

FF Newbies - [Seller9](#) - [Basket Trading EA](#)

This is just the opinion of [PayItForward](#) for new people here looking for a quick answer ...

This helped me tremendously ...

1) Page 1 - that is where the MAGIC starts

2) Watch and understand all Seller9's videos - If you do not understand how it all works, how can you expect to make the right decisions and make money ...

Repeat Step 2)

3) Read these posts - they have all helped me and are truly amazing people ...

a) <http://www.forexfactory.com/Seller9>

b) then the following listed in alphabetical order only not necessarily the order of priority:

blamshakk

<http://www.forexfactory.com/StOoOk>

<http://www.forexfactory.com/TraderJoes>

<http://www.forexfactory.com/tundex> and many, many more ... (no more space) ... :-)

Remember ... Procrastination = Enemy Of Success

Then you may want to start a live account with \$250 - this will keep you focused - perhaps use Seller9's Swing and nett 50 pips across 28 pairs a day, adjusting your lot size accordingly, in 2 years it's well over a \$Million Murysco's Million. (Be astute with account money management.) PLUS use TRND Brk for news announcements as a potential bonus to pips.

Sure you may blow a day here and there, 28 pairs stopped out, do your own calculations ... you will probably never have 28 pairs open and losing money at one time - always have a SL and always look at FF Calendar.

OR

Test and test and test looking for the 100% success rate Holy Grail and in 2 years you will still be testing ...

The choice is yours ...

Thankyou Seller9 and everyone mentioned here and on FF ... the very best of everything to all ...
