

## Short Term Technical Updates

### Technical analysis EUR-USD

#### **Overview:**

EUR-USD continued with up move and our recommendations for up targets at 1.2820 and 1.2890 was right. Now price is neutral around our second target (1.2890)

Our Recommendation: EUR-USD on short term currently neutral and our advice is try to trade smaller timeframes (scalp)

## Technical analysis GOLD

### Overview:

Gold was neutral last two days but our advice is same as like two days ago and we expect future up. Our stopping volume and test bar from price 1719 are still valid so that is another confirmation that we can see future up.

Our recommendation: Be careful with selling and watch for buying opportunities. Our recommendations for up targets are 1745 and 1769.

## Technical analysis GBP-CHF

### Overview:

GBP-CHF continued with down move as we planned two days ago. Our recommendation for down target at 1.4930 was right and now we are very close to our second potential target at 1.4860

Our recommendation: GBP-CHF on short term currently neutral and our advice is try to trade smaller timeframes (scalp)
