

Cash-In Strategy

To every one who following my signals@ [Forex Power Signals](#),

Did you ask why I recommend you to open 3 different trades for each entry???

This is a Cash-In Strategy!!! Wooooow What does it means and How it works???

I would like to explain it to every one, How I trade it myself on each entry I have made!

Lets say, you wanna Buy/Sell lot = 1.0

So what we will split it like this:-

1st lot = 0.4 --- Tp1 = 25 pips

2nd lot = 0.3 --- Tp2 = the level we specified regarding to Pivot-Fibo

3rd lot = 0.3 --- Tp3 = the level we specified regarding to Pivot-Fibo

Now lets think about what we just have done

1- we risking the same lot 1.0

2- Tp1 25 pips Cash-In to your account giving you risk free on the 2nd and 3rd lots

3- By moving you Sl once the Tp2 hits, you have got the Tp1 + Tp2 and you now in safe side and you are sure that you will never lose any thing if you will be patient to take Tp3 as you already protecting it by Sl@ entry level

The conclusion is: Cash-In Strategy Minimized your risk, Maximized your opportunities for making profit and taking off the trading headache of your mind

[Forex Power Signals](#) wishing you a Happy trade

Best regards

William Wallace
