Originally Posted by **prof8t** [▶](#)

Ok... it looks like you used the buffers associated with the open and close of a candle (buffers 3 & 4). When programming HA candles, you will want to use the buffers associated with the high and low of the candles. Examining both the data window and the code, the high and low buffers look like buffers 1 and 2.

So... for a green HA candle buffer 2 needs to be greater than buffer 1, and vice versa for a red HA candle.

can you change it in the code and repost it....i get what your saying but like i said i dont code lol and dont know jack about it really i did get a HA that had an alert and thats what the used for a new candle so i thought it would work also

Yes Shi channel is repainting but just ask Dred what's his opinion on repainting indicators lol

BTW it's up 5 pips for now and looking good.

He was saying there was a possible sell but it is against the trend so it would not be a good trade...your long is with the trend...PIPS PIPS PIPS!! 

I LOVE REPAINTING INDICATORS!!!!!!

EDIT: SOrry I didn't look at H1 you're right looks like it might reverse and drop. I did exit with 10 pips though 😊

H1 is not a valid sell yet due to the candle is not closed...you were right to buy....the trend in my eyes is up on gbpusd higher highs higher lows....

FA?

Heres some FA for you guys lol

In December employers took 1,483 mass layoff actions involving 137,992 workers. Layoff events decreased to its lowest level since April 2008. Annual totals for 2010 events and initial claims declined from record levels reported in 2009.

Pls.. enlighten me on these issues. 1.Apart from confirming trend on the 1hr tf,Do you also consider the nature of candle on the hr tf when m15 gives a signal? 2.I have observed instances where price fails at FP level and the signalling candle will also have in its immediate front another FP level. My question is, shall we wait till another candle closes after the second FP level before pulling trigger.

Meanwhile thank you for the strategy. It is a cracked ATM machine.

Rgds.

Your over THINKING! i can not state that enough!! Just follow the rules....and go with the trend.....pulling the trigger is up to you! the are no fully set RULES in trading since the market changes day to day...if you dont think its a good setup.....DONT TAKE IT but if it does go in your favor then you know next time STOP THINKING and START TRADING!

If all the rules are MET PULL THE TRIGGER!!

Dredding, don't want to bore you with the same questions. Please just help me with this some more, because I'm missing trades.

What is your process when you start trading?? Do you first sit in determine directions you are going to trade in, and how do you personally do it that works for you, and how do you personally determine when to swing in another direction?

Because some mornings I look at the heiken candles colors of the H1, H4 and D1 and when it is red I go short for the day and green Long for the day, and then I miss big moves in opposite...

The moves you missed where they with or against the trend? If YOU ARE NOT HAPPY WITH 5 PIPS YOU WILL NOT BE HAPPY WITH 10 PIPS! Dont worry about the trades you didnt take

because you missed it...just TRADE WITH THE TREND!

It doesnt matter how i start my days..Every person needs to find what they need or like to do before they start trading!!..like i said i use FA & TA and i do my homeworks when i FIRST START!

Dredding82

Freebie Alert Indicators!

2 Attachment(s)

Here are 2 indicator that do the same thing one is just a histo and one is arrows...I will only attach the ex4 file till i hear back from the coder and he tells me it is ok to release the source code.

This inidicator well tell you when Stoch and Heiken Ashi confirm together...Its still in testing but more testing the faster we can see if it works...

Please any comments or feed back do it in PM so we can try and keep the thread as clean as possible. Hopefully this will help the people that are too lazy to check stoch and HA...lol

****UPDATED the indicators to include a filter******

You can set the histo on Onclose & Filter to False for a heads up and leave the signal arrow to true for the confirmed on close

Thanks

Originally Posted by **Checkz** 
Trading the Usd/Chf with the trend and have made 40 something pips so far. My question is how long do you guys wait before you set your stop to break even for a 100 pip or more run?

