 Thanks buddy for helping littlebunny. When you get a moment
 you can show her how to save a chart and how to post charts.
 thanks.[/quote]

Click Browse and select file to upload.

Click Upload and wait until the file is added to the list of attachments. It may take a few seconds.

Close the 'Manage Attachments' window.

Done.

Also, one can insert images into specific positions in your post by placing the cursor at the intended position, clicking the attachments icon in the editor toolbar and selecting the uploaded image you want to insert.

Scroll down to thread options and click the 'Manage Attachments' button if you want to change/remove/add more files.
