

RULES are simple.

TREND DETECTION:

THE TREND IS DETECTED ON H1 TIMEFRAME -8 EMA AND 34 EMA. UPTREND IS DETECTED WHEN **PRICE** IS ABOVE BOTHE AND 8 EMA IS ABOVE 34 EMA, AND DOWNTREND IS WHEN PRICE IS BELOW BOTH WITH 8 EMA BELOW 34 EMA.

ENTRY CHART:

5 M CHART. I DON'T LOOK FOR EMA CROSSOVERS. I LOOK FOR PRICE CROSSOVER OF 8 EMA ON 5M CHART.

VICE VERSA IS FOR LONGS. U CAN SEE H1 TIMEFRAME IN A SEPARATE WINDOW ON THE MAIN CHART, SO U DON'T NEED TO SWITCH SCREENS.

VARIOUS S/R INDICATORS CAN HELP U WITH EXITS.

GREEN PIPS TO YOU ALL
