Hi

I am new to this forum so i thought i would share one of my indicators with you, it is a very useful tool for showing the strength of a move and possible reversals, the MACD settings are 8/17/9 which gives a reasonably fast response and the EMA setting is the cross of MA5 & MA9 while the STR consists of RSI/9 & CCI/13 & STOCH's/5/3/3 and all 3 of those indicators need to be in agreement before the signal shows direction,

- 1/ All the colors & settings for the internal indicators are user adjustable
- 2/The Timeframes are user selectable
- 3/ The indicator has many different graphic display setups as per the supplied screenshots
- 4/ The indicator can be placed anywhere on your chart including any selected indicator window
- 5/ The Price changes color as the Price moves - The default setting for the Price Display is - Lime for UP & Red for DOWN & Orange for static
- 6/ I have supplied 2 versions - v7 covers 6 Timeframes & - v71 covers 7 Timeframes for those who like to [monitor](#) M1 to Daily.

Trading foreign exchange on margin carries a high level of risk, and may not be suitable for all investors. The

possibility exists that you could sustain a loss of some or all of your initial investment and therefore

you should not invest money that you cannot afford to lose. You should be aware of all the risks associated with

foreign exchange trading, and seek advice from an independent financial advisor if you have any doubts.

Some screenshots showing some of the possible display setups

Sorry people it appears that this site does not allow the posting of ex 4files only mq4 files, as i am new to this site i only discovered this as i tried to post the ex files after i had posted the 1st 2 posts on the thread.

I do not want to supply the mq4 at this stage, i guess i could zip them and then send the indicators - is that what is required???

I have zipped the files & posted them

Enjoy