There is NO SET RULE....That is were watching the charts day after day pays off! Once it breaks other S&R (makes a new low or high) move SL to break even.....even if it reverses it was a FREE TRADE!! 😊 What is even smarter is trading 2% of your account and once a 1:1 or 1:2 TP is reached closed 1/2 of your lots....THEN IF IT REVERSES YOU STILL MADED PROFIT ON A FREE TRADE!! If it keeps going you just added alot of money! Cut the losers and roll with the winners!! 😊

Dredd - could that have been avoided or is this one of those losses? Is it because of big news expected today?

Note how level 3 shifted (the 'repaint' thingy) BIG time to S1 pivot below.

Hourly trend is up ans so is H4, M15's Fib S1 seem to be holding.

Trade well, fun demental

What did the M15 & H1 do? Did it make a HIGHER LOW before that "breakout"?  then ask yourself that these.....How did the GBP PMI come out.....DUH.....How did the Euro Retail Sales m/m come out? DUH....lol

So GBP PMI came out....What happened? GbpUsd Jumped up 🤖....What happens to EurUsd? 🤖 What HAPPENED TO EurGBP? 🤖. How did the Eur report come out? -NEG (BAD) so why would EurUsd or EurGbp go up?

You have to TRUST WHAT YOU SEE NOT GUESS! AS I KEEP SAYING!!! You have can USE FA to be a good trader or TA to be a good trader but if you want to be a GREAT TRADER..YOU HAVE TO USE FA & TA together!!....YOU HAVE TO do your homework on a release that is due to COME OUT!

Dredding82

Feb 3, 2011 1:28pm

Quote:

Originally Posted by **prof8t** [▶](#)

Dredding is right. There was enough info out there on those reports that pointed towards a rise in the GBP. I temporarily abandoned the system before the GBP PMI report and went long GBP/USD for a cool 50 pips thanks to FA. Watch the FA, and research, research, research...

Yuppers! but you still could have confirmed your FA with TA, if you look on the M15 GbpUsd you will see a signal that happened at about 3 hours before the report came out....and if you watched the pair right before the release....what happened? JUMPED in a flash cause every FA trader knew it was going to be a good out come and all the TA guys seen it also...then you had the limit order punks that had orders for a buy at the 1.6203 area(M1-H1 TOPS) and sells at the 1.6271 area(D1 TOP) Trading is easy once you cut out all the thinking/guessing/questioning and just trade lol

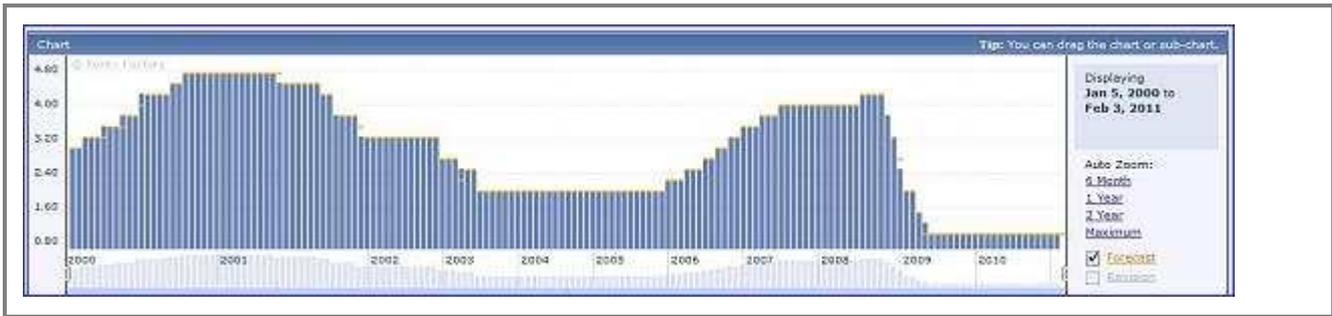

To bet the other traders....YOU HAVE TO KNOW HOW THEY TRADE....

Dredding82

Dredd, you talk about seeing things on the broader spectrum, which is great and cannot be underestimated. Would like to see more of your broader sense trading in combination with your presented system.

*keepipin
 fun demental*

WHAT ARE YOU TALKING ABOUT! the report for GBP came out and GBP jumped up when it jumped up EUR shot down! how is that hours later? only reason Eur went up before GBP PMI is

because of the Eur better then forecast PMI....But GBP PMI > Eur PMI in gains.....what is hard about that? lol

What is the currency other pairs are based off of? USD!!

