

As my initial plan is short bias with follow Daily candle bear expect to continue for the day.

The box is my entry ...first one is too early, second is good sitting @ 50 fibo, and the last is Support becoming Resistance @ 1.0460...and my exit.

As for contingency plan as the price keep Up during the event, I was place Limit Buy order above 1.0460 IF price break back this level. Wuhhh...worry about that too.

The Learning here is better I jump to take a long first **as all the candle M30 above the daily Open.**(my short bias blind me)

And here is the proof (not to show off, Just for walk the talk only)

2016.12.16 04:32:44	sell stop	0.55	eurusd	1.04000	0.00000	0.00000	2016.12.16 04:58:43	1.04285

The second trade that I took that day is the mirror with EU....UCHF.

Here is the story.

First let forget the trade I took the day before (Thursday) ...my dumb (explanation at the picture below).

My Plan is similar with EU...to follow the trend on daily(bulls continue) and hold for a while the short(I know its my bad and no excuse about that—just see it as the reversal plan that fail).

The picture speak itself....

And the proof (honesty is the best policy)

If any of you have suggest or comment or constructive idea is very welcome. You can post on the Thread

Anyway, a good time to say....

Merry  
Christmas

--Little Snow--
