Justin: div + 123 = double confirm, high probability
pennyman: what are the parameter settings exactly for your MA20, can you pull it up pls

Darryl from Lompoc, Calif: This link says it all regarding MONEY! <http://www.ustream.tv/recorded/10297201>
Olarion from Germany: Div, do you consider 3% per trade right for a beginner?
Ray from Saudi Arabia: How do U make each trade end up with 3%?
Jimmy Noodles from UK: Im in UK so would you say 5%
Rexz from Kent, UK: ^^

Justin: correct
trndsurfer from NZ: the ulcer index ie how much can you risk and be comfortable wuth it
funkymonk from old continent: Did you ever consider giving a live trainings for let say, students or unemplyed ppl?
Joel from North Carolina: eur/usd..... today..... trend is short until price breaks and retests 4114 +or -.....do you agree?
Rexz from Kent, UK: can I suggest using meta traders strategy tester to go through some of your charts....
Olarion from Germany: do you trade other pairs like AU, GU?
Rexz from Kent, UK: using vhands you can trade along as it runs?
Rexz from Kent, UK: there is an EA that allows you to simulate like you would live/demo
gdb from UK: How long did it take you to get the hang of it and be successful?
John: you could use the LFH simulator, this is like trading real time just speeded up
Rexz from Kent, UK: I don't actually mean program this in to trade for you, it is an EA that lets you simulate a time period and buy/sell or do anything like you would normally
Darryl from Lompoc, Calif: When CCI doesn't show up, Right Click in it's space to bring up the CCI Window used for changes. Your Indicator will then "Magically" Appear
Olarion from Germany: why do the charts in 06 so ugly?
pennyman: have you ever the ZLR zero line rejection using the CCI indie to confrim flase breakouts?
Darryl from Lompoc, Calif: Bush
pennyman: used
Joel from North Carolina: find my previous question
funkymonk from old continent: Did you ever consider giving a live trainings for let say, students or unemplyed ppl?

trndsurfer from NZ: 123 on 4 hr?
gdb from UK: How long did it take you to get the hang of it and be successful?thx
trndsurfer from NZ: i mean a big 123 would be a 123 on 1 hour or 4 hour
Jackson Philips from India: oh cool.i have lots of time then .. i'm 28
Darryl from Lompoc, Calif: Jackson, yes as long as the money lasts that long
Darryl from Lompoc, Calif: lol

luis gomes from portugal: div i'm stil bit confused about the trend change at 4150! i Know is a flipping area, but to be considered a valid hl for a trend change shouldn't the market make another hh ?
 Darryl from Lompoc, Calif: tweezers
 pennyman: i'm reading up on Wolf wave patterns to see if that will help with finding that pattern with this set-up
 fxwest from california: ive heard this and read this many times but i really did not understand it until now .. thanks div
 kaz from japan: Thank you very much. Do you always wait candle close even if breaking flag lines is happening very fast and you are sure price is going in that direction?
 funkymonk from old continent: Does the divergence stop you in entering the trade even if trend was not fully completed? And the second Q is what is your average winning % in month. Thank you Div
 William Urbaniak from Dallas: do you put your stop in on the same order?
 Vince: march 10th, around 12 gmt, was there div+123?
 Joel from North Carolina: gotta goThank you Div.... talk to you soon
 pennyman: your pretty sharp Div
 Olarion from Germany: Just to clarify: I thought you entered as soon price goes 1 pip above/below the setup bar? Or do you wait for the entry candle to close?

 Jimmy Noodles from UK: do you have any problems trading as a Christian (morally)?
 Vince: ok
 Olarion from Germany: Div, do you wait for entry bar to close?
 Justin: sure
 pennyman: look at the 4hr pls, does this look like a double bottom and it also bounced off the 100% retracement
 Olarion from Germany: I mean the trigger candle to close...
 Jimmy Noodles from UK: when you were losing money at first?
 pennyman: canadian
 Vince: or if it became your idol
 trndsurfer from NZ: or if you where gambling ie had an addiction
 Olarion from Germany: the entry 1 pip above/below candle has to entered instantly?
 divergence 777: 14011 14001
 Darryl from Lompoc, Calif: Simple answer. Who is better prepared to help others than someone that has the ability to give to and supply others with what they need, food, shelter etc.
 divergence 777: 1.4010 1.4009
 Olarion from Germany: ok, not waiting for close, but entry immediately