Dredding82

Feb 3, 2011 2:25pm

As you can see on the M15 it made a LOWER LOW....THEN A LOWER HIGH!! HA confirmed!! On the H1 it made a HIGH THEN a LOW....Followed by a LOWER HIGH!.....HA CONFIRMED!!

I can not make it more CLEAR or SIMPLE THEN THAT....if you dont understand.....its time to just give up trading! lol

This is what I meant obviously. Bad ECB and good UC will strengthen the move to the down side on EU.

USD PMI and Factory orders are probably in the same tones.

Dredd, It's not that I don't like your system or anything. I find it to be one of the best published on FF. I think that in such a day of massive critical news it's best not to trade unless you are extremely proficient and experienced. Actually most [u]system...

My system will CONFIRM any thingyou just have to know how to read it! We are not picking tops and bottoms....we are just confirming that it was a POSSIBLE TOP OR BOTTOM...then you enter and COUNT THE PIPS!

GUYS!!!!!!!!!!!!!!  Please stop all the BS posts asking about indicators, PM the person(s) that you have seen it on there chart and ask them there!

If you would look thru the thread or use the search on the TOP RIGHT CORNER..... that question has been answered a number of times "multi candle color indicator".....Please lets keep this thread CLEAN of BS questions about "whats that indicator", "Where can i find that indicator" ,"Can someone give me that indicator"...etc.....lets keep it about trading a system.... PLEASE PLEASE PLEASE! 

The only reason i started this thread was to share a very easy and simple system that people could really trade....Right now i havent even gotten to the questions from people that wanted to learn to trade it proper because I HAVE to read thru the BS! 

Thanks guys

Hi Dredding, I seem to still get a lot of the trades wrong. I feel like a bit of an ass for getting a simple system like yours wrong, so I'm just going to ask a lot of questions, because it's probable just something small that I'm doing wrong.

I include a trade I took long on the AUDUSD m15. Price backed down onto the R2 and backed upwards again. stochastic crossed upwards and heiken ashi turned green. Trend is upwards.

Can you spot anything I'm doing wrong Dredding.

YEA.....ITS NFP FRIDAY!! you cant use a regular SL!! lol Right before NFP and US unemployment rate comes out the CAD unemployment comes up which makes the market go the reverse of what its going to when US reports come out.....well not always but most times....to trade NFP...when you see a huge spike up SELL SELL SELL
if it is a HUGE spike down BUY BUY BUY...its pretty easy just go with smaller lots and dont worry about a SL till after that M15 candle closes!

Dredding82

There are 80 odd pages and 1200 posts and although I have read entire threads with larger posts, an OP usually doesn't subject a person wishing to take a look at their system with a curt response to read the entire thread to find files that would normally be available on the first few posts.

But you know, this is your thread and you run it as you see fit. I can always look elsewhere.

Happy trading

OK....doesnt hurt me....I do things for a reason only because i want people to MAKE money! Everyone else understands why i do this and it helps them from what i can see since 95% of the questions have not been asked again well unless its a lazy person... ..but since you dont want to read a thread you really dont need to use the system...

