Disclaimer

Disclaimer ::Forex is always riskier. My EA will never promise you of, constant profit for a long time. Due to market volatility, its subject to fail. Use it at your own Risk. Do invest only the money that you afford to lose . There are 99% of the traders lose their money in forex due to improper handling of trades.

Introduction

Dear Forex Traders and my Dear Buyers of this wonderful EA, Greetings to you all. The EA “Keltner combined V5.1x EA” is the result of my 10+ years of trials and analysis of forex trading strategies and now it started yielding its results. There is a message for those who don't believe Forex Automated Trading, that, Automated Forex Trading using Robots are possible and its already started working for you !

The Keltner EA is purely based on the breakout strategy of Keltner Channels. Its also mixed with few secret technical strategies to make the orders fall in profits.

In this Guide , I the author of the EA will present to you the complete installation and set up information about the EA. I wish you all a happy auto trading with my EA.

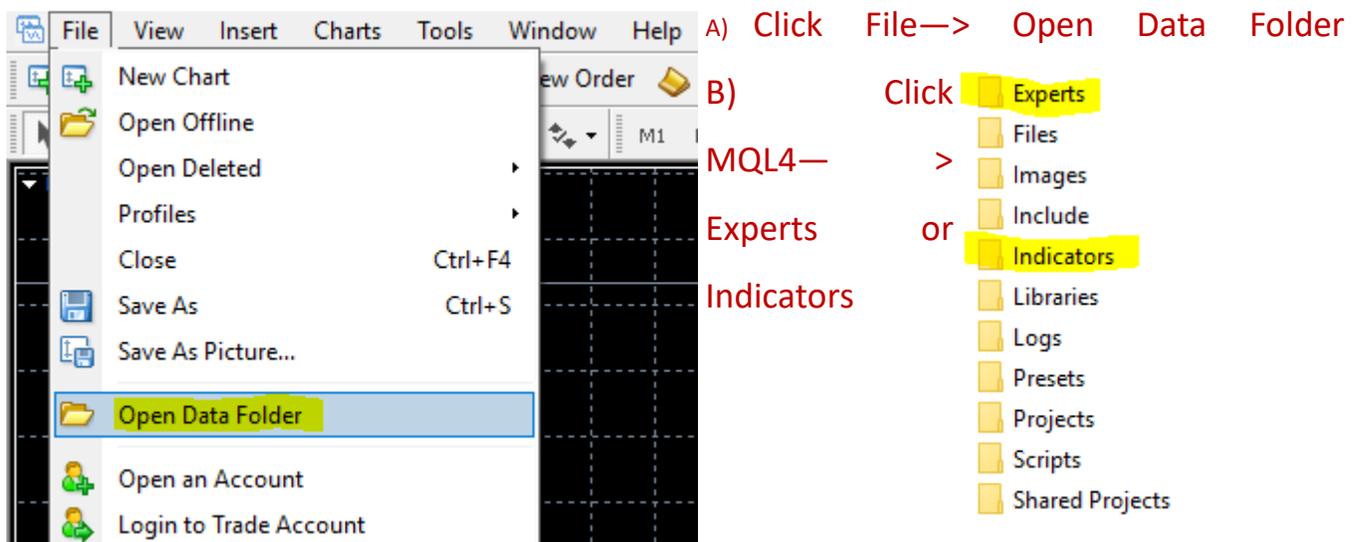

Copy Indicator and Expert in MT4 Folders

The EA is utilizing the parameters derived by the Keltner_Channels and Heiken Ashi Indicators and they should be placed in the Indicator Folder of MT4. I will tell you how to copy the Indicators and the expert Advisor (Robot) into that folder.

