## **Risk Disclaimer**

Off-exchange foreign currency trading on margin carries a high level of risk and may not be suitable for all investors. The high degree of leverage can work against you as well as for you.

Before deciding to invest in foreign exchange you should carefully consider your investment objectives, level of experience, and risk appetite. The possibility exists that you could sustain a loss of some or all of your initial investment and, therefore, you should not invest money that you cannot afford to lose.

You should be aware of all the risks associated with off-exchange foreign currency trading and seek advice from an independent financial advisor if you have any doubts.

SIMULATED TRADING PROGRAMS IN GENERAL ARE ALSO SUBJECT TO THE FACT THAT THEY ARE DESIGNED WITH THE BENEFIT OF HINDSIGHT. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFIT OR LOSSES SIMILAR TO THOSE SHOWN

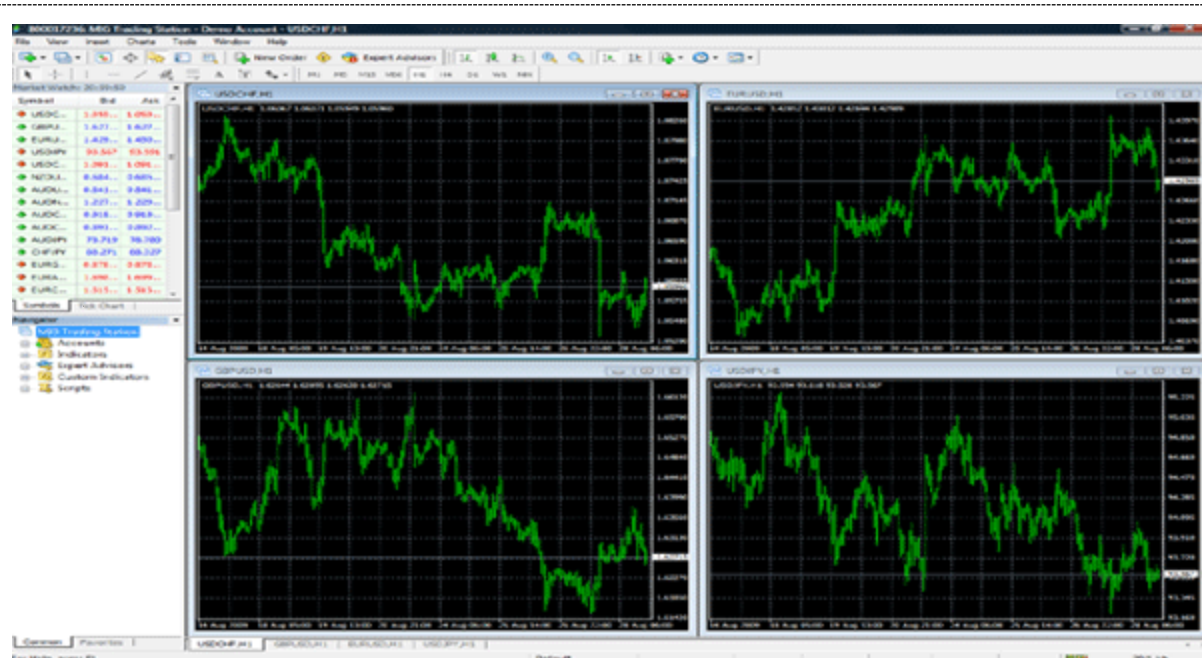

# 1. Install XM MT4

All MT4 indicators, MT4 strategies and MT4 systems have been tested with the XM MT4 platform. For best trading results, please install the XM Metatrader 4 platform. It only takes 5 min of your time.

Just click the banner below to get started with XM MT4.

A promotional banner for XM MT4. The background is black with a repeating pattern of small, light gray bull and bear head silhouettes. The text 'start with' is in white, lowercase, sans-serif font. Below it, '\$30 FREE' is written in large, bold, white, sans-serif font, with a thick red vertical bar to the left of the '\$30'. Underneath, 'no deposit bonus' is in white, lowercase, sans-serif font. Two lines of text with red chevron symbols are below: '> up to 888:1 leverage' and '> support in 22 languages'. At the bottom left is the XM logo (a red bull head silhouette) and the text 'XM' in large white letters, with 'WWW.XM.COM' in smaller white letters below it. At the bottom right is a red rectangular button with the text 'READ MORE' in white, uppercase, sans-serif font. Below the button, in small white text, is 'FX trading involves a high level of risk'.

