: 1-Daily pivot +mixed was situated in the bullish area

[2010.10.28. 10:50:48] Bobi Abonacci - FX: very very very important factor

[2010.10.28. 10:51:51] Bobi Abonacci - FX: 2-trend identifier was situated in the bullish area . 2 pips higher

[2010.10.28. 10:52:21] Bobi Abonacci - FX: 3- Mixed-pivot was higher than trend identifier

[2010.10.28. 10:53:07] Bobi Abonacci - FX: and the last one before the close , price met once higher level than close_100%

[2010.10.28. 11:05:12] Bobi Abonacci - FX: ok.

I recalculated exactly befor London open > High,Low,Close of new day before UK open

[2010.10.28. 11:05:54] KDX - FX: why did u recalculate before london open?

[2010.10.28. 11:09:45] Bobi Abonacci - FX: I did because of 2 reasons

1-last night many bearish signals were ignored by traders

2-before opening any session

3- it was exactly near the resistance .

[2010.10.28. 11:10:03] Bobi Abonacci - FX: another technic is to put High_100 to the close and find a resistance or 50%

[14:45:42] Bobi Abonacci: yea . But I forgot to say the last level is 7 pips and also the Highest level is also 7 pips

[14:46:29] KDX: sorry i dont understand what u mean last level 7 pips?

[14:46:51] Bobi Abonacci: I mean Down_0% and UP_100%

[14:47:08] KDX: right so for these u wait 7 pips?

[14:47:18] Bobi Abonacci: yes
