Geographical information

The **euro area** consists of Belgium, Germany, Estonia, Ireland, Greece, Spain, France, Italy, Cyprus, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Austria, Portugal, Slovenia, Slovakia and Finland.

The euro area data refer to the country composition at a specific point in time. Changes in the composition of the euro area are incorporated using a chain index formula.

Methods and definitions

Annual inflation is the change of the price level between the current month and the same month of the previous year. **Monthly inflation** is the change of the price level between the current month and the previous month.

Data collection for HICP has been affected by the COVID-19 crisis in all euro area countries. Eurostat and the Member States' national statistical institutes have agreed a set of procedures to estimate prices that could not be collected due to mobility restrictions or closures of outlets. All information about these procedures is available on the [Eurostat website section on inflation](#).

Revisions and timetable

The euro area inflation flash estimate is issued at the end of each reference month.

The complete set of harmonised indices of consumer prices (HICP) for the euro area, EU and Member States is released around the middle of the month following the reference month. The next release with full data for December 2020 is scheduled for 20 January 2021.
