

# QQE ( Qualitative Quantitative Estimation ) for MT4

QQE is a combination moving average RSI + ATR. It's very useful for volatile pair such as GBP/ JPY , GBP/USD , USD/ JPY. I don't know who's design this indicator but initially this indi can't edit the programme .

QQE as below show different setting parameter.

Custom Indicator - QQEA

Variable	Value
SF	1
RSI_Period	14
DARFACTOR	4.235

Buttons: OK, Cancel, Reset

Custom Indicator - QQEA

Variable	Value
SF	30
RSI_Period	14
DARFACTOR	3.5

Buttons: OK, Cancel, Reset

Default Setting QQE Parameter is as below :

SF ( Smooth Factor )      1  
 RSI Period                    14  
 DARFACTOR                    4.236

adjust this parameter based for every pair. It's becoz every pair have different character. Adjust Darfactor to get early entry.
