# Introduction

Do you remember Elliot wave?

Yes, your are right... let's see how Elliot wave does... it always happens in every time frame

my system is inspired with Elliot wave.. but i make it more simple. And it work and truly profit.

As you can see.. always there are **forward and reverse points**. No matter what time frame.

## How It Works ?

This system is two way open position (OP). Yes, we OP long and short at the same time at the same pair. It's risky ? yes it is... but it can be managed. I will show you...

PAIR GU

Position	Level	LOT	OP	SL	TP
Buy	1	0.1	1.7865	0	1.7885
Buy Limit	2	0.1	1.7845	0	1.7865
Buy Limit	3	0.2	1.7825	0	1.7845
Buy Limit	4	0.4	1.7805	0	1.7825
Buy Limit	5	0.8	1.7785	0	1.7805
Buy Limit	6	1.6	1.7765	0	1.7785
Buy Limit	7	3.2	1.7745	0	1.7765
Buy Limit	8	6.4	1.7725	0	1.7745

Position	Level	LOT	OP	SL	TP
Sell	1	0.1	1.7861	0	1.7841
Sell Limit	2	0.1	1.7881	0	1.7861
Sell Limit	3	0.2	1.7901	0	1.7881
Sell Limit	4	0.4	1.7921	0	1.7901
Sell Limit	5	0.8	1.7941	0	1.7921
Sell Limit	6	1.6	1.7961	0	1.7941
Sell Limit	7	3.2	1.7981	0	1.7961
Sell Limit	8	6.4	1.8001	0	1.7981

As you see... there are each 8 level OP buy and sell that we have..

It's mean there are 8 x 20 pips = 160 pips securing position.  
In manual you don't have to OP all... just when the price near the level then you set the OP.

## Let's Have a Rock

**When below level executed then the TP of previous level must be set to current level.**

ex.

Current Level

Position	Level	LOT	OP	SL	TP
Sell	1	0.1	1.7861	0	1.7961
Sell	2	0.1	1.7881	0	1.7961
Sell	3	0.2	1.7901	0	1.7961
Sell	4	0.4	1.7921	0	1.7961
Sell	5	0.8	1.7941	0	1.7961
Sell	6	1.6	1.7961	0	1.7961
Sell	7	3.2	1.7981	0	1.7961
Sell Limit	8	6.4	1.8001	0	1.7981

when it hit level 7 of sell the TP must be set to the current level it's level 7  
when the level 7 TP is hit are you losing your money ????

**lets we calculate (all in mini account):**

level 1	loss	-100 pips	0,1 lot x -100 pips	= -\$10
level 2	loss	- 80 pips	0,1 lot x -80 pips	= -\$8
level 3	loss	- 60 pips	0,2 lot x -60 pips	= -\$12
level 4	loss	- 40 pips	0.4 lot x -40 pips	= -\$16
level 5	loss	- 20 pips	0,8 lot x -20 pips	= -\$16
level 6	loss	0 pip	1.6 lot x 0 pips	= \$0
level 7	profit	20 pips	3.2 lot x 20 pips	= \$64
				+
				= \$2

as you see... are loss your money ???... no it's give your more dollar.  
now let we see the result of buy position

## Remember

Every Time the TP are hit..... the level must be restart to 1.

ex.

Position	Level	LOT	OP	SL	TP
Buy	1	0.1	1.7865	0	1.7885
Buy	1	0.1	1.7845	0	1.7865
Buy	1	0.1	1.7825	0	1.7845
Buy	1	0.1	1.7805	0	1.7825
Buy	1	0.1	1.7785	0	1.7805
Buy	1	0.1	1.7765	0	1.7785
Buy	1	0.1	1.7745	0	1.7765
Buy Limit	2	0.1	1.7725	0	1.7745

How many we got ?

Buy 1	profit 20 pips	0,1 lot x 20 pips	= \$2
Buy 2	profit 20 pips	0,1 lot x 20 pips	= \$2
Buy 3	profit 20 pips	0,1 lot x 20 pips	= \$2
Buy 4	profit 20 pips	0,1 lot x 20 pips	= \$2
Buy 5	profit 20 pips	0,1 lot x 20 pips	= \$2
Buy 6	profit 20 pips	0,1 lot x 20 pips	= \$2
Buy 7	profit 20 pips	0,1 lot x 20 pips	= \$2
			<u>\$2</u> +
			\$14

So if we calculate the long and short position we have = \$14 + \$2 = \$16  
Which mean we get \$16/0,1 lot = 160 pips just in a day in one pair  
imagine if we trade in 5 major pair we should have **800 pips** in a day.

