My Strategy

Chart: Renko
Indicators:
Kumo Cloud (from Ichimoku Kinko Hyo)
hamaft3anewualert: This indicator is an HAMA but it has some different values that make it works perfectly with my strategy.

Buy trigger conditions:
The price have to close a renko candle above and completely outside the kumo cloud.
The Kumo cloud must be green color.
The Hama must be green color as well.

Close The Position when The HAMA indicator change color in red.

Profit example:

Loss examples

Sell trigger conditions:

The price have to close a renko candle below and completely outside the kumo cloud.
The Kumo cloud must be red color.
The Hama must be red color as well.

Close The Position when The HAMA indicator change color in green.

NOTE: (The kumo cloud color is the one who is forming in the current time and not the one who is below or above the price)
