Installation

Download files

Download **rar** or **zip** file from [MT5 Indicators and EAs](#) thread on Forex Factory. You can download “bundle” of all my indicators and EAs from the [first post](#):

**Joeef** 

First Post: Feb 28, 2019 4:57am | Edited Jun 25, 7:35p

It will be better to have one place to post all my MT5 stuff.

All my stuff in one archive file. There is a contents.txt file in the archive.

Attached File

 [MT5_JF_ALL_INDIs_EAs.rar](#) 4.5 MB | 4 downloads | Uploaded Jun 25, 2019 7:33pm

Attached File

 [MT5_JF_ALL_INDIs_EAs.zip](#) 4.5 MB | 7 downloads | Uploaded Jun 25, 2019 7:35pm

Or you can directly download requested version from [proper post](#):

Quoting Joeef

I fixed Engulfing Bars Dashboard. You can find more here: <https://www.forexfactory.com> few next posts too.

A new version of EngulfingBarsDash. It's a bug-fix. It is able to work with futures now.

Put files to appropriate folders:

- \MQL5\Experts\joeef\JFEngulfingBarsDash\JFEngulfingBarsDash.ex5
- \MQL5\Files\JFEngulfingBarsDashSymbols.xml
- \MQL5\Indicators\joeef\MQ4toMQ5\JFEngulf.ex5

regards

Attached File

 [MT5_JFEngulfingBarsDash_v3.01.rar](#) 1.2 MB | 9 downloads

Attached File

 [MT5_JFEngulfingBarsDash_v3.01.zip](#) 1.2 MB | 13 downloads

Unpack files

Unpack downloaded **rar** or **zip** file to obtain folder with software: **"MT5_JFEngulfingBarsDash_v3.01"**.

Name	Date modified	Type	Size
 MT5_JFEngulfingBarsDash_v3.01	6/24/2019 9:25 AM	File folder	

You will need **three files** from this folder:

- 1) "JFEngulfingBarsDash.ex5"
- 2) "JFEngulfingBarsDashSymbols.xml"
- 3) "JFEngulf.ex5"