**Is it great ???**

**No matter your position is.. you still get dollar.**

No let we see the real chart

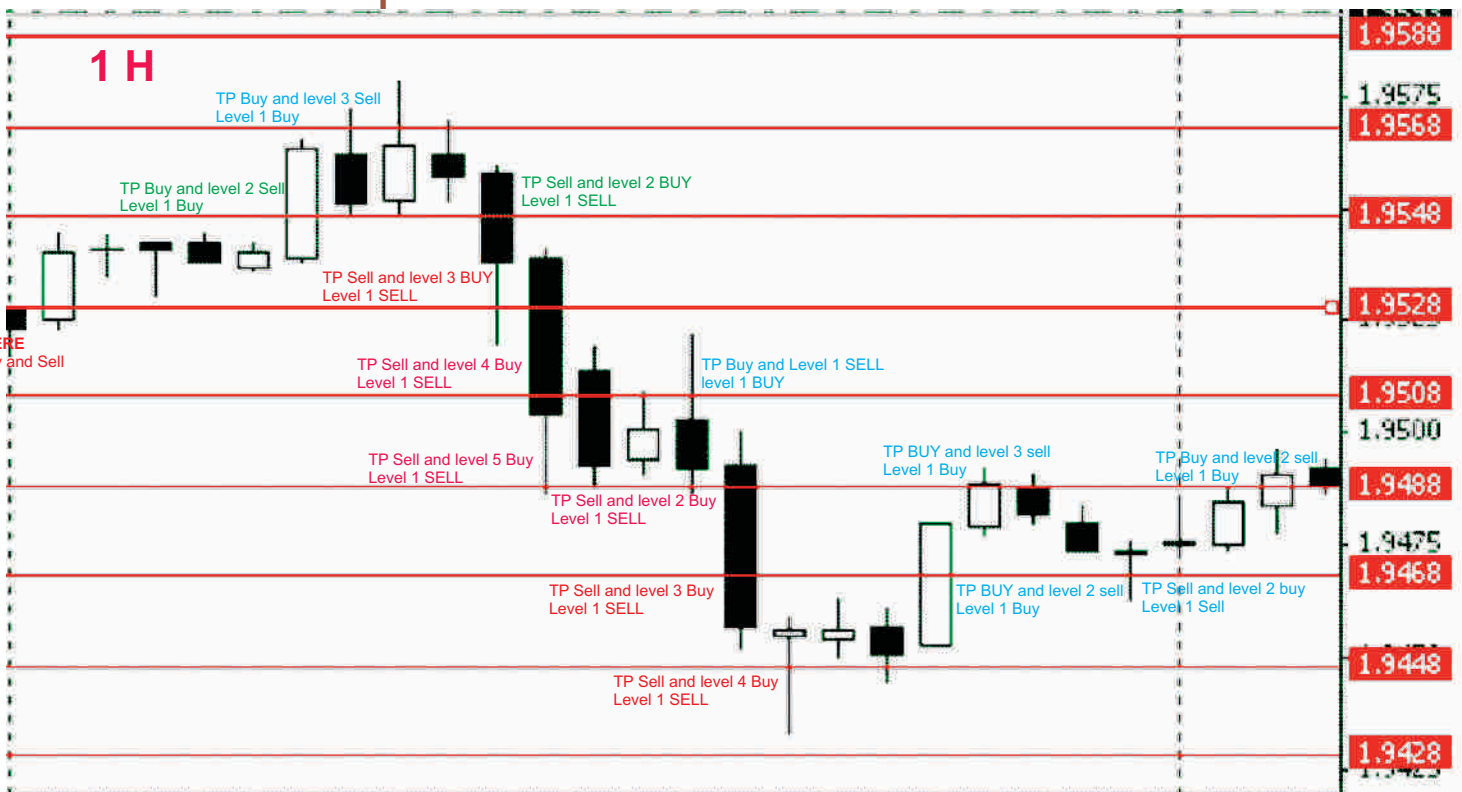

## Here how to read

we get TP of Sell

level 3 Buy executed

TP Sell and level 3 BUY  
Level 1 SELL

level 1 Sell executed

## 1 day chart

In that chart we got 14 TP  
each TP will give you 20 pips  
so we got 280 pips and each TP give you \$2  
and we got \$28

Was that so sweet...

