(green line indicate support area) Post#276 > When I see a tweak... I look for: 1. Are the candles getting smaller 2. Are the wicks starting to pull back more 3. Are we getting close to a sup/res level. 4. Is my green TDI line getting close to previous highs or lows on my TDI = Look how are wicks pulling back {image} Post#647 > Am I in an uptrend or downtrend.. short & long term......

@Tekkies

After more than 9 years you still have not learn the basics of TMS 5-Method.

TMS_V19 EA will help you learn faster post #261 and post#647.

TMS_V19 EA will also send you alerts when you have selected the technical setup conditions in the EA set-file.

Big E died and he did not leave a void, he did not have the opportunity to learn how to use this EA. What have you learn here since 2011?

USDCAD Jun 09

- market is not trending

- Trend 2/8 show blue colour for many 4hr periods.

- look the price action going back the last 34 bars/candles, the market type is sideways ranging

@sanity

For day trading I use TMS-II strategy for entries and exits

Below is my trade chart for EU Jun 09, note the TP levels

- TP1 hit
- TP2 and TP3 missed, cut loss when price pulled-back #
- one winner, two losers

@Tekkies

You can make it extremely simple by following the OP' posts and trade the way he as laid out.

AUDUSD H4 Jun10 below

Top Down Approach is simple when you start at the beginning 2006 when the OP was a forex newbie. He only spent 6,000 hours to learn and master forex 5-Method.

Thanks emm, your posts are educational. In your example below would you take that trade short even though the trend is up? assuming the angle of the TDI is good and the colour of the candles is at least within 3 candles?
Edit just looked at chart again it does look like the trend is slowing down and possibly reversing.

This week 24 I am not buying USD. Same as last week Jun 02 to 06.

Like last week 23,
I short EU, GU,
long UCad and UJ.

IF you see the TDI slope 3.9 is 'iffy'

you can follow the OP posts and check other templates and also different timeframe

today TMS(r) templates also show a sell setup at London 6am open

@Tekkies

I was talking about great traders and you are thinking of me.

I got your attention. Slowly but surely you will get there to become a great trader. Take another 9 years like the OP did back in 2006.

That is USDCHF chart and is correct regarding the market type.

Now is London 9am 4hour,

are you ready for the next 4hour London 10am?

> {quote} Thank you so much for your help, @Tekkies. It's truly a privilege to receive this kind of support for free here on the forum. I've understood everything perfectly, and I'll make sure to check all those points before taking another trade. I'll definitely come back here to ask about future setups. That said, I'd like to ask one more thing if I may: Lately, I've noticed that the TDI on H4 and Daily often show opposite signals. For example, the Daily TDI might just be crossing above the red line (or moving upwards above it), while the H4 TDI...

You need to post charts that show what you are posting about.
>>No two traders read the same chart the same way and come to the same understanding in what they see on that chart.

Here is a link to a previous Post#150,010 / Post#84,947 / Post#97,093
Maybe it can help you to understand how to trade with two time frames.
(The links in that post will show you one of many ways in how study BigE's method: Post#126,715)

@Tekkies

Trading three timeframes is easy. You need to understand the forex basic stuff mentioned in post #647.

IF you still do not know what is short and long trends,

then you need to do as the OP said: go back to babypips.com school of pipsology.

Keep It Simple: When trading the H4 which is the short-term trend, then the Daily is your Intermediate trend and the Weekly is your Primary trend.

And the key here is to pick the market type which swing 3 to 8 candles.

Apr 29, 2011 4:43pm | Edited 5:20pm | Quote | Cleanup | #647

Your safest trades will always be when green crosses red and you enter on candle 1 or 2... odds are in your favor. Why? Because I'm expecting 3-8 candles... which is average...

With bounce trades the odds are lower for your success... but it still works.

When wanting to enter a TDI trade... take a moment first to observe basic 4x things... like:

How close am I to the previous high or lo

Am I in an uptrend or downtrend.. short & long term...

Am I in or close to a consolidation area

Are the previous candles small...

Look at the candles on the last reversal... big, little, what

How does the momentum look right now (12-2, 4-6)

Does Stoch's confirm the TDI signal

Sounds like a lot of stuff but it's basic stuff and only takes a moment to observe it...

If you don't already know these things... don't trade live yet... www.babypips.com is a good place to learn about the basics of trading 4X.

[quote=Tekkies;9576878]{quote}
BigE have left a void behind that members need to full on their own.
Emmanuel filled that void and did it very good.
Somewhere along the way he lost track that **he is dealing here mostly with members that do not know how to trade at all.** Members that have learned from BigE and emmanuel have moved on and left this forum. Most probable successful traders in own right.
Those old members are replace by new members that do not know how to trade.
Every couple of days / weeks the cycle repeat it self. So after many years the level of traders in this thread is still at the level of a new member.
The subject / topic's that emmanuel is posting now is advance forex trading.
How long did it take you to understand all the point's in post#647. I did not even looked at ME/ME for that level of trading is above me and the little I know.
Do I enjoy those post fighting with emmanuel about keeping it BigE's way. No I do not...[quote]

hey Folks

@Tekkies claimed in his post #76,129 Feb 2017 that you new members do not know how to trade.

Are you new members that do not know how to trade ?

Am I dealing with new members here who do not know how to trade?

I did a good job filling the void ....

How much weight/emphasis do you give the 2/8 trend?

I find that it often filters out some good trades, as the entry candle is sitting on one of the MA's or sitting slightly in between the two causing it to be identified as range. So I stopped including it.