Dredding82

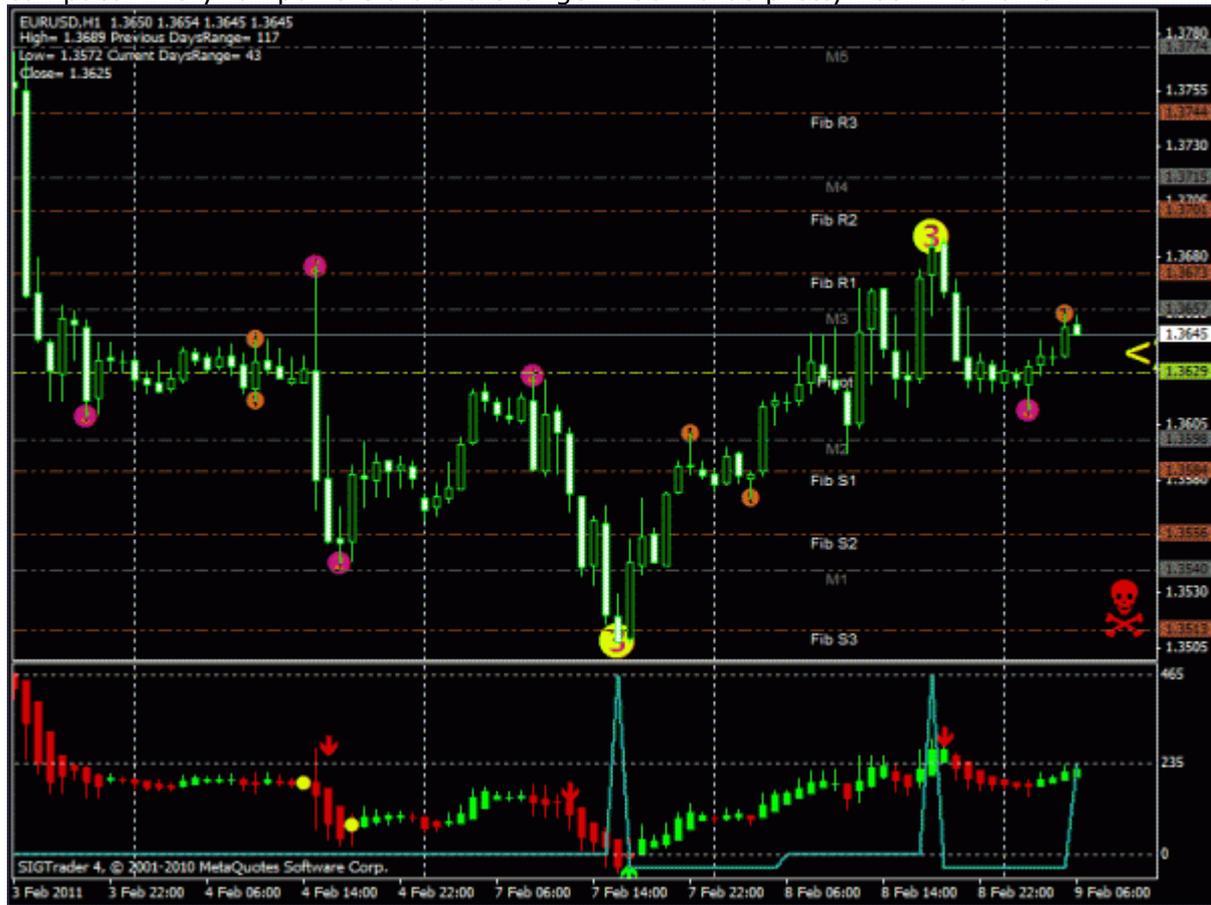

Feb 9, 2011 5:36am

PLEASE OH PLEASE!!!

2 Attachment(s)

Ok alot of memebers keep saying how do you know the trend..why is the trend up...or why is it down...Anyways i hope i am almost down with a custom indicator, Its taken me awhile since i do not code but i sure am good at copying and pasting codes together! lol Here is a snap shot....Im still testing to see if i have any repaint problems and such so dont go blowing up my thread cause im TRYING SOMETHING and dont know if it will work yet, looks good on past data but we all know thats CRAP! so gotta watch the live data as it comes in...Dont know what i will call it...was thinking "Trend Friend" LMAO 🤖📈

P.S. Its the blue line not any of the other stuff just stuck it in the subwindow to make it more compact! Every full point is a trend change....Gonna be pretty kool if it works!!

Dredding82

Feb 9, 2011 6:52am

🤔 Everyone has the indicators and tpl....Now everyone is making money there is no one loves me! LMAO 🤖

so_what

Feb 9, 2011 7:03am

LOVE? i guess there is no place for it in the FOREX market...

nice to see that you still improve your system (or is is just for us newbies 😊)

i dont have received your indis and tpl. but i tried to collect em here somehow 😊

what is your daily pip target anyway? do you use trailing SL?i know greed is bad... 😊
Have you favorite pairs?

i would like to see more charts about good and bad examples.... not only from dredd 😊

thx

Dredding82

Feb 11, 2011 1:19pm

ALMOST DONE!

