I decide to take this trade, although I should wait for another candle to form.

MACD shows Round Top

EUR/USD short 1.3652

SL:1.3672(-20) slightly above SMA 200, slightly below yesterdays high)

(a)TP:1.3632 (+20)(slightly above EMA 21)

(b)TP:1.3575 (slightly above SMA 89)

08:14

actually + 18 Pips

08:15

(a)TP +20 Pips

(b)SL modified +/-0

I won't be close to the computer all day so I am happy having quickly made about 20 pips. I'm breakeven with the second trade, so I either make a lot more or not.

19:28

(b) SL = +/- 0

It seems as if the downtrend did not reach my SL. Maybe I should have placed it a little higher.
