

- 1) Put 100x125 EAs in expert folders
- 2) Put templates in templates folder
- 3) Put PB autopivots ver. 3.0 in indicators folder.
- 4) Restart MT4
- 5) Do 2 charts on every pair you wish to trade.
 - On one chart put a buy EA and the other Chart a sell EA. You will be trading both directions at all times when the EAs are on.
 - I recommend:
 - CHF/JPY, EUR/CHF, EUR/GBP, EUR/JPY, EUR/USD, GBP/USD, USD/CHF, USD/JPY
 - Pairs it should work on but may need occasional monitoring:
 - GBP/JPY, GBP/CHF, AUD/NZD
 - I DO NOT RECOMMEND TRADING MAJOR PAIRS WITH MINOR PAIRS, EXAMPLE:
 - NZD/USD, USD/CAD, EUR/AUD, ETC. THE REASON IS AT CRITICAL MOMENTS MAJOR CURRENCIES CAN CRUSH MINOR CURRENCIES AND YOU WONT GET THE RETRACEMENTS NEEDED FOR THE SYSTEM TO WORK.
 - Also, NZD and AUD can have sudden spikes into the hundreds of even thousands of pips that ruin the reentry feature
 - Do not keep trades over the weekend if at all possible. That is because Monday gaps are common with currencies and ruins the reentry feature of the EA and can put you hundreds of pips from where you want to be.
 - If you want to trade news stories the EA works fine but you want to be at first level entries on the real big market moving stories like the first Friday of every month.
- 6) Rules of trading:
 - 1) Turn on only the currencies EAs where price is between the two white lines.
 - 2) You will get one buy order and one sell order on each pair you are trading
 - 3) When price moves in any direction it will profit at 100 pips (plus the spread)
 - 4) It will then reenter both directions again.
 - 5) As price moves in one direction it will pocket the profits of the direction.
 - 6) Your balance will grow in the negative as price continues in one direction but it will be offset some by the pocketing of profits.
 - 7) When price retraces some or all of the currencies will pocket the trades that were in the opposite direction. At some point the negative balance will begin reducing and the account balance will continue to grow as profits are taken. When your profits are bigger than your balances you will want to decide to keep it running or close for profit for the day and go party.
 - 8) The EA has a stop loss of 800 pips to protect your account from wipeout if some currency suddenly goes crazy. (you can change this later if you wish)
 - 9) Trade only .01 or .02 cents. Do not trade dimes or dollars you will lose all your money.
 - 10) If you want the EA to make more money after you are comfortable with it, you can add more trading pairs or open a second account. DO NOT INCREASE THE LOTS PAST .02, YOU WILL LOSE ALL YOUR MONEY 😊 (This could change as testing is done but not now)

PHILOSOPHY OF THIS SYSTEM IS POSTED ON FOREX FACTORY.

GOOD LUCK