1 Attachment(s)

Ok guys sorry havent been around had to trade this week and been working on the Pivot indicators....i have it adjusted so that you can see the past days and there lines....I know you guys hate "repainting" even though i LOVE IT SO! 🙌 lol ALL THE PIVOT LINES ARE THE SAME.....Not some other indicator.....

Here is a pic and i also found a trend indicator that makes it CLEAR which way you should trade! Trying to cut all the BS questions and make it dummy proof...still have to test the trend indicator to see if it updates in real time.....but you can see it looks good for today!! The trend indicator is in the TOP RIGHT CORNER! just incase someone asks! 🙌 lol

If anyone has seen or used the "trend" indicator in the corner of my screen let me know....dont want to waste my time having it on my charts if someone knows it doesnt work, I didnt code it....PLEASE let me know lol

Dredding82

Feb 11, 2011 1:44pm

OH yea the pivot lines should work on sundays now also lol...not sure since i never have that problem....and dont know if you have to auto refresh it yet either...Hope not....lol. Guess someone that had that problem would have to test it and see about the sunday candle, You can also add any 4 pairs you want to the "trend" indicator i just have those on this PC so thats the ones you see

Dredding82

Feb 11, 2011 5:54pm

Quote:

Originally Posted by **prof8t** 

Think the best thing to do is monitor this trend indy for awhile. Currently seems accurate across many pairs. Maybe I'm missing something. Or maybe I just need to go to bed... Have a good weekend all...

Well you have to remember you were only looking at the M15 & H1...the indicators uses the H1 & H4 for true trend not spikes in the market....so instead of 15-30 pips you can grab 30-100 pips if you trade with the trend....If not a crap load more pips

Dredding82

Feb 11, 2011 5:57pm

Think i got the pivots DONE!

1 Attachment(s)

Ok...thought i had it done righ the first time...NOW im sure but i left out the labels....they pissed me off anyway lol

NOW I CAN SHOW OFF THE "BACKTESTS" everyone is so dying to see🤪.....Now i want you to ask yourself this question...How many SIGNALS do other systems give? And I WANT YOU TO COUNT THE PIPS you could have made....ADD THE LOSERS.....\$\$\$\$\$\$\$\$ Seeing it yet HATERS!!! lol

NOW COMPOUND THAT MOFO!! \$\$\$\$\$\$\$\$\$!!!!!!! Trading is easy like i said when you FORGET THE BS others have told you and just TRADE!🤪

The yellow line could have been a possible trade but i like to take them when everything is close together...And remember thats just 1 PAIR! Think if you traded on a higher TF for MORE PIPS and MORE PAIRS!!🤪

Dredding82

Feb 11, 2011 6:36pm

LIKE GOLD!

1 Attachment(s)

I didnt take all these trades cause i am not greedy! But now since i can post what would have been good past trades.....HERE THEY ARE..These are so people can see what GOOD trades look like!🤪 The "trend" indicator says gold is UP....so i marked all the longs! Add the losers....

Dredding82

Feb 11, 2011 6:46pm

FOREX SUCKS!

1 Attachment(s)

Well not really...but just to prove you can TRADE STOCKS! With my system!! The "trend" indicator is sideways now which means NO TRADE! But im about 95% sure it was a UP ARROW BEFORE YESTERDAY! Gotta get your money and get out in stock....or the big boys eat you alive day trading! lol 🤔

The pic is of Walmart(WMT)

Dredding82

Feb 11, 2011 6:48pm

Can i get a cookie and a cold BEER NOW! lol 🍪 OH YEA forgot got to wait for the haters to come back with there load of crap! lol then i get my cookie and beer! LOL 🍪🍺

But i know im going to catch a load...since i USE A REPAINTING INDIACTOR! Even though its 4 simple rules! and 3 of the 4 DONT REPAINT! 🤔 Which are the TRIGGERS.....lol

Dredding82

Feb 11, 2011 7:12pm

Any "Coders" want to make an EA....Dont know if it can be coded...but it works by hand and someone once told me if you can "paper trade" it you can make a robot out of it! lol 🤖

Dredding82

Feb 11, 2011 7:56pm

Everyone IS RICH!

