# NFIB <br> SMALL BUSINESS <br> ECONOMIC TRENDS 

#### Abstract

NFIB Research Center has collected Small Business Economic Trends Data with Quarterly surveys since 1973 and monthly surveys since 1986. The sample is drawn from the membership files of the National Federation of Independent Business (NFIB). Each was mailed a questionnaire and one reminder. Subscriptions for twelve monthly SBET issues are $\$ 250$. Historical and unadjusted data are available, along with a copy of the questionnaire, from the NFIB Research Center. You may reproduce Small Business Economic Trends items if you cite the publication name and date and note it is a copyright of the NFIB Research Center. © NFIB Research Center. ISBS \#0940791-24-2. Chief Economist William C. Dunkelberg and Executive Director of the NFIB Research Center Holly Wade are responsible for the report.

## OPTIMISM INDEX

The Optimism Index decreased half of a point in September to 90.8. This is the 21st consecutive month below the 49-year average of 98. The last time the Index was at or above the average was December 2021. Of the 10 index components, 5 increased, 4 decreased, and 1 was unchanged. Twenty-three percent of owners reported that inflation was their single most important problem in operating their business, unchanged from last month and tied with labor quality as the top concern. Owners expecting better business conditions over the next six months deteriorated 6 points from August to a net negative 43 percent seasonally adjusted, however, 18 percentage points better than last June's reading of net negative 61. Seasonally adjusted, a net 23 percent plan to raise compensation in the next three months, down 3 points from August. The net percent of owners raising average selling prices increased 2 points to a net 29 percent seasonally adjusted.

## LABOR MARKETS

Forty-three percent (seasonally adjusted) of all owners reported job openings they could not fill in the current period, up 3 points from August. Thirty-seven percent have openings for skilled workers (up 2 points) and 18 percent have openings for unskilled labor (unchanged). The difficulty in filling open positions is particularly acute in the construction, retail, manufacturing, and services sectors. Openings are lowest in the professional services and finance sectors. Owners' plans to fill open positions remain elevated, with a seasonally adjusted net 18 percent planning to create new jobs in the next three months, up 1 point from August and 14 points below its record high reading of 32 percent reached in August 2021. Overall, 61 percent reported hiring or trying to hire in September, down 2 points from August. Fifty-seven percent ( 93 percent of those hiring or trying to hire) of owners reported few or no qualified applicants for the positions they were trying to fill (up 3 points). Thirty percent of owners reported few qualified applicants for their open positions (down 3 points) and 27 percent reported none (up 6 points).

## CAPITAL SPENDING

Fifty-seven percent reported capital outlays in the last six months, up 1 point from August. Of those making expenditures, 41 percent reported spending on new equipment (up 3 points), 22 percent acquired vehicles (down 2 points), and 17 percent improved or expanded facilities (unchanged). Twelve percent spent money on new fixtures and furniture (up 1 point) and 7 percent acquired new buildings or land for expansion (up 3 points). Twenty-four percent plan capital outlays in the next few months, unchanged from August. A more positive view of the future economy and economic policy would help stimulate longer term investment spending, but currently, owners' views about the future are not supportive and financing costs are very high. Investment is needed to address labor supply chain problems which still persist in the current environment.

## SALES AND INVENTORIES

A net negative 8 percent of all owners (seasonally adjusted) reported higher nominal sales in the past three months, up 6 points from August's lowest reading since August 2020. The net percent of owners expecting higher real sales volumes improved 1 point to a net negative 13 percent. The net percent of owners reporting inventory gains improved 4 points to a net negative 3 percent. Not seasonally adjusted, 13 percent reported increases in stocks (up 2 points) and 15 percent reported reductions (down 1 point). A net negative 4 percent of owners viewed current inventory stocks as "too low" in September, up 1 point from August. By industry, shortages are reported most frequently in the transportation (15 percent), construction (9 percent), retail (9 percent), and services ( 8 percent) sectors. A net negative 1 percent of owners plan inventory investment in the coming months, down 1 point from August.

## COMPENSATION AND EARNINGS

Seasonally adjusted, a net 36 percent reported raising compensation, unchanged from August. A seasonally adjusted net 23 percent plan to raise compensation in the next three months, down 3 points from August. Nine percent cited labor costs as their top business problem, up 1 point from August. Twenty-three percent said that labor quality was their top business problem (down 1 point). The frequency of reports of positive profit trends was a net negative 24 percent, up 1 point from August. Among owners reporting lower profits, 29 percent blamed weaker sales, 20 percent blamed the rise in the cost of materials, 15 percent cited labor costs, 8 percent cited lower prices, 7 percent cited the usual seasonal change, and 6 percent cited higher taxes or regulatory costs. For owners reporting higher profits, 55 percent credited sales volumes, 22 percent cited usual seasonal change, and 9 percent cited higher selling prices.