1. Download the indicators from this [Keltner_Channels.ex4](#) and [Heiken_Ashi.ex4](#)
2. Download the Expert Advisor sent through your email.
3. Copy both the indicator files into the Indicators Folder
4. Copy the Expert file into the Experts Folder

[See Below to Know the location of Indicators and Experts Folder]

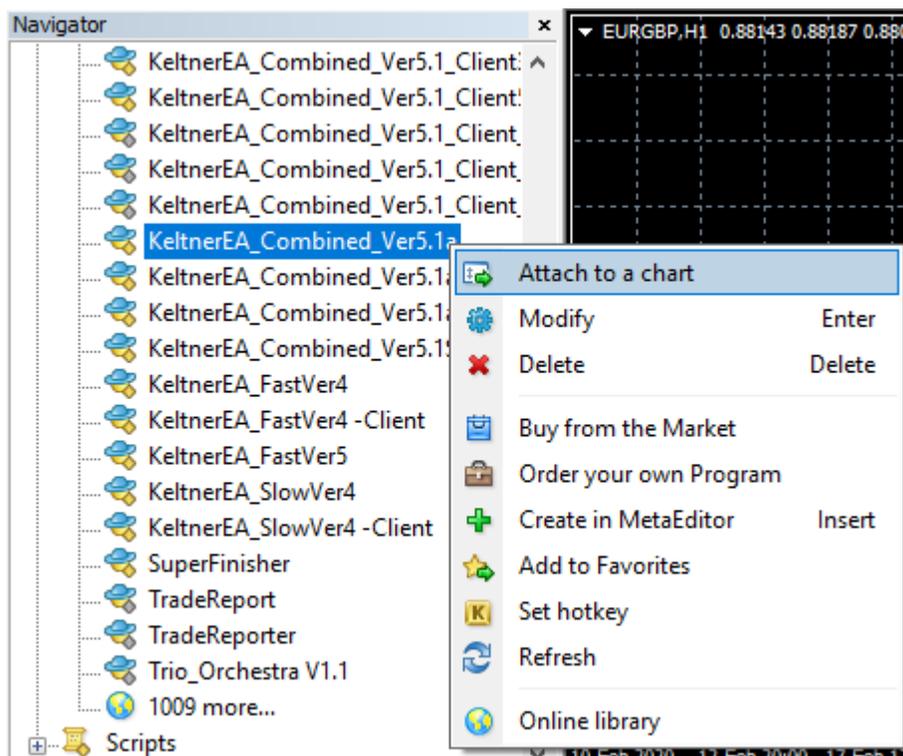

