

# *MaiTei V2*

Second version of Maitei system

Almost the same way to trad, quite simple, can be use by beginner like me :)

Open chart H1 TF with japanese candlestick

moving average:

periode: 63

shift: 0

ma: exponential close

CCI:

period: 50

Typical price

lvl: 0

The way to trad is still the same, should wait price close above or under the 63MA and the CCI go under or above 0 in the same direction.

I add some screen, hope it will help!

Thanks to coolhell to make me think how to improve my result.