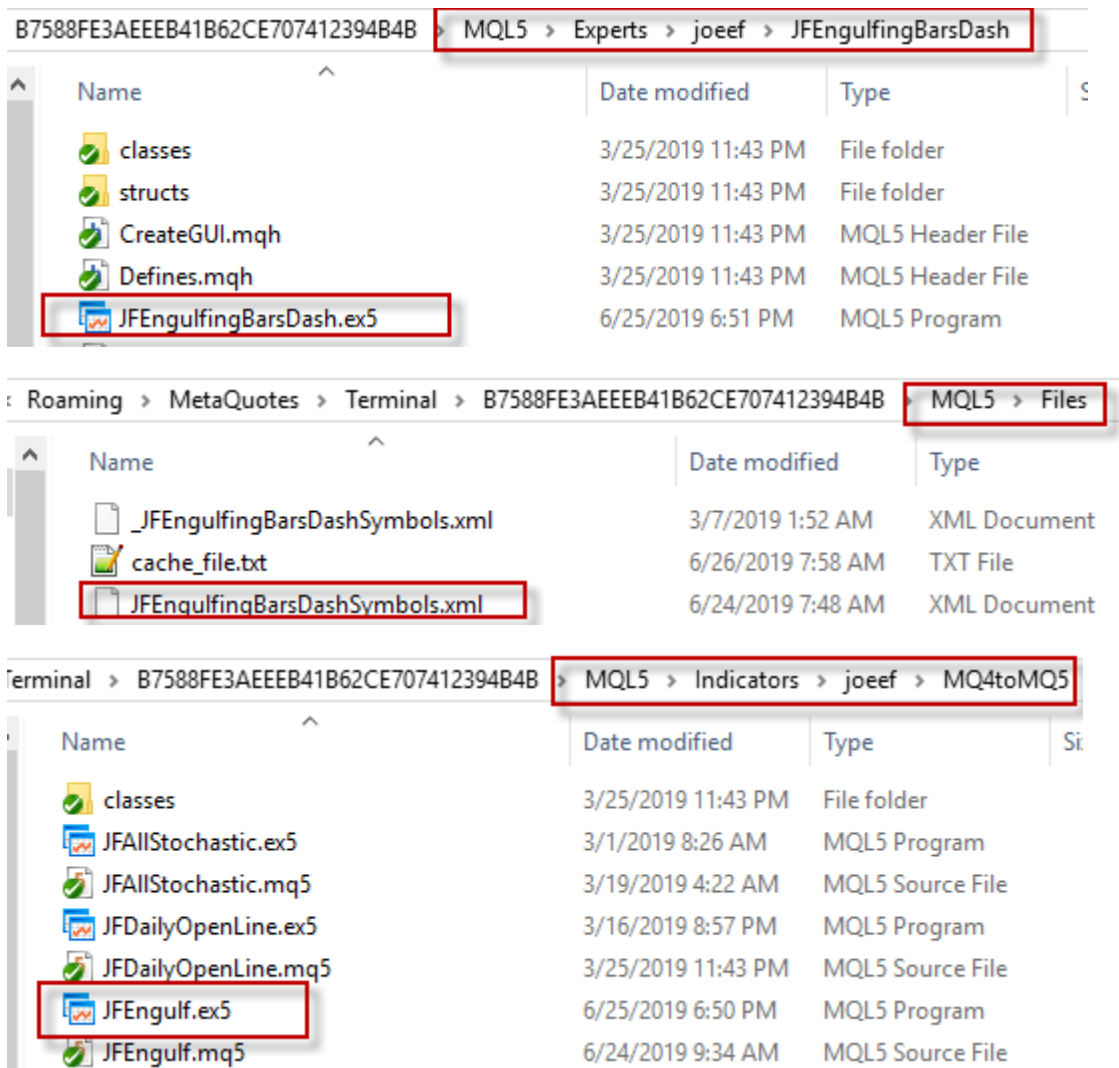

MT5 > MT5_JFEngulfingBarsDash_v3.01 > MQL5 > Experts > joeef > JFEngulfingBarsDash			
Name	Date modified	Type	Size
 JFEngulfingBarsDash.ex5	6/24/2019 9:24 AM	MQL5 Program	1,255 KB

Tools > Virtual Machines Shared Folder > MT5 > MT5_JFEngulfingBarsDash_v3.01 > MQL5 > Files			
Name	Date modified	Type	Size
 _JFEngulfingBarsDashSymbols.xml	6/24/2019 7:48 AM	XML Document	5 KB
 _JFEngulfingBarsDashSymbols.xml	3/7/2019 1:52 AM	XML Document	17 KB
 JFEngulfingBarsDashSymbols.xml	3/7/2019 1:50 AM	XML Document	5 KB

MT5 > MT5_JFEngulfingBarsDash_v3.01 > MQL5 > Indicators > joeef > MQ4toMQ5			
Name	Date modified	Type	Size
 JFEngulf.ex5	6/24/2019 9:04 AM	MQL5 Program	30 KB

Deploy files

- 1) In folder \MQL5\Experts\ create subfolder **"joeef"** in which create next subfolder **"JFEngulfingBarsDash"**. In this subfolder place: **"JFEngulfingBarsDash.ex5"**
- 2) In folder \MQL5\Files place: **"JFEngulfingBarsDashSymbols.xml"**
- 3) In folder \MQL5\Indicators\ create subfolder **"joeef"** in which create next subfolder **"MQ4toMQ5"**. In this subfolder place: **"JFEngulf.ex5"**

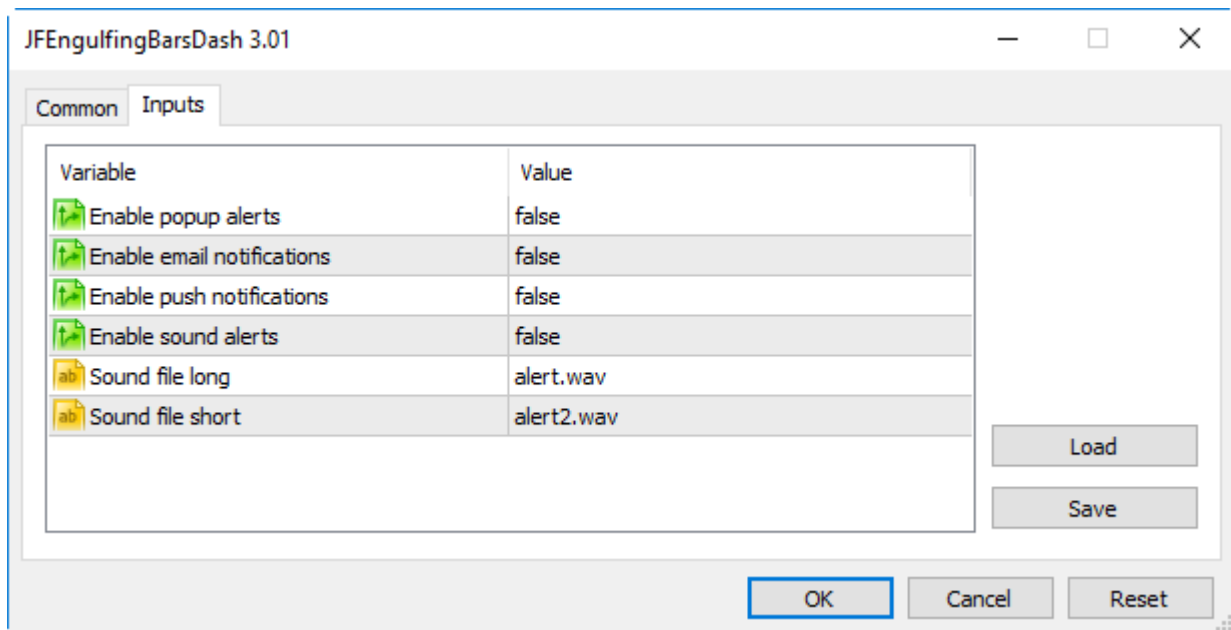

You can see this situation in [this post](#) too.