After installing and running XM Metatrader 4 for the first time, the default screen will look something like the picture below:

If you need any information about Metatrader4, we refer to the help topics, just select the “help” button on the main tool bar and click “topics” or press F1 on your keyboard to access the help topics.

## 2. Installing MT4 Indicators

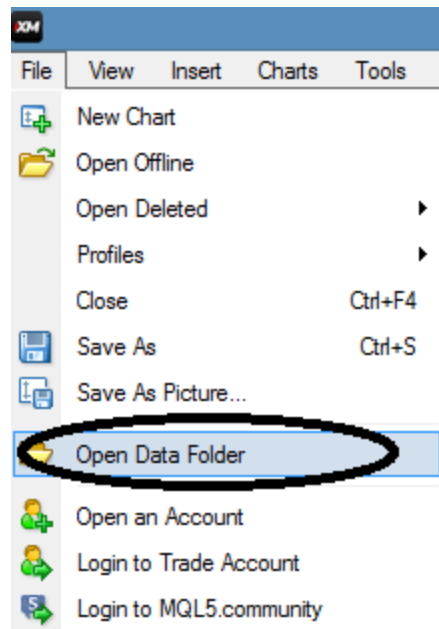

Download the DolphinTraderDL.zip file and unzip the file. The unzipped file contains 3 folders: MT4Indicators, MT5Indicators & MT4Experts.

### How to install the MT4 indicators to the XM Metatrader 4 platform?

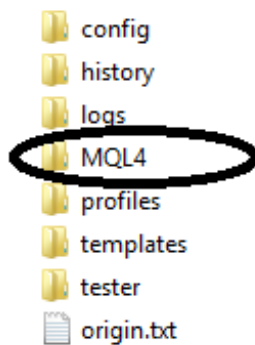

Step 1: Run the XM Metatrader 4 platform.

Step 2: Open the data folder from the main menu

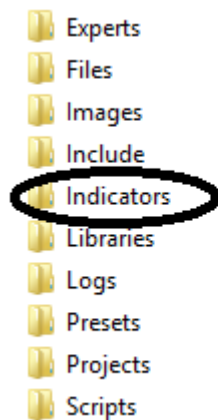

**See picture below**

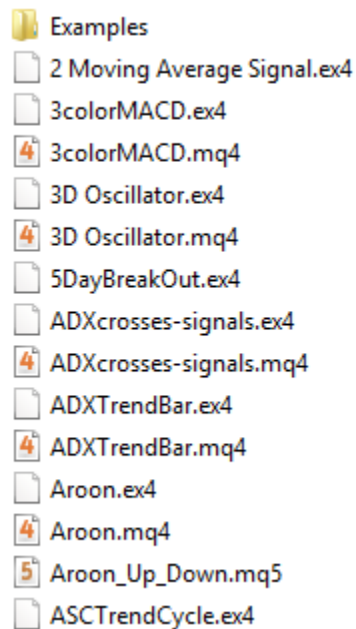

Step 3: Open the MQL4 folder

Step 4: Click the indicators folder inside the MQL4 folder

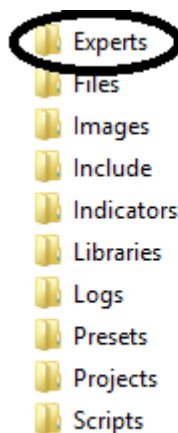

Step 5: Open the indicators folder

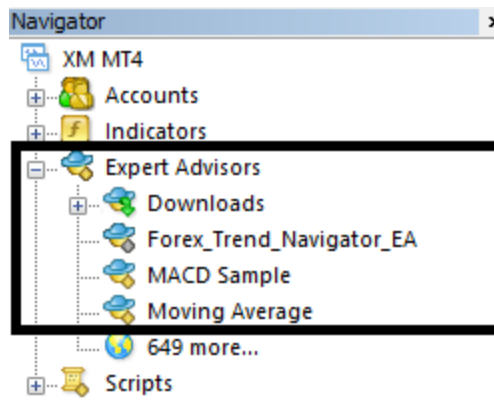

Copy all MT4 indicators from into this folder. Then restart the XM Metatrader 4 platform. You're now ready to start using all indicators!

