## 4Hr. Candlestick Chart

### Comment: ... Again Bullish!

We had a candlestick close out above the Daily High of .8536 which is giving it momentum up toward .8574. A good close of a higher TF candlestick here and we're set to move still higher.

## 1 Hr. Candlestick Chart

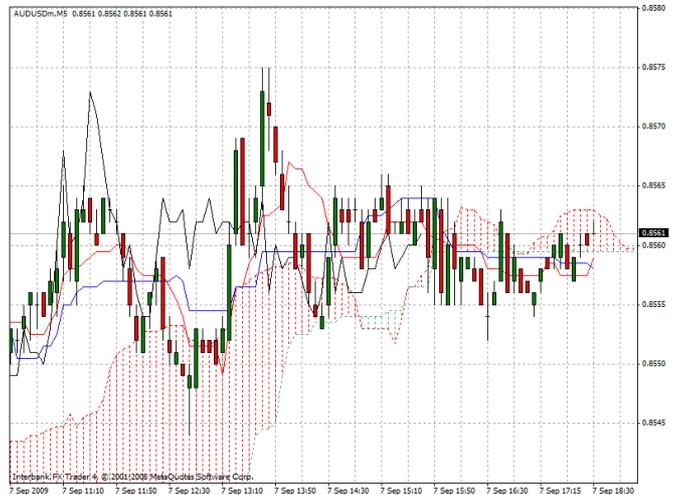

## 30M Candlestick Chart

## 15M Candlestick Chart

## 5M Candlestick Chart

### Comment: ...

Lower TF's showing the low volatility in the market today. Still above Kumos except for 5M which is poised to pop through small price volatility cloud.

| Trends            |                |
|-------------------|----------------|
| Major Trend (W)   | <b>Bullish</b> |
| Median Trend (D)  | <b>Bullish</b> |
| Minor Trend (4Hr) | <b>Bullish</b> |

**Conclusion:** The main trend is Bullish(Weekly, Daily and 4Hr.) and on the lower TF's you have the 5M running under Minor Kumo. Looks like we are setting up to move further up after short rest around old Daily high (.8536). Again buy pullbacks if you get one down that far.