Note: In downloaded rar/zip file are files in **proper directories**.

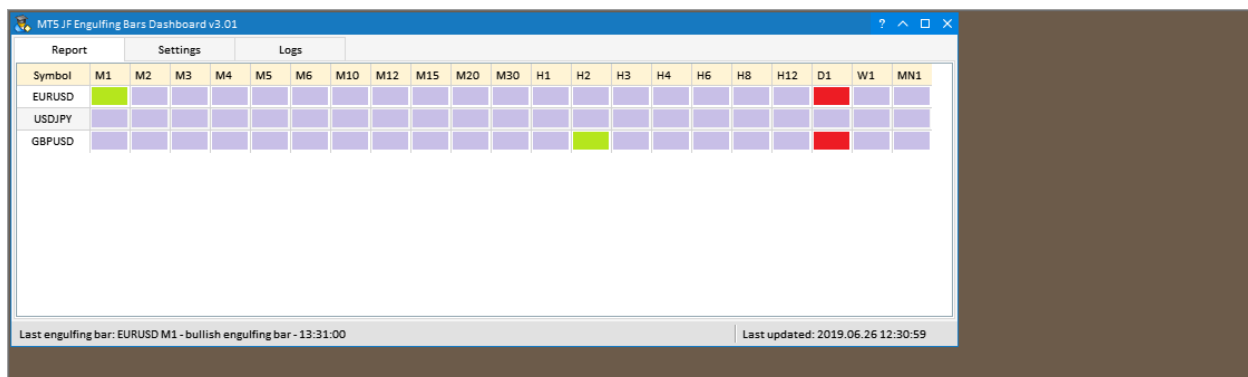

Configuration

First start

Default configuration XML file (JFEngulfingBarsDashSymbols.xml) packed in rar or zip file has configuration for three currency pairs: **EURUSD**, **USDJPY** and **GBPUSD**. So, if you are able to open charts for these currency pairs in your MT5 terminal and you deployed previous files you can start JFEngulfingBarsDash right now. Only place JFEngulfingBarsDash on any chart:

After a few seconds you should see dashboard:

Troubleshooting first start

You should see:

Green cell = Bullish Engulfing Bar

Red cell = Bearish Engulfing Bar

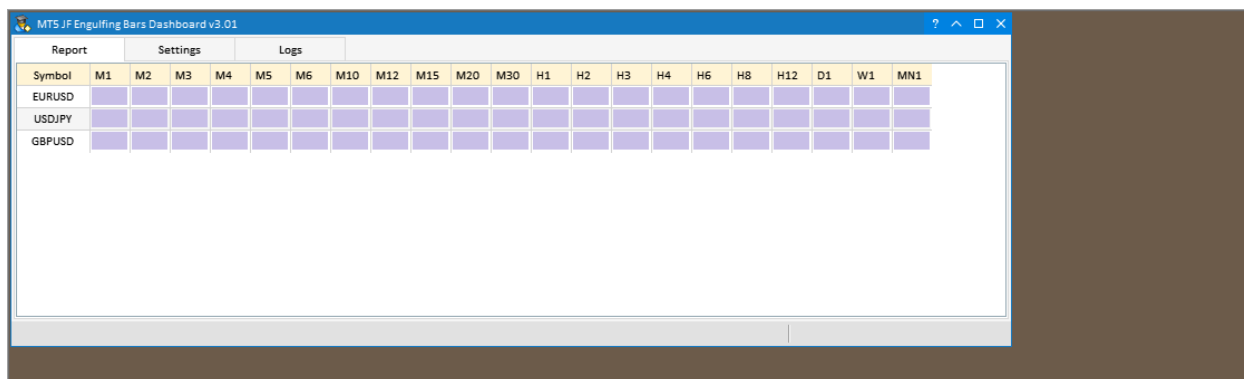

Gray cell = This cell is processed but no Bullish/Bearish bar is here now

White cell = This cell is not processed (is off)

Note: White cells are not in default configuration XML file.

And you should see notifications in status bar too.

If you **don't see** Green or Red cell/s or you can see something as this:

- 1) **Double check** you placed required three files in **proper places**. Did you create required subfolders?
- 2) **Double check** you are able to open charts for **EURUSD**, **USDJPY** and **GBPUSD** currency pairs in your MT5 terminal.
- 3) If you're deploying a new version be sure you replaced **EA** and **indicator** too. For example, JFEngulfingBarsDash v3.01 is working with JFEngulf v3.00. **In downloaded package are always proper files.**

Adding, removing and changing symbols
