

## £9.5 BILLION OF UK TAXPAYER MONEY

- **Total pensions and employee benefits bill to be paid by the UK : £9.5 BILLION**
- 45 years of continued UK payments to the EU
- Each year it's the EU that will tell the UK what it owes for the previous year
- The UK will be part-paying the pensions and employee benefits of **ALL** EU staff, not just British staff
- Belgians form the biggest nationality group

In addition, UK pension and benefits liabilities for MEPs and "EU high-level public office holders" such as President Juncker and Michel Barnier will effectively be paid in advance to the EU over 10 years, not as they accrue over 45 years.