# NEWS NFP

It's really make me so confuse to draw the TP... :)

As chart shown we got **24 times TP !!!!**

**that mean we got 480 pips and \$48**

:)

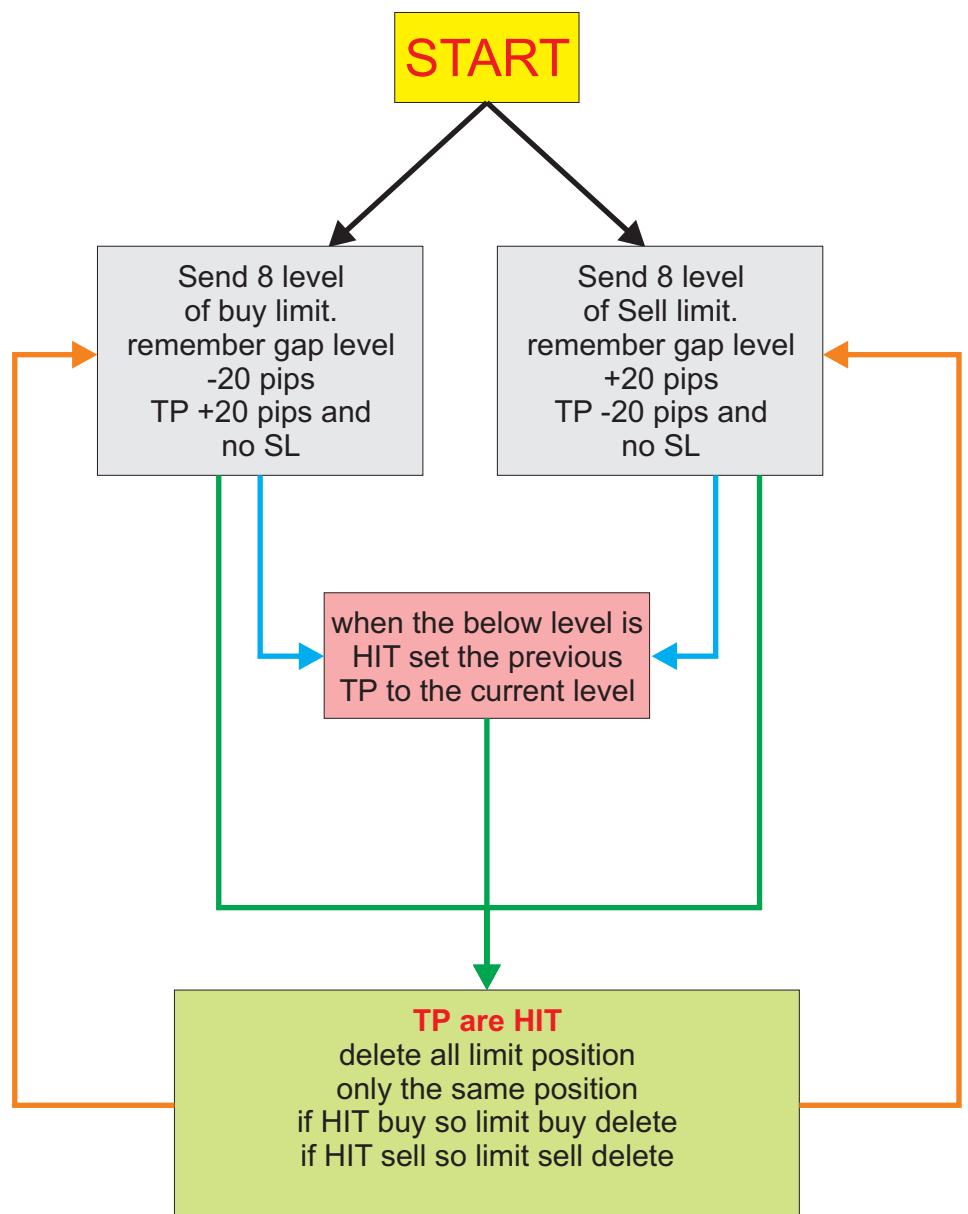

**was that so sweet ... ????**