### 3. Installing MT4 EA

This is very similar to installing MT4 indicators. Just follow the steps 2.1 - 2.4. Install the expert advisors into this folder:

Then restart the trading platform. You're now ready to start using all expert advisors. Drag and drop an EA from the navigator window to the chart!

## 4. Systems And Strategies

This section describes a typical example of installing a trading system or strategy found on DolphinTrader.com.

Let's take this one for example:

### PSAR Moving Average Forex Trend System

IN FOREX TREND FOLLOWING SYSTEMS / BY DOLPHINTRADER /

PSAR Moving Average trend following system is composed of 3 moving averages and PSAR (Parabolic Sar). The system is designed to provide forex traders entry signals in the main direction of the bullish or bearish trend. It can be applied to all currency pairs.

Time Frame (s): 5 Min chart and above

Used Indicators:

200 Simple Moving Average, 50 Exponential Moving Average, 7 Exponential Moving Average, Parabolic SAR (0.02 Step)

Preferred Currency Pairs: Any

Preferred Market Sessions: Short term trading: London, US – Long term trading: All

Step 1: Start Metatrader 4

Step 2: Open a new trading chart

Step 3: Add the “Used indicators” to the charts + adjust the recommended indicator settings.

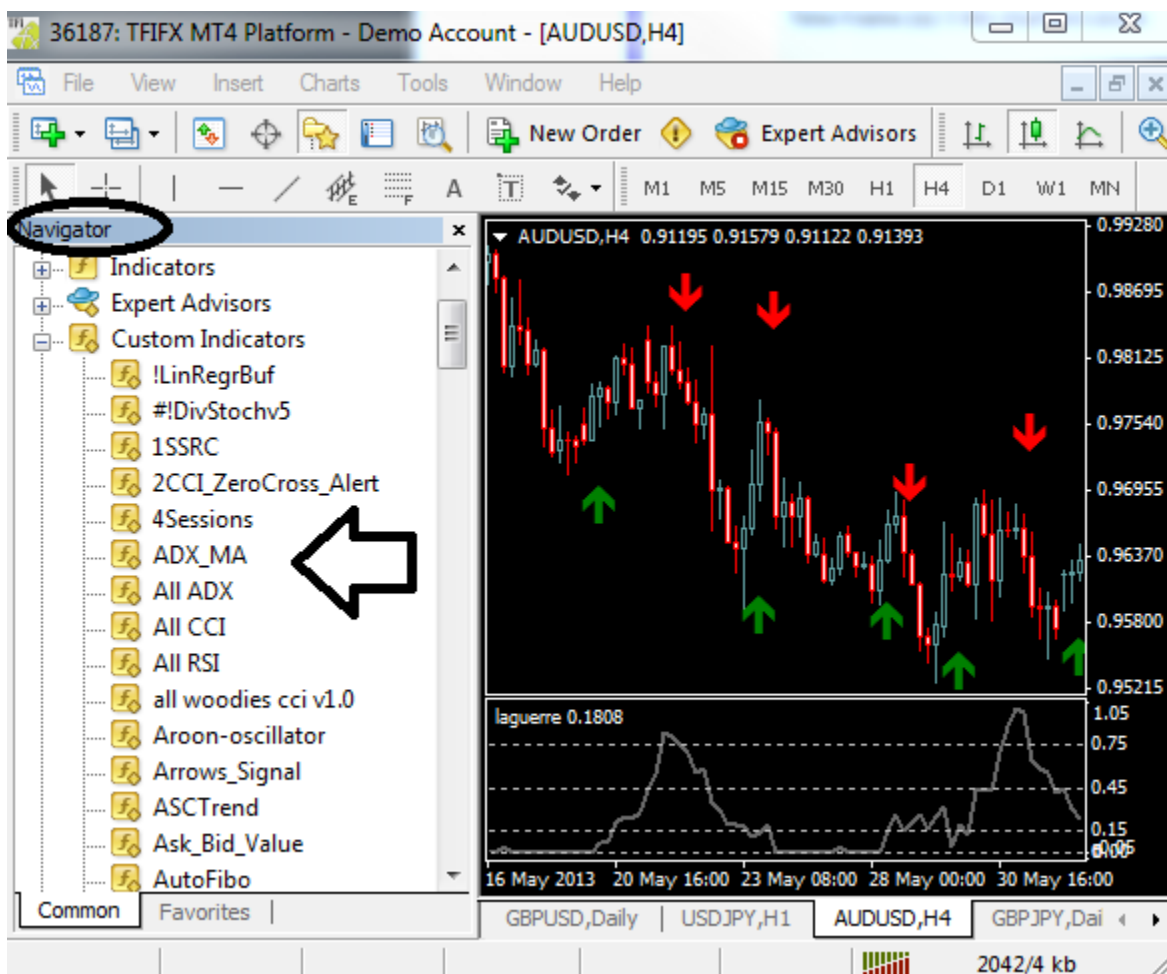

Please remember that The DolphinTrader download file contains most of the “Used Indicators”.

You'll find all the other used indicators in the Metatrader 4 default indicators folder (moving average, PSAR, MACD, Relative Strength Index,...).

You can add the “Used indicators” directly from the Metatrader 4 Navigator window.

Main menu > View > Navigator (drag and drop).

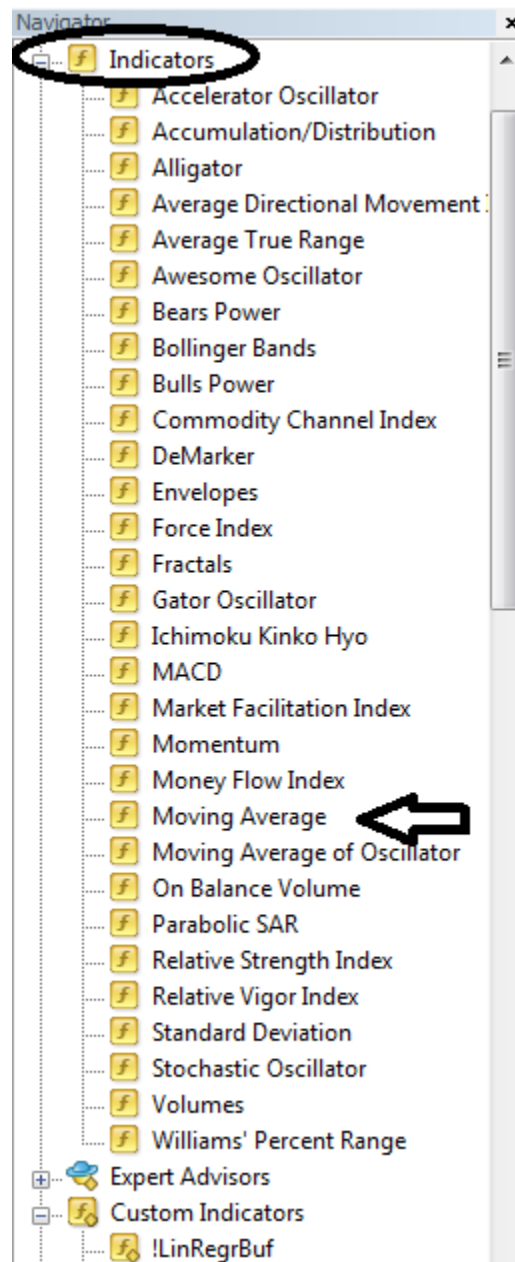

## Picture

For example, the PSAR Moving Average system requires you to add the 200

simple moving average indicator. This indicator is listed in the default indicators folder. You need to drag and drop the “Moving Average” indicator to your chart and modify its settings.

## Picture

## Modifying recommended indicator settings

Right click in the chart > Indicators List > select indicator then click the EDIT button > select the Inputs tab to modify indicator settings > SAVE

## Picture

**Step 4:** Follow The Trading Rules (use at your own risk)

That's it.

Optional: Right click in the chart and save as template. Now you can add this trading system or strategy to other trading charts and currency pairs.
