

Run FFcal.EXE and set the parameters as shown below. Take careful note that you have the highlighted fields correct. Then click OK.

You should see a black window with white dots appear in the following screenshot. This means that FFcal.EXE is downloading the data from FF.

When the process is complete (allow 15-30 seconds), you should see the screen below:

View News Events History database

Sat 29 Jan 2011	0:01	ALL	WEF Annual Meetings <<AllDay>>	M					37089

Insert (Ins) Change (Enter) Delete (Del) Exit (Esc)

Press the END key to go to the last news events in the file. You should see something like the screenshot above, where events up to 29 Jan 2011 have been downloaded.

If you did everything as explained above, but you're not seeing these news events, then there's nothing further that I can do to help you. There is a problem with your computer, your internet connection, Windows version, other conflicting software (e.g. firewalls), or Forex Factory. You would need to get your local PC vendor to troubleshoot.

Press Alt-F4 to exit FFcal.EXE

Then you need to open My Computer/Windows Explorer, or some other file manager, and go to your\<MT4>\experts\files folder. There should be a file called **news.csv** there:

Right click, open with Notepad, and then press CTRL-END to get to the end of the file. You should see news events dated between 23-29 Jan 2011, like this:

```

news - Notepad

```

Now you should see news 'dots' for all events between 23-29 Jan 2011.

You might need to adjust the time parameters (highlighted in the red box) to suit your time zone. This is explained in Appendix 1 of the instructions document.
