

To ALL of the people involved in the development of the original Genesis Matrix Trading System, THANK YOU SO VERY MUCH for the time and effort you you spent, plus the patience and professionalism you showed in guiding us on how to use it. I followed you from its birth. The trading education you provided was invaluable. It made me a better trader and I, for one, am immensely and forever grateful.

This version of the Genesis Matrix Trading System was created by me, Bob Scheide, (bobby2 on Forex Factory) solely because of my own frustration with my inability to accurately interpret the current time-frame Stochastic as it relates to the current true trend. I created GMTS Winner in an attempt to be more accurate with my decision making process. It is, in no way, my intention to diminish or disrespect the work of the original GMTS developers. I have tried to stay true to the rules of the original GMTS. Any changes that deviate from the original system are completely my own.

#### GMTS Winner notes:

The only difference between GMTS Winner v1 and GMTS Winner v2 in the Templates Folder is v1 has the ASCTrend 2TF Matrix attached. GMTS Winner v2 does not. There are advantages and disadvantages to using it. It is up to the trader to decide which version benefits them most.

The red dotted Moving average is 50 Period, Linear Weighted, Open. It seems to give a little better trend signal than 50, Exponential, Close. Thank you for that josch on Forex Factory.

In sub-window 2 GMTS Tape is interpolated over Genesis Matrix 2.22. and the indicator labels blacked out. On my PC the alerts for GMTS Tape don't function but the Matrix alerts are fine. The indicator labels were not needed next to the tape.

If you downloaded my previous GMTS Winner Template, you will notice I have added MTF Stochastic v2.1 to the sub-window 1 box. If it looks too "busy" in that box just delete it. At first glance, it appears to be difficult to read. As with most new things, once you get used to it, it's not as difficult as it appears.

Do not rely on any one indicator to enter a trade. It's a concerted effort. Be patient. You won't be disappointed.

Original entry rules for the Genesis Matrix Trading System apply. If you are unfamiliar with the rules and GMTS in general, study the original Genesis Matrix Trading thread on Forex Factory located here:

<https://www.forexfactory.com/showthread.php?t=373796>

The Winner indicator can, or at least hope, to aid in strengthening your confidence in interpreting the Stochastic signals, especially with exits.

After entry watch the Support Resistance (S/R lines AND Scissors (ADVISE TO RESPECT THE SCISSORS MARKER, IT IS PRETTY ACCURATE), MTF Stochastic 2.1 crosses, and the Winner signals. They will tell you when to exit. Also, if the current time-frame Stochastic is leaving either of the 80 or 20 zones, consider exiting.

Sometimes the Winner signal is so far extreme that there is no signal bar, just black space. When that happens watch the other indicators for exit signals.

Remember: NOBODY EVER WENT BROKE TAKING PROFIT. WHEN IN DOUBT, GET OUT. In time, you will raise your confidence level for high-probability entries and more profitable exits. Practice, practice, practice.