WOW i know people get tired of a thread and all but most i clicked on a few SN's and they havent posted in anyones thread or anything.....SO WHERE DID ALL MY FREEBIE NUTS GO!! I wanna be on the beach TOO!! LOL

Guys/Gals....If you still get these emails come back....let people know its still working....Let people know ITS EASY! A thread starter can say anything about making trades and

PROFIT...what really matters is other memebers showing the system is WORKING!

Oh yea....If your using my system or like the system...VOTE!! I want my poll rate to be atleast 90% for my system! And would love to get me a 5 star rating for the thread!!! Then i might share other systems i use along with my FA....👍

Well next time you start thinking go to your bathroom and stick your head in the toilet! lol wash that crap outta your head! HAHHAHA lol

I know what your doing....your not to sure of the trend or you guess your wrong because you ALWAYS ARE.....WELL STOP! Follow the rules! Set your SL and a TP...atleast 1:1 but i would set it to 1:4 and then just watch the trade.....once it gets to a 1:1-1:2 lock in the profit either its going to make profit now or its going to be a FREE TRADE! stop adjusting your SL and TP!!! If trend is the prob throw a MA or Psar some kind of trend indicator....on a higher TF and just trade what ever way its heading.....EASY MAN EASY! If you think the SL is TOO BIG....WRONG! Thats why you can adjust the lot size! At the start of the day you write down numbers 5-50 or how ever much you want and you take your balance and find if my SL=50 what would my lot size be to =1% or whateva of your account, Same as if your SL was 5 pips.....what lot size would 5 pips=1%.....EVERY TRADE CAN BE TAKEN!!!!

That is were risk management comes into PLAY! lol you just have to make sure you can win more times then you lose! Which if you ever flipped a coin or bet on a football game...ITS THE SAME THING! just this time you have a few tricks(indicators or system) to help you WIN WIN WIN!

But first you have to go to the bathroom!!! and watch all the BS out! lol

but stopped a while ago lol but I know that you have been trying to figure out a way for newbies who are struggling with the overall trend and everything to easily know which direction to be trading in...I know you came up with the idea and applied that trend indicator but I want you to check this out...I don't want to post it in here as I dont want to confuse anybody or start...

Ok i have sent you a PM....Thanks for not just throwing it up here

Dredding82

Feb 12, 2011 10:10pm

SENT!

Ok i have just sent out the indicators and templates....If you Pmed me and didnt get an email....PM me again for some reason it seems i do not get every PM people send!

If you PMed me and asked for my HA subwindow indicator,Pivot indicator(new) or anything like that....I DO NOT PASS OUT MY PERSONAL INDICATORS! lol, Sorry! Im sure if you search hard enough you will find something close to them some where on a forum....Crap i have seen my system on like 12 different forums already....and its only been like a month since i posted it on HERE!

Made a mistake in the email use the templates as follows:

Freebie Newbie Daily= M15-H1
Freebie Newbie Weekly= H1- H4
Freebie Newbie Monthly= H4-D1

speaking of higher time frames...again I was playing around with your system today dredding and I'm noticing that if you take a trade signal off lets say the 4 hour time frame and than go down to the 15 minute...the people having trouble with the trend can also use that for the trade direction on smaller time frames....and that way I guess you can use smaller stops as appropriate for traders money management..

Thats what i have been telling people since i started the thread....i guess people are just getting it now though lol

Price Action with Indicators! The Freebie System

Hello:

HRU? my name is Josh and I just joined this forum and I found it absolutely helpful. I have been reading your threads and I must tell you I am quite impressed with the Price Action with Indicators. I also have been using the zigzag system, but not the way you are using it. I must admit yours is far superior, but I could not find where to download your full system. Please can you help me with where or how I can download your system. I truly appreciate the fact that you gave this away for free, and I will appreciate your helping me in getting the full downloads.

Thank you so much in advance and God bless.)

