

CREATE YOUR OWN SHORTCUTS

Did you know that you can create your own shortcuts for indicators, EAs and scripts?

- 1. Go to the **Navigator** panel
- 2. Right-click on any indicator, EA or script
- 3. Select **Set hotkey**
- 4. In the **Navigator Hot Keys** window, find the indicator EA/script you want to create a shortcut for
- 5. Click **Set** and assign a key
- 6. To finish creating your shortcut, click **Close**

You'll now be able to execute custom trading commands at the touch of a button.

MOUSE COMMANDS

- Duplicate objects** – Hold Ctrl+left-click and drag any object to create a duplicate
- Crosshair mode** – Click the mouse wheel to enable crosshair mode
- Property menu** – Double-click on any indicator to bring up its property menu
- Rescale chart** – Place your mouse on a chart's right-hand axis, then hold left-click and drag your mouse up and down
- Resetting chart scale** – Place your mouse on a chart's right-hand vertical axis and double-click
- Ruler tool** – Hold Ctrl+F+left-click and move your mouse to draw a ruler
- Scroll** – Hold left-click and drag your mouse left to right to scroll through charts. Alternatively, move your mouse wheel up and down

FAST NAVIGATION

Fast Navigation allows you to quickly navigate to any market or change your chart's periodicity. Simply hit Enter to display the **Fast Navigation** bar, enter the desired periodicity or market, and hit Enter again.
