

## Calendar Analysis (Davit)

### Why analyze the Weekly Economic Calendar?

1. **Build Awareness** of Your interpretation with the Market.

- i. What You think is not necessarily a Prediction.
- ii. It is:

What You think about News Events.

2. It will bring into **sharper focus how Events shape Price.**

This is more difficult to rationalize but will become intuitive.

You will see:

- a. Your PA reading or interpretation.
- b. How pairs dance around – PA in the Market.
- c. Their connections or correlation to each other.
- d. PA will be **better understood by You.**

It is a given, results of News are difficult to Predict!

That is **not** what Analyzing the Weekly Calendar is about:

It is About:

1. Building Awareness.
2. How News Events shape Price and **YOU in it** – not as a **distant viewer.**

There is a real tangible difference that is difficult to articulate or put in words!

**It is:**

1. What you must do.
2. Find out for Yourself even if it is helping You or not!

No General, goes into battle without a Plan and a Study of the terrain....

It is a battle of outsmarting your opponent at a basic level.

You cannot do that by being ignorant or not informed.

**Market always knows what is coming up and this is Constant!**

**Question is Do You?**