Thanks for sending your indicators to me. However, I can't get them into my system. Can you reformat them to mq4. Thanks I would really appreciate it.

Or can someone else reformat the system and indicators into mq4.

Thanks

snarlyjack

DO NOT CHANGE THE FILE NAME when you save, Just save the files to the indicators folder under experts....save the tpl files to the template folder in the main folder....close your platform and reopen...You do not need the mq4 files, If you are asking for them its because you want to SELL THEM! and need to change the file names!

Thanks for the template and indicators Dred.

I usually trade Daily timeframes due to work.

Anyone using this system for daily trades. If so, any good? Which template and how to set up the indicators.

Thanks in advance,

If you trade the D1 use the Freebie Newbie Monthly template..Everything is setup already just attach it to your charts...MY SYSTEM WORKS ON ANY TIME FRAME!
I dont know why you people can not read and keep asking the same questions over and over again!

hey first day trading the "dredding way" took 2 on demo, just wanted to know if they were by the rules. both gu, one at 1445 and one at 1700. both failed at m2, took profit on both at the pivot

Post your pics....i use 2 different brokers both with different timezone....so post a pic and put a line where you took the trades.....If i cant see what you see then how the heck do i know what your really talking about? Ever been on the phone with tech support for sumthing? You tell them sumthing and they have no clue what your talking about or what the heck there talking about! lol Well i do know what im talking about but i think you get my point lol

I dont know what TF....what fibs settingsetc.....that you have on your charts or what 1445/1700 is on your brokers platform

If your talking about these 2 trades....the first one i guess 1445 your time...Every rule was there but THE TREND! for the second one you pulled the trigger TOO EARLY! stoch was not crossed up and it was against the TREND!

YES!!!! i know you made profit on it, but what im trying to get people to understand is if you go with the trend you dont just get 20 pips....you GET HUNDREDS OF PIPS!! and its the same amount of work..You just have to sit there drinking coffee and wait.....wait some more.....wait.....oh this might be it.....NOPES....waiting.....waiti ng....4 hours later....DING DING DING!!!! WINNER WINNER...lol then you pull the trigger and your SL to your TP....most times is atleast 1:4 risk/reward if not bigger

Dredding82

I am not too familiar with trading on bigger TF. (H4, D1...) Too "boring" for me. But since I am still stuck with a 9-5 (or 9-9 from time to time) I am thinking to have a look at bigger TF now.

Any tips or well-meant advices for someone who lacks patience every now and then? LOL.

Thanks. Great community, by the way.

Trade the D1....you can trade like 15 pairs and it only takes 15 mins a daythen check on them every day at the close of the day...and see if a TP or SL was hit and look for new positions....Like i told everyone i make my bill money trading the higher TFs i only day trade cause thats my "fun money" and it makes me feel like i have a job...Trading gets boring and lonely when you dont have a boss😞 And i hate waiting also... lol i have ADD or ADHD🙄

This is the rules...

1) ZigZag(zz indicator) is the heads up

2) Fails at a Fib pivot

>-----If you like price action then you dont need the last 2 but for newbies i would use them

3) Candle Green(buy) Red(sell)

4) Stoch crossed Up(buy) Down(sell)

Always wait for the Candle to closeIf trading on H4 change fib pivots "Myperiod" to 10080 and so on, im sure you guys can figure this part out.

Those are the 4 steps....SL at last low TP 1:1-1:4 risk/reward or use S&R lines (other fib...

I dont have a PM from you....Seems FF is not sending all the PMs or letting me know of new posts!  I wonder WHY.....lol

So what do you guys think of this trading setup? Think it will make it easy enough that a monkey could trade? 🤖

The "Buy/Sell Zones" DO NOT move till the end of the day....you just wait for price to hit that level and a pivot in it then place your order, SL would be the next Pivot outside of the "Zones" TP would be the other side of the "Zones"

Might have to let some people test it out...its a new setup 😊 lol....trying to make it so people will stop asking questions! HAHHAHA

PPPPSSSSSSSSSTTTTTT!!!!!!!!!!!! This is how the BIG BOYS TRADE!! lol 🤖 (95% that make it trading)