To know the MT4 Folder,

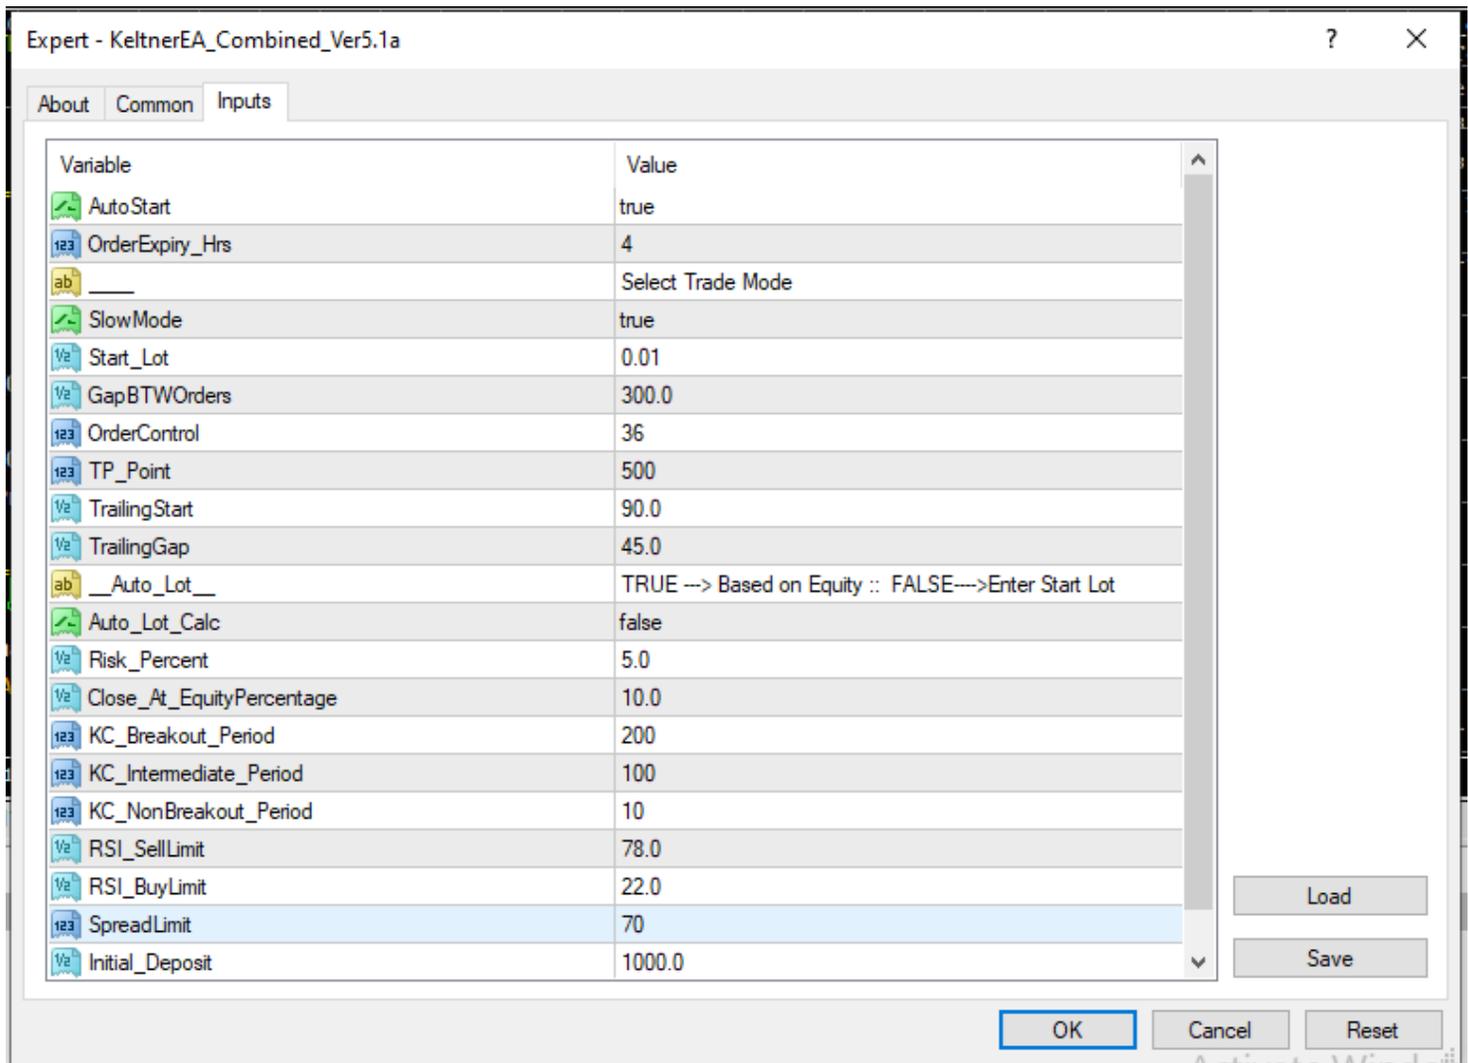

Attach the EA (Robot) to the Chart

Open in any chart (EURUSD) on M30 Time Frame,

Go to Navigator Pane of MT4 and Click Experts —> Keltner Combined V5.1a
(Right Click) —> Attach to a Chart

Configuring the EA

After Clicking Attach to the Chart, you will see a window like this