## CREDIT MARKETS

Two percent of owners reported that all their borrowing needs were not satisfied (unchanged). Twenty-three percent reported all credit needs met (down 4 points) and 65 percent said they were not interested in a loan (up 6 points). A net 8 percent reported their last loan was harder to get than in previous attempts (up 4 points). Four percent reported that financing was their top business problem (up 2 points). A net 26 percent of owners reported paying a higher rate on their most recent loan, up 2 points from August. The average rate paid on short maturity loans was 9.8 percent, 0.8 of a percentage point above last month. Thirty-one percent of all owners reported borrowing on a regular basis (up 3 points).

## INFLATION

The net percent of owners raising average selling prices increased 2 points from August to a net 29 percent seasonally adjusted. Twentythree percent of owners reported that inflation was their single most important problem in operating their business, unchanged from last month and tied with labor quality as the top problem. Unadjusted, 13 percent (up 1 point) reported lower average selling prices and 41 percent (up 3 points) reported higher average prices. Price hikes were most frequent in finance ( 75 percent higher, 3 percent lower, as interest rates rise), construction (53 percent higher, 6 percent lower), retail (49 percent higher, 11 percent lower), services ( 33 percent higher, 12 percent lower), and wholesale (33 percent higher, 10 percent lower). Seasonally adjusted, a net 30 percent plan price hikes (unchanged).

## COMMENTARY

The third quarter came in better than expected, likely growing GDP over $2 \%$. Investment in plants and equipment stayed strong, buoyed by subsidies from the Inflation Reduction Act. Consumers managed a decent showing, drawing down their savings and flashing their credit cards. And housing held up in spite of rising mortgage rates. The longanticipated recession (predicted by our traditional leading indicators) has not shown its face yet in the statistics (unemployment remains low). The NFIB Index of Small Business Optimism has been a reliable indicator of recessions since 1973 and it too has signaled a recession for over a year. The economy is skating on thin ice, cracks have appeared, but there has been no significant crash through the ice.

Politics will likely be a major determinant of how this works out. Of \$6.8 trillion in projected federal outlays in fiscal 2024, only \$1.9 trillion is available for reductions sought by those blaming excessive government spending for inflation. The rest is driven by legal obligations such as Social Security, Medicare, Medicaid etc. and interest on the debt of $\$ 750$ billion and rising as the old debt is refinanced. Of the $\$ 1.9$ trillion, about half is defense-a difficult category to cut. The balance of power in Congress is tenuous, making it difficult to implement any new policies while the Administration pushes its agenda forward with executive orders, unimpeded by Congressional oversight.

All of this discord is raining down on the nation's small businesses. Inflation remains the top business problem faced by small business owners. They raised labor compensation at record rates to keep workers and fill open positions which are at record high levels. To manage rising labor, energy, and other costs, they raised prices at record high rates and continue to do so, adding to inflation pressures. But they are investing in their firms at historically low rates, primarily because capital spending is financed from the bottom line, and profits have been squeezed by rising input and labor costs and regulatory compliance. Interest rates on their loans have more than doubled and financing is harder to get now. The Administration has focused its support on big projects involving chips and electric vehicles (with some big failures like the electric bus company) while restricting the use of things like natural gas and passing regulations that allegedly will save energy but that dramatically increase the cost of appliances, cars etc. These regulations have added thousands of dollars in cost for new home construction. The small business sector is the core of our economy, where most of our non-government is sold to consumers. The government must pay more attention to supporting its health and not viewing it as a source of tax revenue and implementers of misdirected policies.

## Small Business Survey Questions

Page in Report
Do you think the next three months will be a good time for small business to expand substantially? Why? ..... 5
About the economy in general, do you think that six months from now general business conditions will be better than they are now, about the same, or worse? ..... 6
Were your net earnings or "income" (after taxes) from your business during the last calendar quarter higher, lower, or about the same as they were for the quarter before? ..... 7
If higher or lower, what is the most important reason? ..... 7
During the last calendar quarter, was your dollar sales volume higher, lower, or about the same as it was for the quarter before? ..... 8
Overall, what do you expect to happen to real volume (number of units) of goods and/or services that you will sell during the next three months? ..... 8
How are your average selling prices compared to three months ago? ..... 9
In the next three months, do you plan to change the average selling prices of your goods and/or services? ..... 9
During the last three months, did the total number of employees in your firm increase, decrease, or stay about the same? ..... 10
If you have filled or attempted to fill any job openings in the past three months, how many qualified applicants were there for the position(s)? ..... 10
Do you have any job openings that you are not able to fill right now? ..... 11
In the next three months, do you expect to increase or decrease the total number of people working for you? ..... 11
Over the past three months, did you change the average employee compensation? ..... 12
Do you plan to change average employee compensation during the next three months? ..... 12
Are...loans easier or harder to get than they were three months ago?13
During the last three months, was your firm able to satisfy its borrowing needs? ..... 14
Do you expect to find it easier or harder to obtain your required financing during the next three months? ..... 14
If you borrow money regularly (at least once every three months) as part of your business activity, how does the rate of interest payable on your most recent loan compare with that paid three months ago? ..... 15
